Full product description

Your support in any work at height

Looking for a tool that fits you, not the other way around? This telescoping ladder is a sturdy support that will come in handy whether you're at home or working on larger projects. Its **thoughtful design** makes it easy to adapt it to a wide range of tasks, offering flexibility where you need it most. Made of **lightweight yet durable aluminum**, it ensures stability and safety, and its compact size when folded makes transportation and storage hassle-free. It's a practical choice that combines functionality with reliability.

Versatile in use

The **telescoping design** opens up a variety of configurations so you can adapt it to your current needs. Whether you need a short ladder to hang a painting or a slightly taller one for maintenance work, this model will work in many situations. This makes it possible for you to work efficiently, without having to carry several different ladders.

A design you can rely on

Made of **lightweight yet sturdy aluminum**, the ladder is prepared for intensive use. Despite its light weight (only 10.9 kg), **it can withstand a load of up to 150 kg**, which proves its robustness. Properly spaced steps (14 steps every 30 cm) make climbing and working at height comfortable.

Practicality through and through

The great advantage of this solution is its **compactness**. When folded, it measures just 90 cm in length, which makes it easy to transport and store, even in limited space. This is especially useful if you frequently change your workplace or simply have limited space in the garage or storage room.

Applications that will make your life easier

This ladder is a tool that will work for many everyday as well as more specialized tasks. Here are some examples of where you can use it:

- When **painting and finishing walls** indoors, giving you adequate reach.
- When **installing lighting fixtures** at medium heights, making precise placement easier.
- During **installation work**, such as hanging paintings, shelves or decorations, making sure everything is in its place.
- For **cleaning and maintenance of windows** on lower floors, helping to keep them clean.
