Price: **199.00 zł** gross / 161.79 zł net

Manufacturer: XIAOMI

Referention number: DNXGFQPRERMPO

Information:

Xiaomi Mi Ionic Hair Dryer H300 is a lightweight, compact hair dryer with ionisation function that helps reduce static, smooths the hair and gives it shine and softness. Thanks to intelligent temperature control and strong airflow, it dries hair quickly without overheating, while double overheat protection increases the safety and durability of the device. Quiet operation makes the hair dryer convenient to use at any time, and the magnetic 360° nozzle makes styling easier. Its minimalist design, low weight and compact size make it a practical choice for home and travel.

Number of speeds	2
Number of heating levels	2
Diffuser nozzle	No
AC input frequency	50 Hz
AC input voltage	220 V
Number of nozzles	1
Air speed	20 m/s
Ionic function	Yes

Product colour	White
Power	1600 W
Watch case material	Plastic
Surface colour	Monochromatic
Product weight	498 g

Full product description

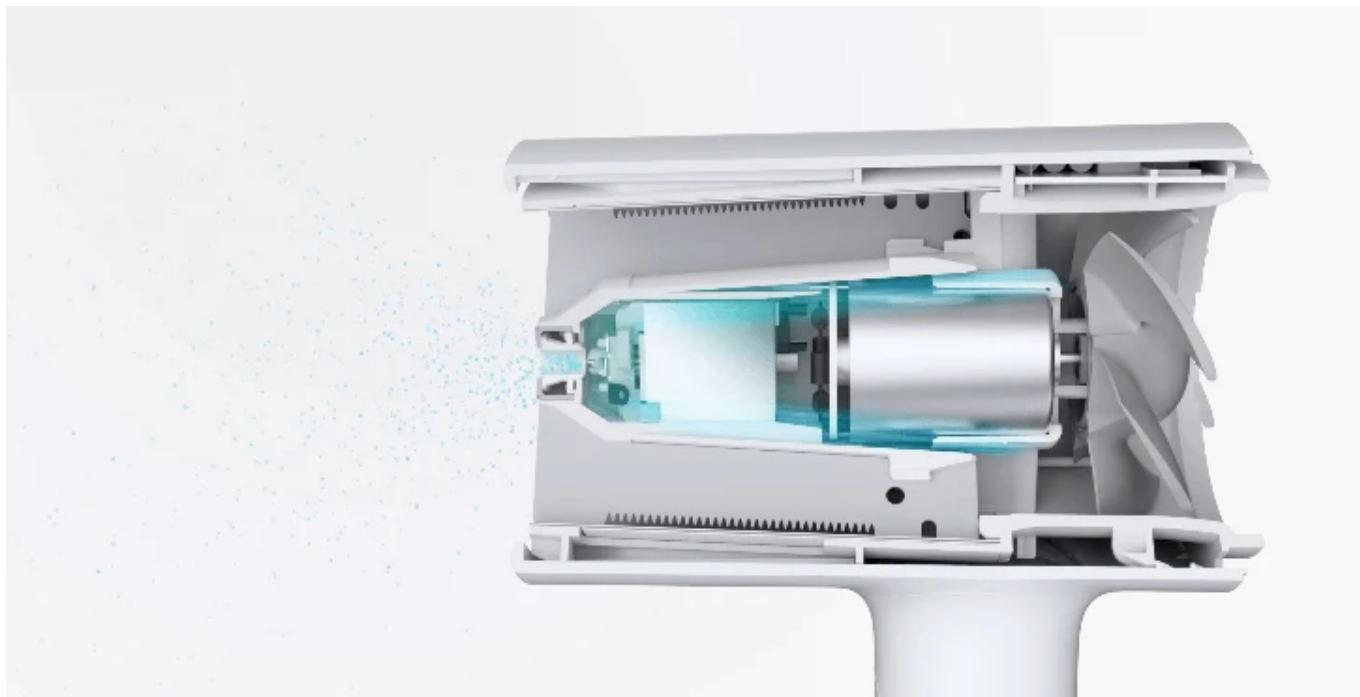

Xiaomi Mi Ionic Hair Dryer H300 hair dryer

It turns out that you can **dry and moisturize your hair at the same time**, leaving it smooth, shiny and manageable. The Mi Ionic Hair Dryer, with its touch button and built-in **ionization feature** that protects hair from damage, does the job perfectly. Compared to conventional dryers, the Mi Ionic Hair Dryer **increases hair smoothness by 71% and shine by 9.7%** (with similar wattage, voltage and identical airflow mode). Protecting against overheating and burning, moisturizing and shining clean hair, concise design and ease of use, the **Mi Ionic** Hair Dryer does it all.

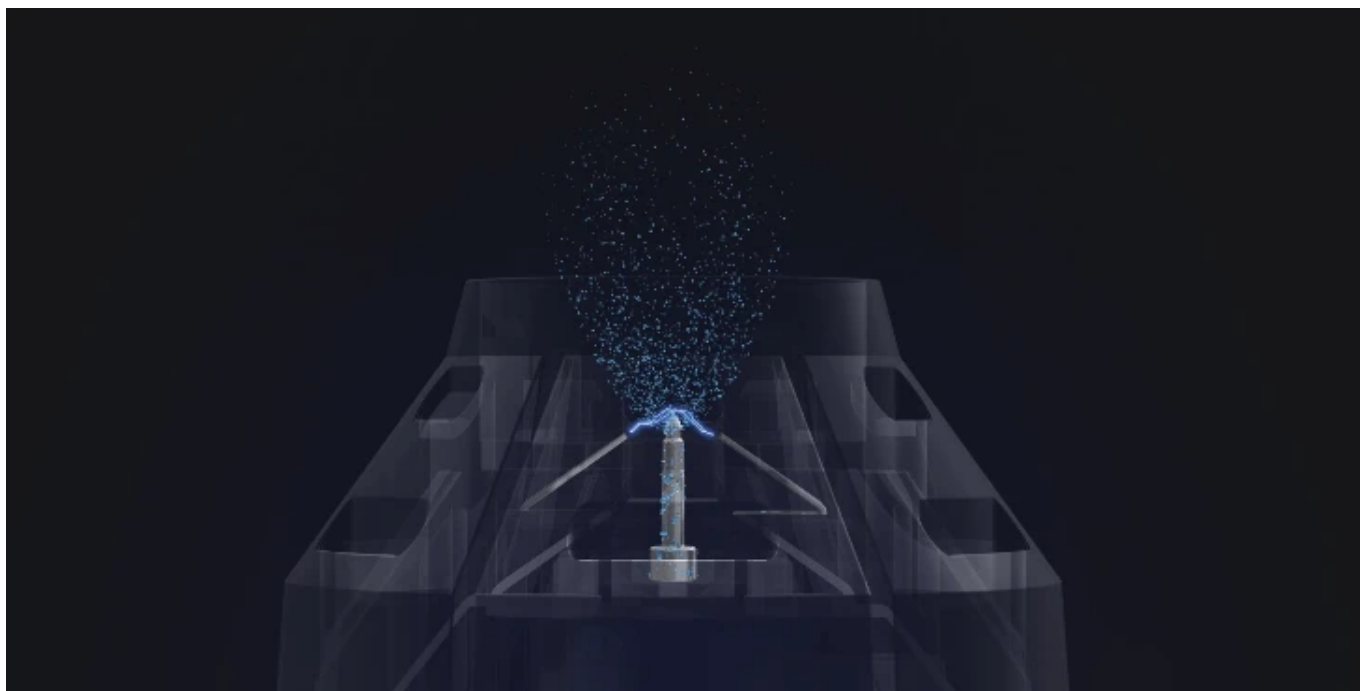

Advanced technology for healthy hair

The Mi Ionic dryer's**built-in capacitor** converts moisture particles from wet hair and scalp into negatively charged ions, which are distributed to the hair through the air stream. Completely covering the hair, from root to tip, the charged particles eliminate static and provide **effective** hair **protection**. The ions are formed in a special chamber that insulates them from the heat of the motor, allowing them to penetrate deep into your hair. Your **hair becomes more manage** able and shiny, just like in a shampoo commercial or a picture in a glossy magazine.

Temperature control

A powerful airflow(**20,000 rpm**, 1.6 m³/min) combined with **intelligent temperature control** helps you dry your hair quickly with alternating waves of hot and cold air. You won't overheat your head, which helps **keep your hair healthy, strong and shiny**.

Low noise level

Are you trying to avoid using your hair dryer at night and early in the morning so you don't wake up your family? Don't like drying your hair often because you are annoyed by the constant, annoying noise? With the Mi Ionic hair dryer, you can forget about your troubles. Each of the **six motor blades**, manufactured by Japanese company Mabuchi Motor, has undergone **a dynamic balancing process** to minimize noise. Go to work and go to bed without the slightest annoyance to others, take your hair dryer to the pool and gym - you won't bother anyone.

Double overheating protection

A thermostat and fuse are built into the dryer to **protect it from overheating**. If the temperature exceeds a safe level, the power to the dryer is automatically cut off, extending the life of the dryer. **Thanks to** the fuse, the unit will stop working when it heats up to extreme temperatures.

Lightweight, compact, easy to use

The lightweight and sleek design of the Mi Ionic hair dryer is **another great feature**. Now you can dry and style your hair effortlessly. **The 360° magnetic nozzle** protects your head from burns and easily handles even sophisticated styles with its concentrated airflow and dual-layer design. Its **light weight and compact size** make it easy to hold with one hand and take with you on trips, its special UV coating protects it from dirt and mechanical damage, and its minimalist design fits perfectly in any bathroom or bedroom.
