Full product description

Sonic toothbrush from Xiaomi

The Xiaomi Mi Smart Electric Toothbrush T500 is an intelligent sonic toothbrush that will easily help you to keep your smile healthy and beautiful. **The toothbrush has a certified DuPont head**, which allows you to fit up to 40% more bristles on the brush head than on traditional ones. **MI Electric Toothbrush T500 removes as much as 7 times more plaque than a manual toothbrush**, so healthier and whiter teeth are already noticeable after 14 days of cleaning.

Vibrations up to 31 000 rpm

The Xiaomi Mi Smart T500 toothbrush uses a second-generation electric motor that offers up to 31,000 revolutions per minute, while ensuring extremely thorough tooth cleaning. The device monitors the pressure level of the toothbrush head to the plaque, if the user presses the toothbrush too hard, the accessory automatically reduces the vibration force to prevent damage to the gums.

Three modes of tooth-brushing

- **Variable mode:** You can adjust the vibration intensity to your own needs.
- **Standard mode:** High-frequency vibrations for quick removal of accumulated airborne particles. best suited for everyday work.
- **Gentle mode:** With massage effect and slower action for extremely sensitive teeth. Ideal for use in the first week during the adaptation period.

Accompanying mobile application

The Xiaomi toothbrush uses a mobile app that can be accessed on both Android and iOS smartphones. The app allows you to adjust the brushing modes to your needs, as well as help with comprehensive oral care and teach you how to brush your teeth properly.
