Full product description

Xiaomi Mi Smart Wireless Programmable Switch

The **Xiaomi Mi Smart Wireless Switch** button allows you to quickly and easily **establish control** over multiple home devices. The five-inch button can be **easily attached** to the desired location with double-sided adhesive tape, and when paired with the Xiaomi Gateway, it is configured to the desired action scenario in the app. Powered by a CR2032 battery, which allows you to be independent from the mains. At the same time, the button can run **on a single battery for up to two years**.

Wide range of applications

The button can be **used to control** the lights, alarm, humidifier, radio and turn on the melody on the gate. And if you set up **wireless outlet control** with the button, the wireless switch can be responsible for any devices.
