Full product description

Wireless Temperature and humidity monitor

Xiaomi Mi Temperature and Humidity Monitor 2 is a **temperature sensor equipped with an LCD screen**, the device allows you to connect to your phone and other smart devices from Xiaomi. Accurate measurement of room temperature and humidity can be important for people who like to feel comfortable.

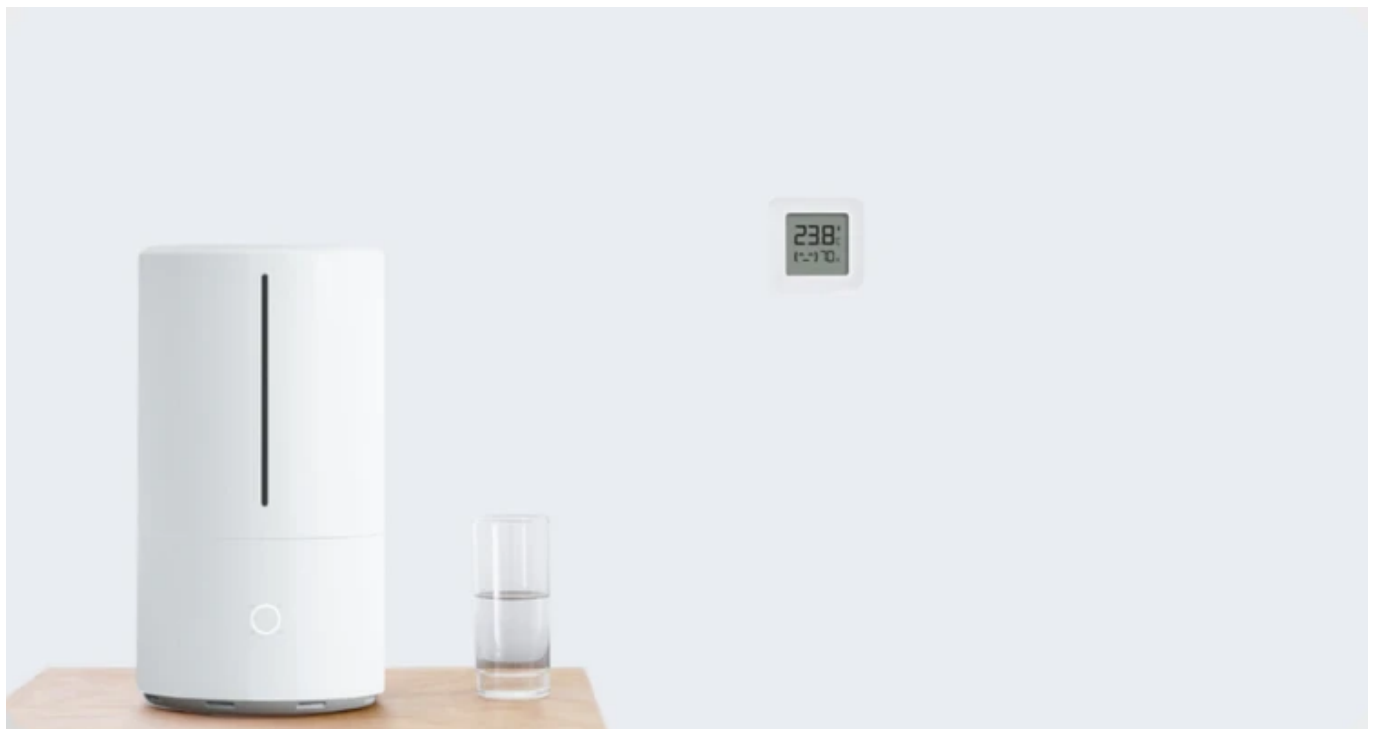

Detects air changes

The **temperature and humidity** of the air are closely related to our health. All sudden changes can cause dry mouth, cold, fever, allergies and general discomfort. **The Xiaomi Mi 2** temperature and humidity meter warns us of the smallest change in temperature and humidity. In addition, you will be able to connect the meter with other intelligent devices, so you can regulate temperature and humidity throughout the house, ensuring great comfort.

Connects to intelligent devices

With the Mi Bluetooth gateway you can connect **Mi Temperature and Humidity Monitor 2** to other smart devices, which allows you to conveniently optimize the temperature and humidity in your home, making you feel comfortable and comfortable in all circumstances.

Notifications in child mode

Designed with the health of our little ones in mind. **In baby mode, Mi Home** warns you that the temperature and humidity values have exceeded your child's comfort zone.

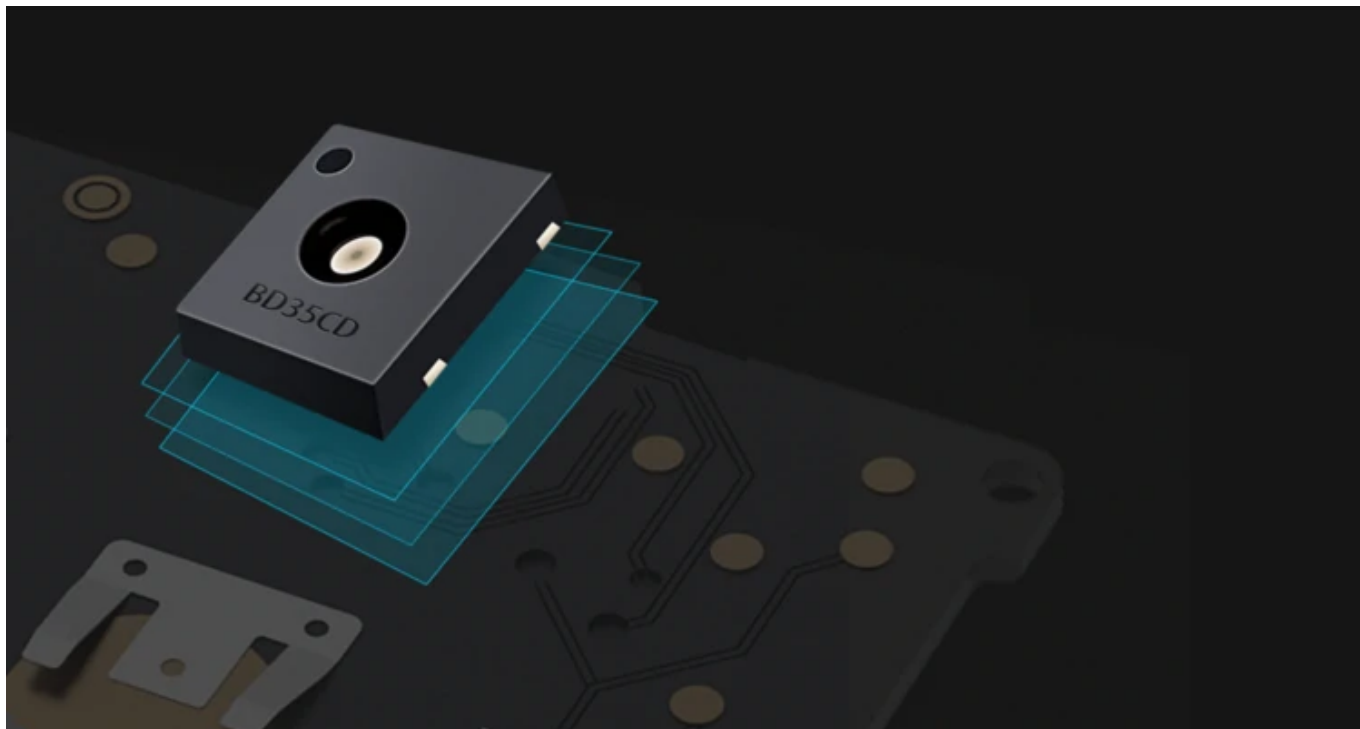

Minimum energy consumption

The **Mi 2 temperature and humidity monitor** uses a display with **very low power consumption**. One button battery provides enough energy for one year, which eliminates the problem of having to constantly replace batteries.

High-precision sensor

Mi Temperature and Humidity Monitor 2 has a built-in **very precise** digital temperature and humidity sensor from Swiss manufacturer **Sensirion**, which is able to quickly and accurately detect temperature changes from 0.1 ° C and humidity fluctuations from 1% RH. The meter will also notify you immediately of any changes.

Lightweight and compact

With its dimensions of 43 × 43 × 12.5 mm **Mi Temperature and Humidity Monitor 2** is extremely compact yet sophisticated.

Understandable symbols

The device uses **intelligent smileys**, thanks to which you can easily understand the current temperature and humidity values and thus **guarantee your family maximum comfort**.
