Full product description

Xiaomi Temperature and Humidity Monitor Clock Sensor

The **Xiaomi Temperature and Humidity Monitor Clock sensor** allows you to continuously monitor changes in temperature and humidity in the room. Thanks to its **precision integrated circuits and sensors**, it ensures the accuracy of the displayed data.

Key Features of Xiaomi Temperature and Humidity Monitor Clock

- With comfort indicators, even small changes in temperature and humidity can be monitored
- Continuous monitoring of temperature and humidity changes in the room
- Year-round care and support for your family's health

High level of ergonomics

Xiaomi Temperature and Humidity Monitor Clock is equipped with an **e-ink display** with wide viewing angles. The clever design of the sensor allows for its convenient placement.

Clock with multiple time zones

The sensor has a clock with multiple time zones with options for displaying 12- and 24-hour time.
