Full product description

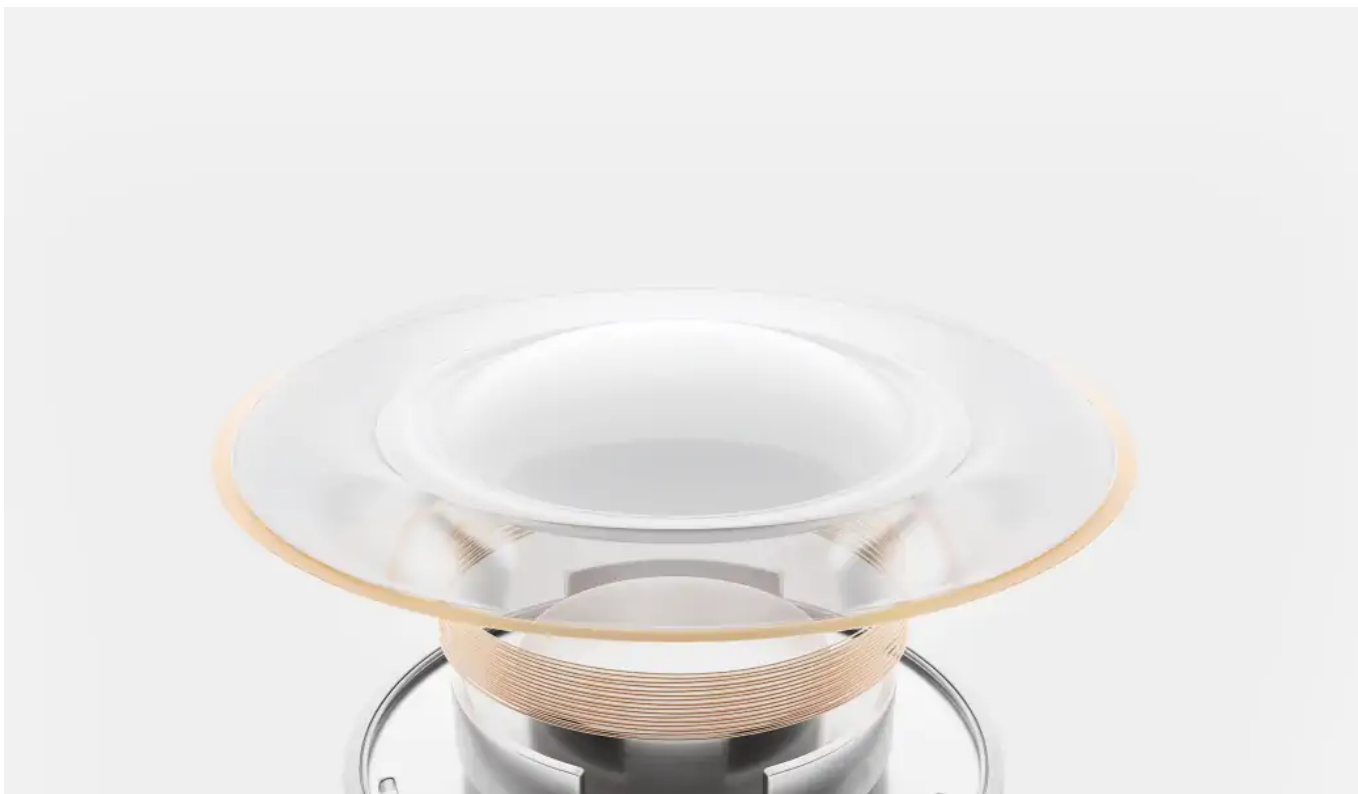

Xiaomi Mi True Wireless Earphones 2 Pro

Mi True Wireless Earphones 2 Pro is the best choice for music lovers. With **an active noise cancellation** of 35dB, you will only hear your favorite music and not any extraneous noises. This is made possible by two microphones. One picks up outside noise and the other filters it out before sending it to your ear. This suppresses even loud sounds such as shouting and rumbling.

Ultra-high sound quality

The use of a 12mm **dynamic driver** and **LCP diaphragm** ensures the most detailed reproduction of high, mid and low frequencies. With **Mi True Wireless Earphones 2 Pro**, you'll even be able to capture the sound of your favorite artist's breathing. The studio-level sound has been tuned in **Xiaomi's lab**.

Unhindered conversations

A special "**transparency**" mode and ergonomically shaped ear cushions allow you to talk **without taking off the headphones**. This is made possible by the manufacturer's innovative ear-channel microphone built into each device. The sound is transmitted as accurately as possible into the ear canal, thus increasing the **clarity of the caller's voice** without creating unnecessary pressure that causes discomfort.

30 hours on a single charge

The introduction of a next-generation **power-saving chip** extends **battery life to 6 hours** on a single charge and up to **30 hours on a single charge** in the case. Simply insert the headphones into the case for 10 minutes for up to **90 minutes of** audio playback. The wireless charging case is compatible with many accessories that support **Qi technology**. The battery charge level is controlled directly on the case. **A full charge takes up to 1 hour**. A USB Type-C cable is included for charging.

Instantaneous pairing

To launch the device, simply open the case near your smartphone and tap on the MIUI window. After removing the headphones, the gadget will quickly recognize them and perform automatic pairing. Wireless connectivity is via **Bluetooth 5.0**, with a signal range of 10 meters without obstructions.

Click to switch mode

On the back of the **Mi True Wireless Earphones 2 Pro** is a ceramic coating that responds perfectly to touch. With light clicks, you can select the desired mode, such as pausing a song, answering a call, switching modes or activating the voice assistant. **The built-in infrared sensors** detect the slightest manipulation and respond quickly. When the handset is removed from your ear, playback is paused and vice versa.

Headphones for everyone

The smooth lines and **premium finish** give the products a sophisticated visual aesthetic. **Xiaomi headphones** are pleasant to hold and offer a perfect fit, with no pressure on the earlobes. The manufacturer has ensured comfort for every user, regardless of gender and age. Therefore, **4 sizes of detachable ear cushions** are included. This ensures a comfortable fit and effective noise cancellation due to the tight fit. Experience a new level of sound with your favorite tunes.
