Full product description

Xiaomi Mijia Electric Scooter Pro 2

The biggest advantage of **Xiaomi Mi Electric Scooter Pro 2** is its extended range of up to 45km, while the maximum speed can reach 25 km/h. The scooter can easily climb 20% incline hills, making it ideal for everyday commuting. The Scooter Pro 2 also has a **built-in LCD** screen, which allows you to view and control a wide range of parameters, ensuring a comfortable and trouble-free ride. The display helps users to check their speed in real time, select a driving mode, connect to Bluetooth and even monitor the status of the headlights at a glance.

Energy recovery system

The SCOOTER PRO 2 is equipped with a powerful 300W motor with a **12800 mAh battery**, which offers a 45km range on a single charge. It only takes 5 hours to charge it from 0% to full. This very light vehicle is made of aluminium alloy and weighs 14.2 kg and reaches a maximum speed of 25 km/h.

Multifunctional display

Simply press the power button twice to switch between modes and easily adjust the speed to your environment. The power and speed display shows the remaining power and current speed in real time. **The electric scooter has 3 speed modes**

- Pedestrian mode (0-5 km/h)
- Standard mode (0-20km/h)
- Sports mode (0-25 km/h)

Security

The electric scooter has been designed with safety in mind **Mi Electric Scooter Pro 2** has front, rear and side reflectors, as well as an improved 2W headlamp that illuminates up to 10 meters forward, significantly improving visibility. First-time riders will receive reminders and safety tips when connected via a mobile device, providing an extra layer of safety.
