Manufacturer: XIAOMI

Referention number: DNXGHJLRGRMLM

Information:

Xiaomi Oscillation Electric Toothbrush is an electric sonic toothbrush for daily, precise oral hygiene. It combines rapid vibrations with a doubled oscillation angle, enabling it to reach hard-to-access areas more effectively, especially molars and interdental spaces. It offers 3 operating modes: gentle, standard and intensive, and the memory function remembers the preferred settings. The 4-zone light indicator helps detect missed areas, while the soft, shock-absorbing head increases brushing comfort. The toothbrush has a battery life of up to 180 days, USB-C charging, an IPX8 waterproof rating and a compact design that is ideal for travel as well.

Product features

Power source	Battery
Input voltage	5 V
LED indicators	Yes
Cartridge type	Built-in battery
Battery recharge time	6 h
Battery voltage	3.7 V
Bracket colour	White
Power consumption (typical)	2.5 W
USB cable included	Yes
IFU / User manual	Yes
USB cables quantity	1
Indication light	Yes
International Protection (IP) code	IPX8
Paint brush shape	Oval
Mobile app support	No

Product colour	White
Teeth brushing modes	Daily care
Number of teeth brushing modes	3
Toothbrush type	Oscillating toothbrush
Designation	Adult

Full product description

Precise Care

The Xiaomi Oscillation Electric Toothbrush is a sonic electric toothbrush designed for daily oral hygiene. The device combines rapid vibrational movements with an extended range of motion for the brush head, allowing it to reach difficult areas and dead zones of molars. The equipment includes solutions that facilitate regular and comfortable brushing, and its compact design makes the toothbrush convenient for home and travel.

Key Benefits

- **Sonic Vibrational Motor** - increases cleaning effectiveness while reducing perceived pressure.
- **Twice the Oscillation Angle** - makes it easier to reach gaps and molar surfaces.
- **180 Days of Battery Life** - long usage time on a single charge thanks to the Type C interface.
- **Shock-Absorbing Brush Head** - soft design ensures comfort and hygiene during brushing.
- **4-Zone Light Indicator** - helps monitor which areas have been missed.
- **IPX8 Waterproof Rating** - safe to use in humid conditions.

Cleaning Accuracy

The toothbrush utilises **Twice the Oscillation Angle** and the principles of **Bass Brushing Technique**, which aids in the precise removal of plaque from tooth surfaces and interdental spaces. The oscillatory motion combined with vibrations contributes to better access to dead zones, particularly of molars. As a result, daily brushing becomes more effective and precise.

Smart Reminders

The built-in **4-Zone Light Indicator** informs about the cleaning status: a steady white light indicates a properly cleaned area, while a pulsing orange light reminds of missed spots. After two minutes, the indicator summarises the cleaning, helping to maintain even brushing of all areas of the mouth. The system facilitates quicker and more accurate cleaning, especially when the user focuses on effective movements.

Long Battery Life

The device offers significant working time with **180 days of battery life** in gentle mode and about 100 days in standard mode with typical use. The **Type C interface** port facilitates quick charging, making the toothbrush practical for travel. Thanks to this efficiency, charging needs to be planned less frequently, simplifying daily care.

Brush Head

The brush head is designed for comfort: it features **bristles that do not contain copper** and a rubber back that absorbs shocks, helping to reduce impacts on teeth and improving hygiene during use. The **dual-column spiral design** and spiral bristle arrangement help to clean surfaces more thoroughly and care for gums. The bristle colours fade, reminding users to replace the brush head approximately every three

months.

Modes and Convenience

The toothbrush offers **3 modes** tailored to different needs: gentle cleaning for sensitive gums, standard mode for daily hygiene, and intense, vibrational cleaning for hard-to-reach areas. The memory function saves user preferences, and the three-second gradual start helps avoid toothpaste splatter. The availability of two colour versions makes it easier to match the device's appearance to the user's style.

Usage and Handling

The toothbrush meets the **IPX8** standard, allowing it to be safely left by the sink and used under running water. Lightweight handling, clear indicators, and a universal charging port make it easy to use daily and while travelling. Regular replacement of brush heads and using the recommended brushing modes helps maintain a fresher and healthier mouth.

Technical Specification

Parameter	Details
Name	Xiaomi Oscillation Electric Toothbrush
Model	MES609
Rated Input Power Values	5 V □ 1 A
Rated Voltage	3.7 V □
Working Power	2.5 W
Charging Time	Approx. 6 hours
IP Protection Rating	IPX8
Package Contents	Toothbrush handle x1, Brush head x1, Charging cable x1, User manual x1, Quick start guide x1
