Price: **199.00 zł** gross / 161.79 zł net

Manufacturer: XIAOMI

Referention number: DNXGHJLRIMMNK

Information:

Xiaomi Oscillation Electric Toothbrush Pro is an intelligent electric toothbrush for daily, thorough oral hygiene. Thanks to automatically adjusted oscillation and a 6-axis sensor, it removes plaque more effectively from different tooth surfaces, while the colour display shows brushing progress, reminders and brushing history in real time. The set includes two interchangeable heads: a standard one for deeper cleaning and a gentle one for sensitive teeth and gums. The toothbrush has an excessive pressure alarm that protects the gums, offers 4 operating modes, is waterproof to IPX8, and lasts up to 180 days on a single charge.

Product features

Power source	Battery
Height	251 mm
Input voltage	5 V
LED indicators	Yes
Cartridge type	Built-in battery
Battery recharge time	6 h
Width	29.5 mm
Depth	27.8 mm
Battery voltage	3.7 V
Bracket colour	White
Power consumption (typical)	2.5 W
USB cable included	Yes
IFU / User manual	Yes
USB cables quantity	1
Indication light	Yes
International Protection (IP) code	IPX8
Paint brush shape	Oval
Mobile app support	No
Product colour	White

Teeth brushing modes	Daily care
Number of teeth brushing modes	3
Display included	Yes
Toothbrush type	Oscillating toothbrush
Designation	Adult

Full product description

Thorough Teeth Cleaning

Xiaomi Oscillation Electric Toothbrush Pro is an electric toothbrush designed for daily oral hygiene and helps remove plaque and improve the appearance of tooth surfaces. The device combines **intelligent oscillation**, surface analysis and a clear, colour display, making everyday toothbrushing more mindful and effective. The toothbrush offers different operating modes, cushioned copper-free brush heads and long battery life, contributing to convenient use at home and while travelling.

Key Benefits

- **Intelligent oscillation** - automatic adjustment of the angle and vibration level to the tooth surface.
- **6-axis sensor** - recognises the brushing area and shows the brushing range in real time.
- **Cushioned copper-free brush heads** - the rubber coating softens impacts against teeth, and colour-fading bristles remind you when to replace them.
- **Colour display** - quick overview of progress, reminders and the last brushing session.
- **Long battery life** - up to **180 days** in gentle mode and up to **100 days** in standard mode with typical use.
- **Gum protection** - intelligent excessive pressure alert and automatic vibration reduction.

Intelligent Oscillation

The toothbrush uses Bass brushing technique and a system that analyses the position of the handle and the brushing angle. As a result, the **oscillation angle** and vibration level are automatically adjusted to different tooth surfaces — from the chewing surface to the front surfaces of the teeth — which helps deliver more targeted cleaning. In deep oscillation mode, the angle can increase to **around 20°**, contributing to more effective plaque removal from hard-to-reach areas.

Brush Heads and Hygiene

The toothbrush offers two interchangeable brush heads: a **standard** one with a double spiral column for deeper cleaning and a **gentle** one with a round pattern for sensitive teeth and gums. The bristles are mounted without the use of copper, which improves corrosion resistance and the hygiene of the head. The rubber cushioning coating reduces the risk of impacts against teeth, and the fading bristles act as a practical reminder to replace the head roughly every three months.

Colour Display and Monitoring

The large, intelligent **colour display** shows a tooth chart in real time, reminders in six zones and the history of the last brushing session. The “lift to display” function lets you quickly view the record of the last clean, and the built-in algorithm analyses brushing behaviour, helping identify weaker points and plan daily care better.

Long Battery Life and Power

The toothbrush offers comfortable long-term use thanks to its **rechargeable battery** and **USB-C** charging. With standard use, you can achieve up to **180 days** of operation in gentle mode or around **100 days** in standard mode after a full charge, meaning you need to think about charging less often when travelling.

Operating Modes and Protection

There are four modes to choose from: **gentle**, **standard**, **deep oscillation** and **intelligent oscillation**, allowing the brushing to be tailored to individual needs. The built-in **excessive pressure alarm** displays the pressure force and reduces vibrations when pressure is too high, protecting the gums. In addition, the housing has an **IPX8** waterproof rating, and features such as a three-second start-up and travel lock make everyday use easier.

Specification

Parameter	Details
Product name	Xiaomi Oscillation Electric Toothbrush Pro
Product model	MES610
Rated voltage	3.7 V
Operating power	2.5 W
Rated power input values	5 V □ 1 A
Charging time	Approx. 6 hours
Water resistance	IPX8
Product dimensions	27.8 × 29.5 × 251 mm
Package contents	Toothbrush handle x1, Brush head x2, Charging cable x1, Power adapter x1, User manual x1, Quick start guide x1
