Information:

Xiaomi Oscillation Electric Toothbrush Pro is an electric toothbrush for daily, thorough oral hygiene, helping to remove plaque and improve the appearance of teeth. Intelligent oscillation automatically adjusts the angle and vibration strength to the tooth surface, while the 6-axis sensor continuously analyses the brushing area. The colour display shows progress, reminders and brushing history, making it easier to keep better control over oral care. The toothbrush has two replaceable copper-free heads, including one for sensitive teeth, as well as an excessive pressure alert to protect the gums. Thanks to the USB-C rechargeable battery, it lasts for up to 180 days on a single charge, while IPX8 water resistance and the travel lock increase ease of use.

Product features

Power source	Battery
Height	251 mm
Input voltage	5 V
LED indicators	Yes
Cartridge type	Built-in battery
Battery recharge time	6 h
Width	29.5 mm
Depth	27.8 mm
Battery voltage	3.7 V
Bracket colour	Purple
Power consumption (typical)	2.5 W
USB cable included	Yes
IFU / User manual	Yes
USB cables quantity	1

Indication light	Yes
International Protection (IP) code	IPX8
Paint brush shape	Oval
Mobile app support	No
Product colour	Violet
Teeth brushing modes	Daily care
Number of teeth brushing modes	3
Display included	Yes
Toothbrush type	Oscillating toothbrush
Designation	Adult

Full product description

Precise Tooth Cleaning

Xiaomi Oscillation Electric Toothbrush Pro is an electric toothbrush designed for daily oral hygiene and helps eliminate plaque and improve the appearance of tooth surfaces. The device combines **intelligent oscillation**, surface analysis, and a clear, colourful display, making daily tooth brushing more conscious and effective. The toothbrush offers various modes of operation, cushioning heads without copper, and a long battery life, contributing to user convenience at home and while travelling.

Key Advantages

- **Intelligent Oscillation** - automatic adjustment of the angle and level of vibrations to the tooth surface.
- **6-Axis Sensor** - recognises the brushing area and shows the cleaning range in real-time.
- **Cushioning Heads without Copper** - the rubber coating softens impacts against teeth, and the fading bristles remind you to replace them.
- **Colourful Display** - quick overview of progress, reminders, and record of the last brushing.
- **Long Battery Life** - up to **180 days** in gentle mode and up to **100 days** in standard mode with typical use.

- **Gum Protection** - intelligent excessive pressure alarm and automatic reduction of vibrations.

Intelligent Oscillations

The toothbrush uses the Bass brushing technique and a system that analyses the position of the handle and the brushing angle. As a result, the **oscillation angle** and vibration level are automatically adjusted to different tooth surfaces — from chewing surfaces to the front walls of teeth — which helps in more targeted cleaning. In deep oscillation mode, the angle can increase to **approximately 20°**, contributing to more effective plaque removal from hard-to-reach areas.

Heads and Hygiene

The toothbrush offers two interchangeable heads: a **standard** one with a double spiral column for deeper cleaning and a **gentle** one with a round pattern for sensitive teeth and gums. The bristles are mounted without copper, which affects corrosion resistance and better hygiene of the tip. The cushioning rubber coating reduces the risk of impacts against teeth, and the fading bristles serve as a practical reminder to replace them approximately every three months.

Colourful Display and Monitoring

The large, intelligent **colourful display** shows a real-time tooth chart, reminders in six zones, and the history of the last brushing. The "lift to display" function allows you to quickly see the record of the last cleaning, and the built-in algorithm analyses behaviour during brushing, helping to identify weaker points and better plan daily care.

Long Battery Life and Power Supply

The toothbrush offers the comfort of long usage thanks to the **battery** and **USB-C** charging. With standard use, it can achieve up to **180 days** of operation in gentle mode or around **100 days** in standard mode after a full charge, making it less necessary to remember to charge during trips.

Modes of Operation and Protection

There are four modes to choose from: **gentle**, **standard**, **deep oscillation**, and **intelligent oscillation**, allowing you to tailor brushing to individual needs. The built-in **excessive pressure alarm** displays the pressure force and reduces vibrations when too much pressure is applied, protecting the gums. Additionally, the casing has an **IPX8** waterproof rating, and features such as a three-second start and travel lock facilitate daily use.

Specification

Parameter	Details
Product Name	Xiaomi Oscillation Electric Toothbrush Pro
Product Model	MES610
Rated Voltage	3.7 V
Working Power	2.5 W
Rated Input Power Values	5 V □ 1 A
Charging Time	Approx. 6 hours
Water Resistance	IPX8
Product Dimensions	27.8 × 29.5 × 251 mm
Package Contents	Toothbrush handle x1, Brush head x2, Charging cable x1, Power adapter x1, User manual x1, Quick start guide x1
