Price: **199.00 zł** gross / 161.79 zł net

Manufacturer: XIAOMI

Referention number: DNXGJONRGRMNGQ

Information:

Xiaomi Outdoor Camera CW100 Dual is an outdoor surveillance camera with two lenses, allowing you to monitor two areas at the same time and reduce blind spots. It offers 2K HD image quality with a 3 MP sensor, WDR technology and intelligent full-colour night vision with a range of up to 10 m, ensuring a clear view even at night and in difficult lighting conditions. AI detects people, vehicles and movement within the zone, triggers an alarm and sends notifications. The camera has two-way voice communication, IP66 resistance, operating temperatures from -30°C to 60°C, as well as support for Wi-Fi 6, Ethernet, microSD and NAS.

Product features

Connectivity technology	Wireless
Maximum resolution	2304 pixels
Cables included	AC
Audio system	2-way
Night mode	Yes
Mounting template	Yes
DC output voltage	12
DC output current	1 A
Number of cameras	1
Number of lenses	2
IFU / User manual	Yes
Built-in light	Yes
Operating temperature (T-T)	-30 - 60 °C
LED type	IR/White
Minimum aperture number	1.6

Number of illumination LEDs	4
Pan range	0 °
Screws included	Yes
Card reader integrated	Yes
Built-in microphone	Yes
Total megapixels	3 MP
Video formats supported	H.265
Frequency range	2400 MHz
Maximum memory card size	256 GB
Compatible memory cards	MicroSD (TransFlash)
International Protection (IP) code	IP66
Day/night mode	Yes
Wi-Fi standards	802.11b
Wi-Fi	Yes
Bluetooth	Yes
Ethernet LAN	No
Mobile operating systems supported	Android 10
Built-in HDD	No
Power source type	DC
Night vision distance	10 m
Product colour	White
Mounting hardware type	Ceiling/Wall
Type	IP security camera
Designation	Outdoor

Full product description

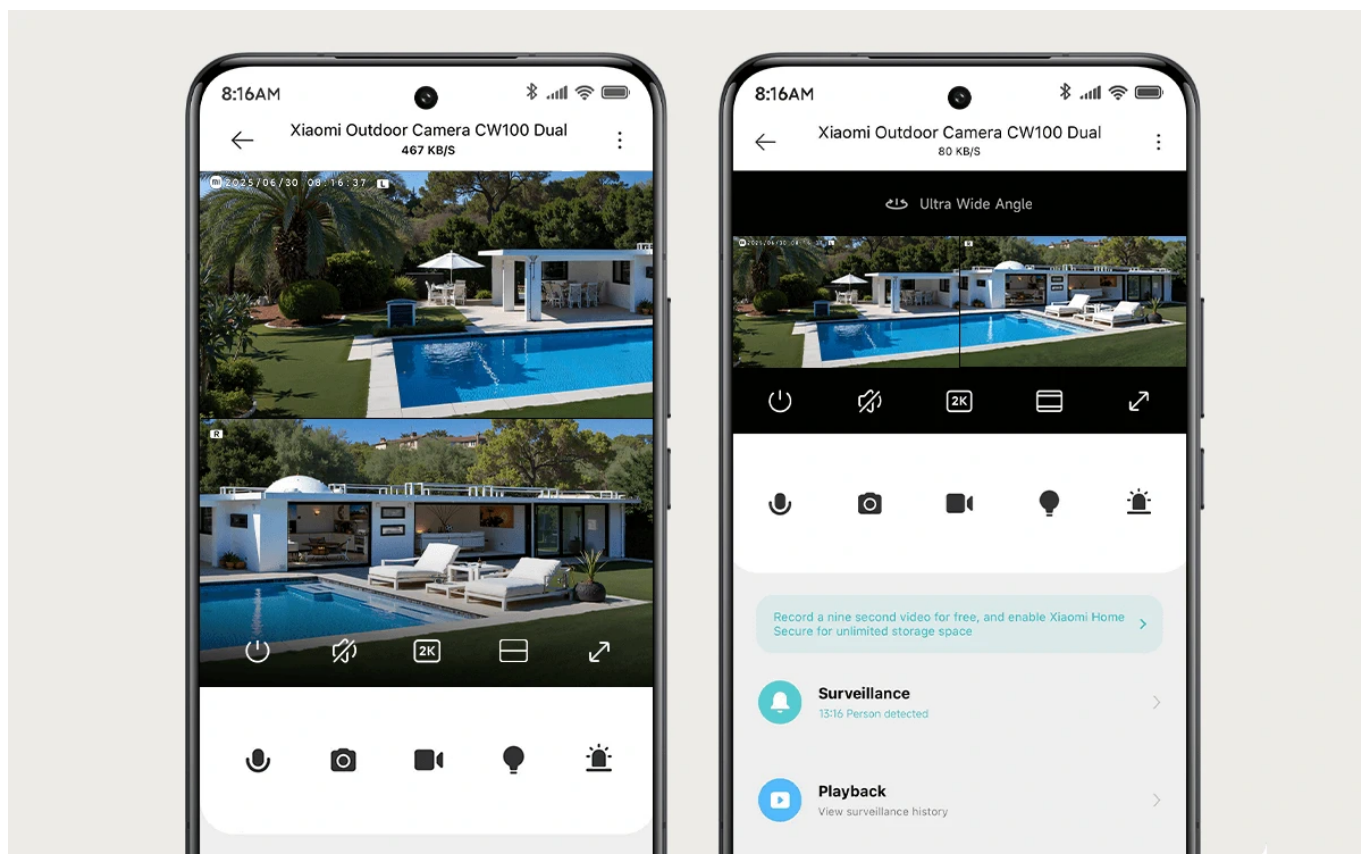

Broader monitoring of the home and property

Xiaomi Outdoor Camera CW100 Dual is an outdoor surveillance camera with **two lenses**, designed to monitor two zones at the same time. This solution reduces blind spots and increases control over the surroundings of the home, garden, driveway or business premises. One unit replaces two separate observation points.

Key benefits

- **Two lenses** – a wider field of view and monitoring of two areas without installing an additional device.
- **Professional 3 MP sensor** – clearer image with more detail in everyday monitoring.
- **WDR** – better image readability in scenes with strong light and shadow.
- **Intelligent full-colour night vision** – better visibility at night and more detail after dark.
- **AI person and vehicle detection** – faster alerts about movement in important zones.
- **IP66** – resistance to dust and water in outdoor conditions.

Two views without blind spots

The design with one device and two lenses organises monitoring where a standard camera covers too small a section of space. The camera supports a wide perspective and two simultaneous views, so you can more conveniently monitor the garden, garage, gate or area around the building. It is a practical solution for places where a fuller picture of the situation matters.

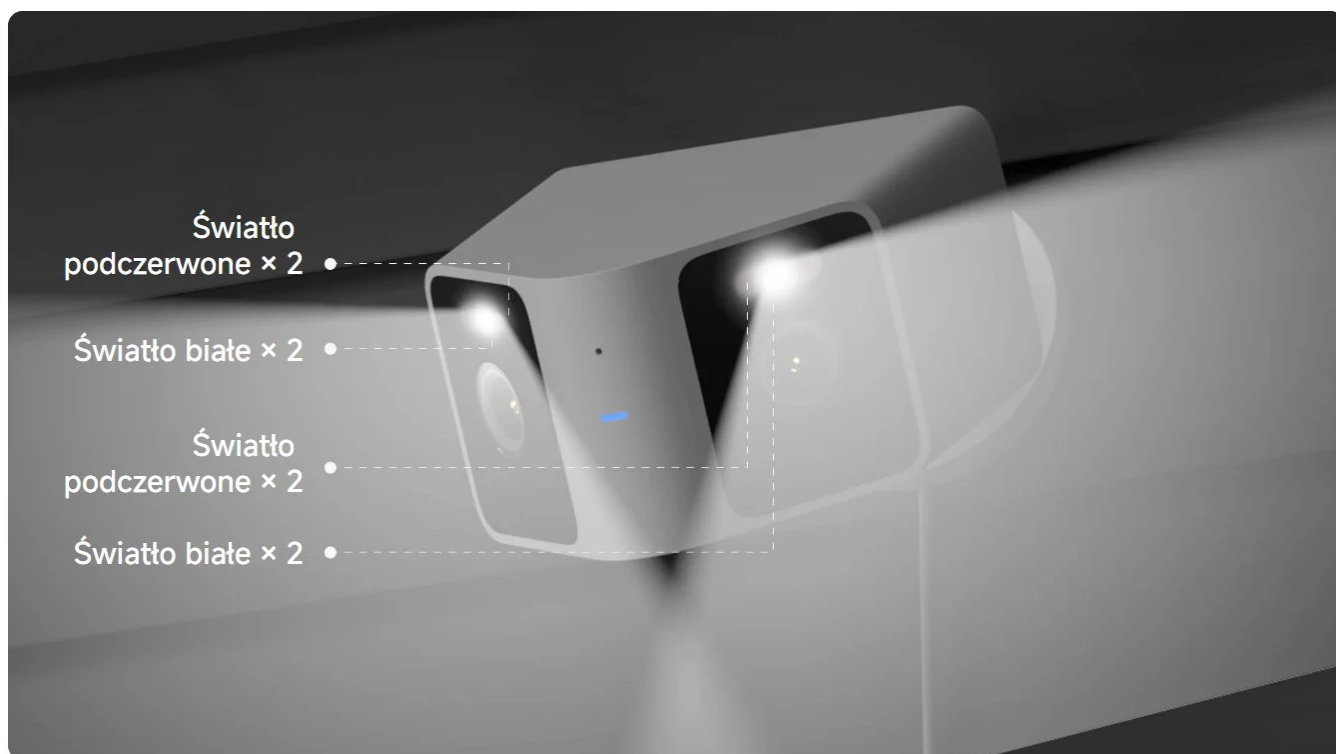

Clear image by day

The model offers **2K HD** image quality and a **3 MP** sensor, so recordings remain clear even when zoomed in. **WDR** technology improves visibility in difficult lighting, and the **f/1.6** aperture reduces light loss. In practice, you get more detail in recordings from the driveway, gate or car park.

Colour image at night

Intelligent full-colour night vision starts recording in colour when motion is detected, even after dark. The camera combines infrared and white light to keep the scene more legible and capture important event details. Night vision reaches up to **10 metres**, increasing control over the surroundings in the dark.

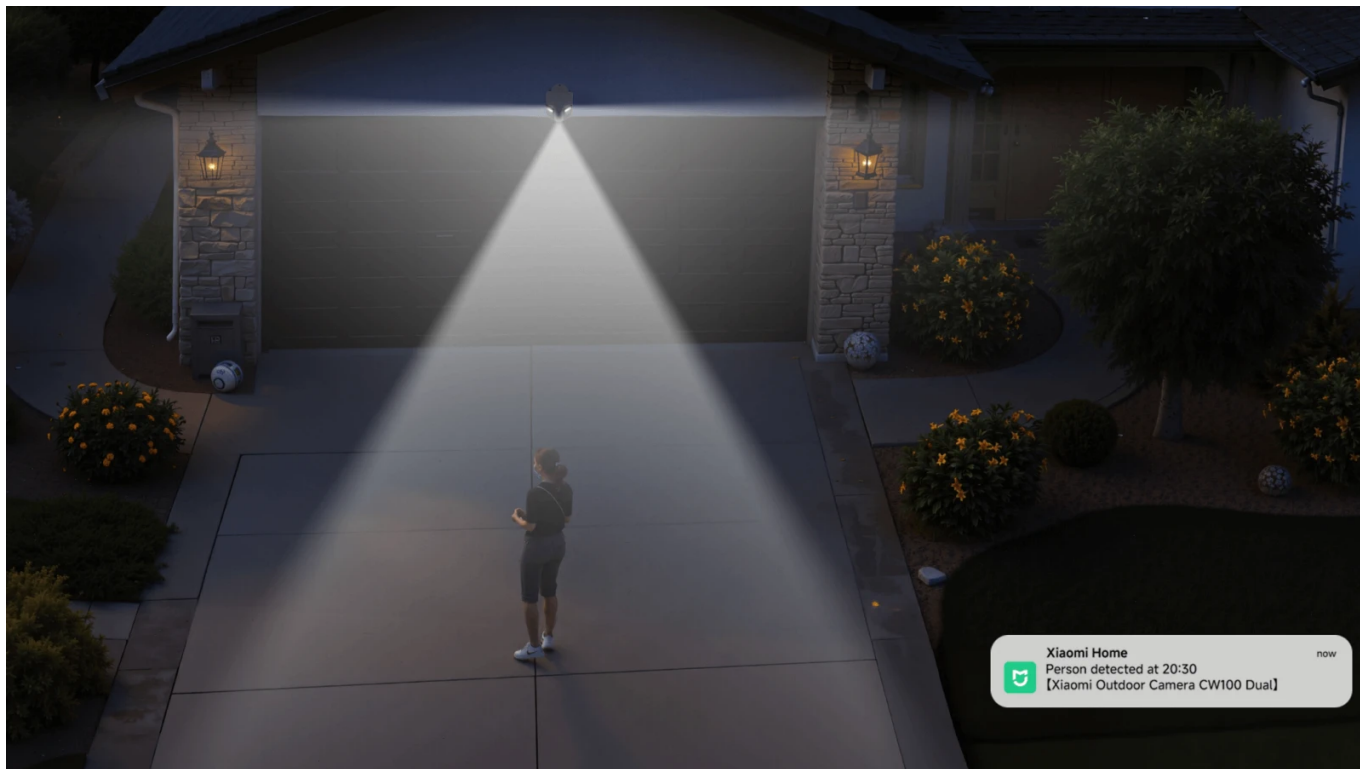

Intelligent event detection

The camera supports AI detection, including recognition of people, vehicles and movement in a designated zone. When someone approaches a car or appears in the monitored area, the system starts recording and sends a notification. This allows you to react more quickly to situations at the gate, driveway or on company premises.

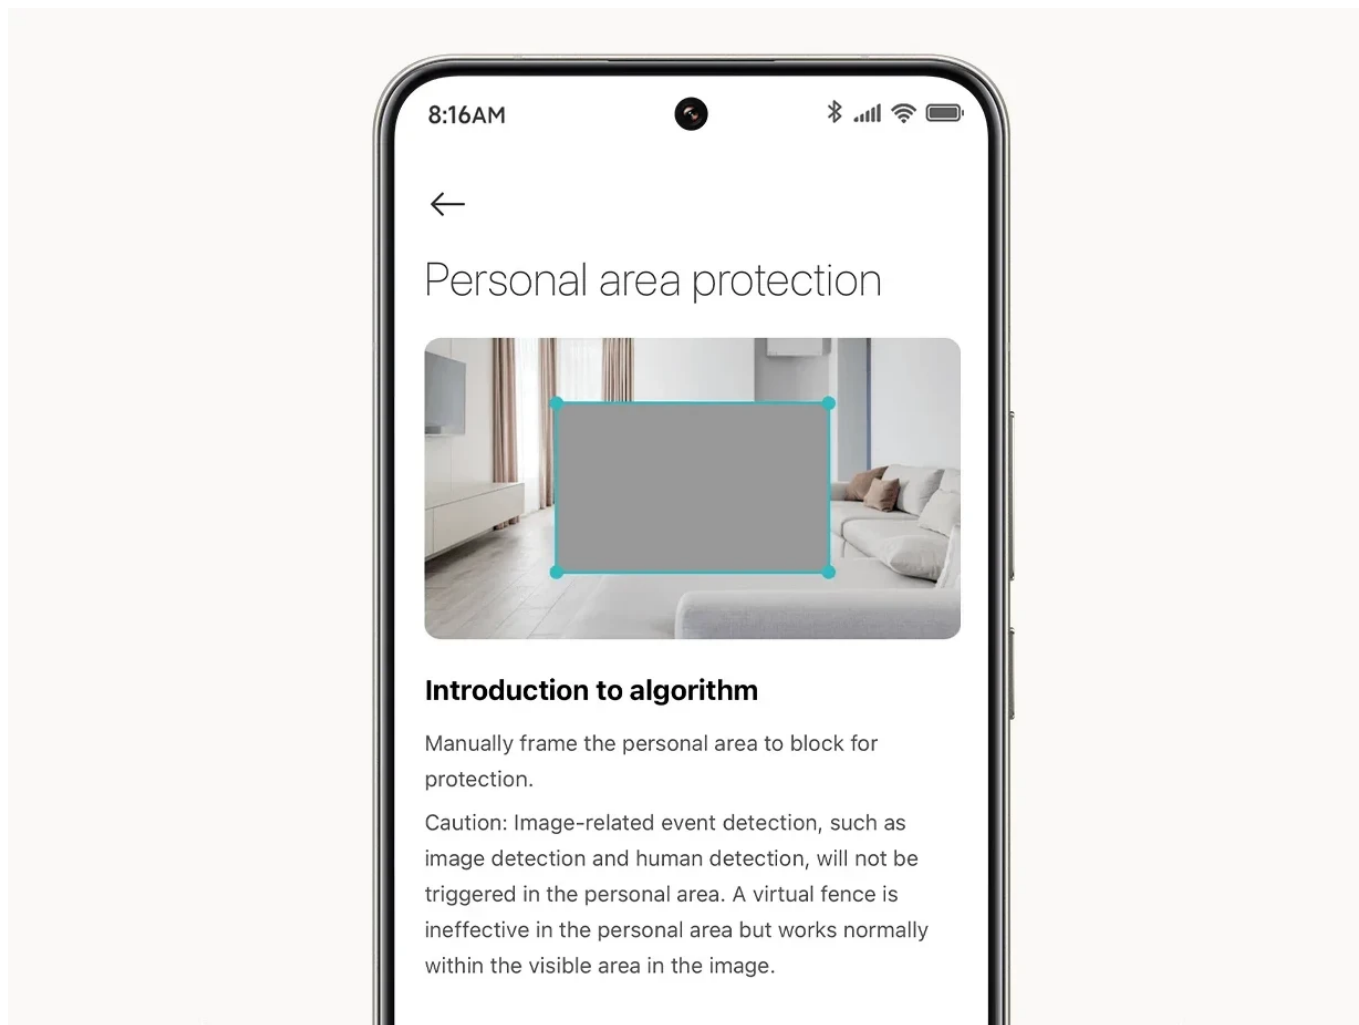

Alarm and remote conversation

When an intrusion is detected, the camera activates a **sound and visual alarm**, increasing the chance of deterring the intruder before they enter the property. You also receive remote notifications on your phone, and the **two-way voice communication** function lets you speak with guests, couriers or household members. It is a convenient solution when you are not on site.

Data and privacy protection

The camera uses an **MJA1 security chipset** with a unique key and certificate, and data transmission passes through a hardware security layer. In addition, in the app you can specify masking areas to disable recording of selected parts of the frame. This solution increases control over private zones around the home.

Resistance to outdoor conditions

The housing meets the **IP66** standard, so the camera operates in harsher outdoor conditions, including exposure to dust and rain. The device remains operational at temperatures from **-30°C to 60°C**, making it suitable for year-round monitoring. In addition, the power cable is **3 metres** long, which makes installation in the chosen location easier.

Connectivity and easy installation

The model supports **Wi-Fi 6 2.4 GHz**, a **100 Mb/s Ethernet** port and one-touch Bluetooth pairing. This setup shortens configuration time and

stabilises image transmission. Installation has been simplified to three steps in the Xiaomi Home app, and recordings can be stored on a **microSD card** or on **NAS** network storage.

Technical specification

- **Name:** Xiaomi Outdoor Camera CW100 Dual
- **Rated input power values:** 12 V □ 1 A
- **Dimensions:** 105 × 198 × 71 mm
- **Resolution:** 2304 × 1296, two views
- **Video codec:** H.265
- **Operating temperature:** From -30°C to 60°C
- **Wireless connectivity:** Wi-Fi IEEE 802.11 b/g/n/ax 2.4 GHz, Bluetooth 5.2
- **System compatibility:** Android™ 8 and iOS 12.0 or later
- **Storage:** microSD card (from 16 GB to 256 GB)
- **Model:** MJSXJ26CM
- **Box contents:**
 - Xiaomi Outdoor Camera CW100 Dual
 - Power adapter
 - Waterproof adhesive tape for the power cable
 - Self-adhesive mounting template
 - Screw set
 - Waterproof accessories for the network port
 - “Caution” sticker
 - User manual
