Price: **2,099.00 zł** gross / 1,706.50 zł net

Manufacturer: XIAOMI

Referention number: DNXGGKKOERMMGO

Product features

Height	97 mm
Width	350 mm
Depth	350 mm
Base station dimensions (W x D x H)	130 mm
Programming function	Yes
Runtime	120 min
Dust sensor	Yes
Shape	Round
Battery capacity	5200 mAh
Battery voltage	14.4 V
Power consumption (typical)	55 W
Automatic base station return	Yes
Base station	Yes
Base station output voltage	19.8 V
Wet mopping	Yes
Suction power	4000 Pa
Stairs detection	Yes
Base station functions	Charging
Wi-Fi	Yes
Navigation type	Laser Distance Sensor (LDS)
Obstacle detection	Yes
Rechargeable	Yes

Product colour	White
Dust container type	Bagless
Diameter	350 mm
Product weight	3800 g

Full product description

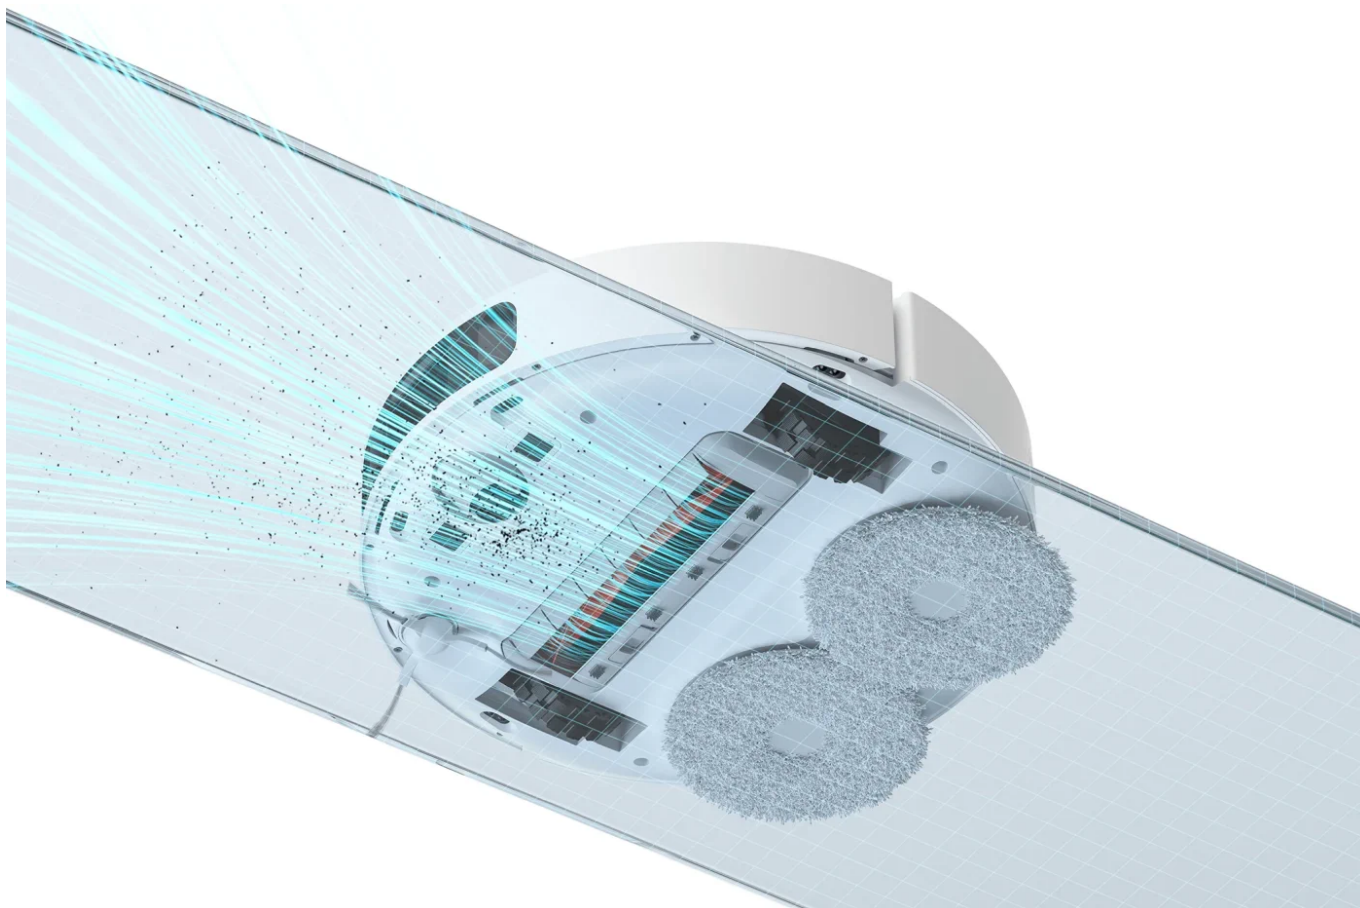

More Effective Stain Removal with Dual-Pad Pressure Mopping

Xiaomi S10 Robot Vacuum Cleaner brings a new quality to cleaning with its Dual-Pad Pressure Mopping system. The state-of-the-art pressure mopping technology allows for more effective removal of even the most stubborn stains. With rotating mops that simulate hand washing, your floors will shine clean and you will save time and effort.

Increased Power and Performance

The heart of the device has been significantly improved. A new, more powerful motor producing 4000Pa of suction power allows the robot to effectively pick up dust and dirt in one go. Four suction power settings allow the robot to adjust its operation to different types of dirt - from fine dust to larger particles. All this makes daily cleaning extremely efficient and easy.

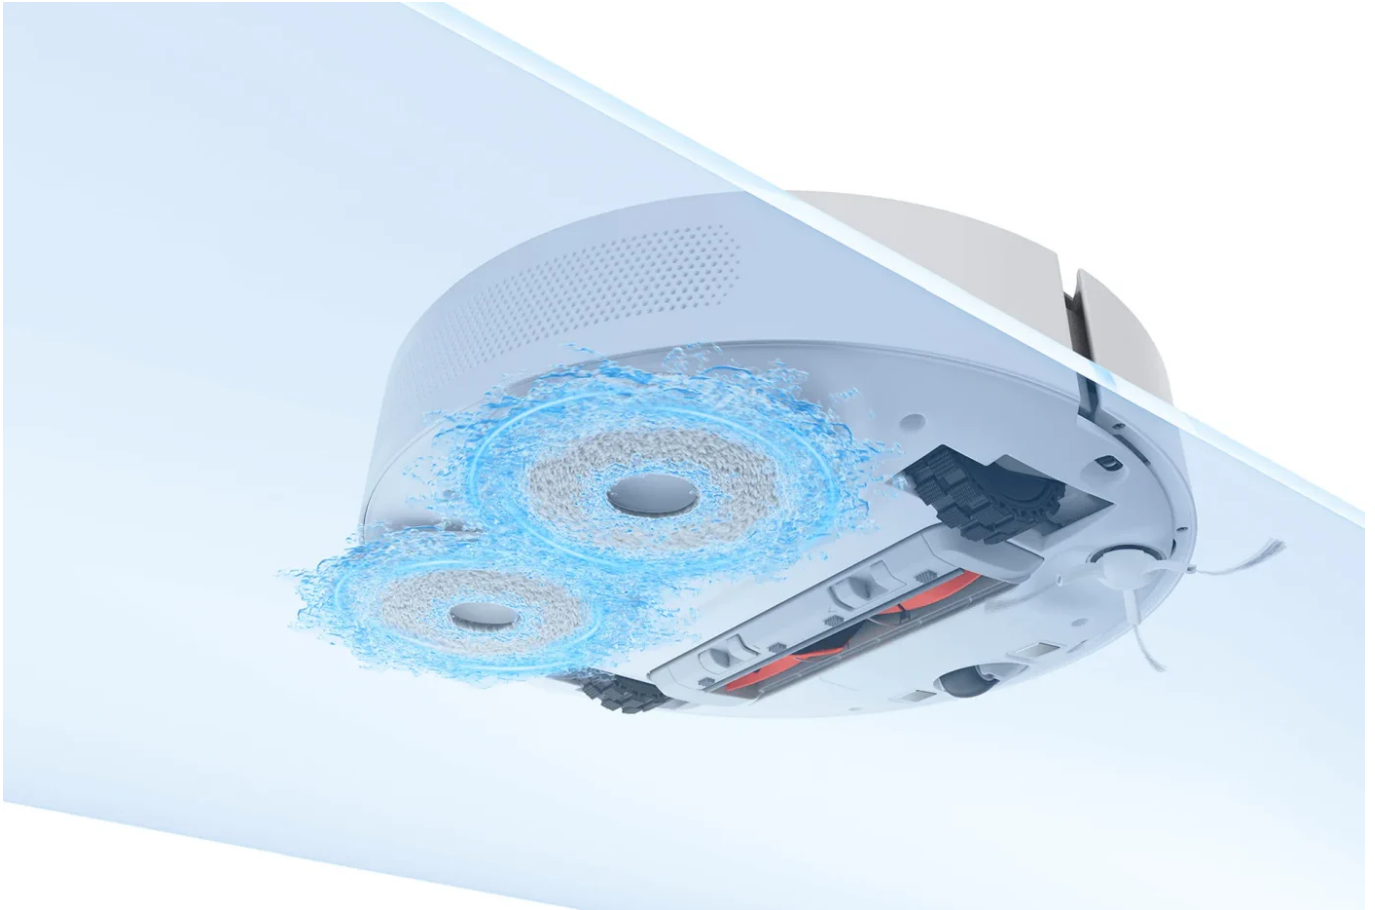

Extended Working Time

Xiaomi S10 is equipped with a powerful 5200mAh battery, which provides up to 2 hours of continuous operation in standard mode. This is long enough to easily clean an area of more than 200 square meters, ideal even for large homes. This gives the robot more independence and allows it to clean for longer without frequent recharging.

Intelligent Mopping with Large Tank Capacity

The innovative 200ml water tank with electronic control allows the mop to moisten evenly, ensuring effective stain removal without the risk of leakage. The robot can mop floors up to 150m² in one cycle, which is ideal for medium and large apartments. Double layers of mops made of fabrics (80% polyester, 20% modified polypropylene fiber) effectively absorb water and ensure efficient dirt removal, while protecting the floor surface.

Precision Obstacle Avoidance and Carpet Edge Identification

With its advanced 3D obstacle avoidance technology, the Xiaomi S10 accurately avoids obstacles, minimizing the risk of collisions, even in poorly lit areas. The robot can recognize the edges of carpets and automatically avoids them while mopping to prevent them from getting wet.

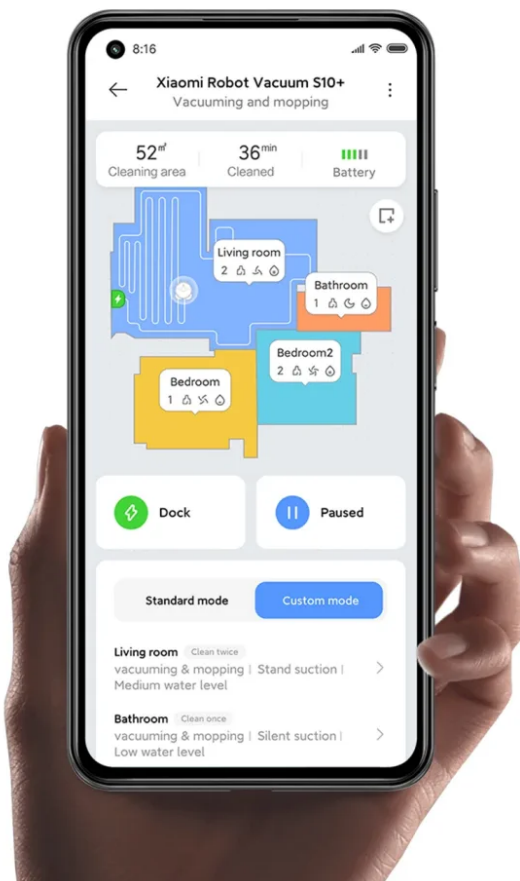

Advanced Laser Navigation and Cleaning Personalization.

The robot uses dual laser and LDS LIDAR technology to scan 360° of the entire house. This quickly creates a map of the rooms, planning cleaning routes with extreme precision. Once the map is created, you can customize the cleaning plan according to the layout of the rooms, setting the time, area and frequency of cleaning according to your needs.

Remote Control via Xiaomi/Mi Home App

With the Xiaomi/Mi Home app, you have full control over your cleaning robot, no matter where you are. Remote control allows you to start cleaning with a single touch, ensuring that your home is always clean, even when you're away.

New quality in house cleaning

Xiaomi S10 Robot Vacuum Cleaner is an advanced device that brings a new quality to home cleaning. With cutting-edge technology, increased power and smart features, cleaning becomes easier, more efficient and more effective than ever before.
