Full product description

Xiaomi Smart Air Fryer 6.5L Black MAF10 for everyday cooking

Xiaomi Smart Air Fryer 6.5L Black MAF10 is an oil-free air fryer with a capacity of 6.5 l, ideal for preparing chips, vegetables, meat, fish, snacks and dishes for several people. The black housing blends well with the kitchen worktop, and the larger basket makes it easier to prepare portions for a family dinner or a gathering at the table.

Temperature range from 40°C to 220°C

The device offers temperature adjustment from 40°C to 220°C, allowing not only baking and hot-air frying, but also defrosting, drying fruit or

preparing yoghurt. This operating range helps you choose the right settings for different ingredients and meal preparation methods.

360° convection heating

The 360° convection heating system directs hot air into the fryer basket and ensures even heating of food. This solution helps prepare crispy snacks, roasted vegetables, chicken or other dishes using less fat than traditional frying.

Control via the Mi Home / Xiaomi Home app

The fryer works with the Mi Home / Xiaomi Home app, enabling convenient control from a smartphone. The user can use the scheduling function up to 24 hours in advance and cloud-based recipes, which makes it easier to organise cooking throughout the day.

12 modes and LCD display operation

The Xiaomi Smart Air Fryer 6.5L has an LCD display and a control dial that allow you to select the mode, temperature and cooking time. The manufacturer has provided 12 preset modes, and the manual mode lets you adjust the settings to suit a specific recipe.

Keep-warm function

After cooking, the device can switch to a 30-minute keep-warm mode so the food stays warm until it is taken out of the basket. This function is useful when the dish is ready earlier than planned for serving.

Fat-reduction function in selected modes

The MAF10 model offers a fat-reduction function which, according to the manufacturer, is available in selected modes, including when preparing chicken wings, lamb chops and steaks. It is a practical solution for people who want to reduce the amount of fat in everyday meals.

Practical design and accessories included

The set includes the air fryer, a frying plate, a grill and an instruction manual. The non-stick coated basket makes cleaning after cooking easier, and the included grill allows two-level baking, helping you make better use of the appliance's capacity when preparing larger amounts of food.
