Product features

Product type	Air purifier filter
Height	360 mm
Width	226 mm
Depth	226 mm
Compatibility	Smart Air Purifier 4 Pro
Brand compatibility	Xiaomi
Product colour	Black

Full product description

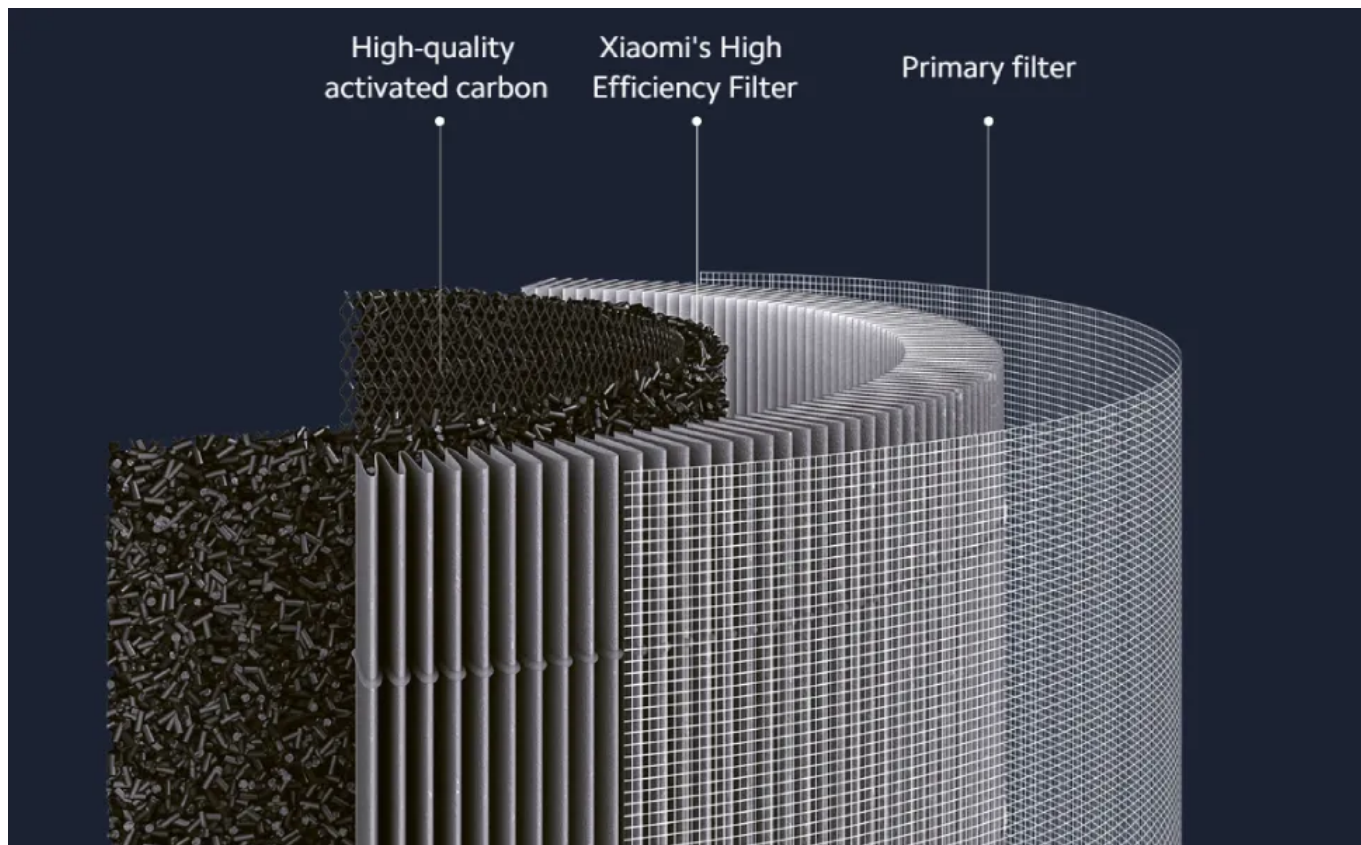

Smart Air Purifier 4 Pro Filter: three-layer filtration system

The **Smart Air Purifier 4 Pro Filter** is a key component of the air purifier that provides effective **protection for your health**. With a three-layer, high-performance filtration system, this filter removes pollen, **PM2.5** particles, pet dander and unpleasant odors to ensure clean and fresh air in your home.

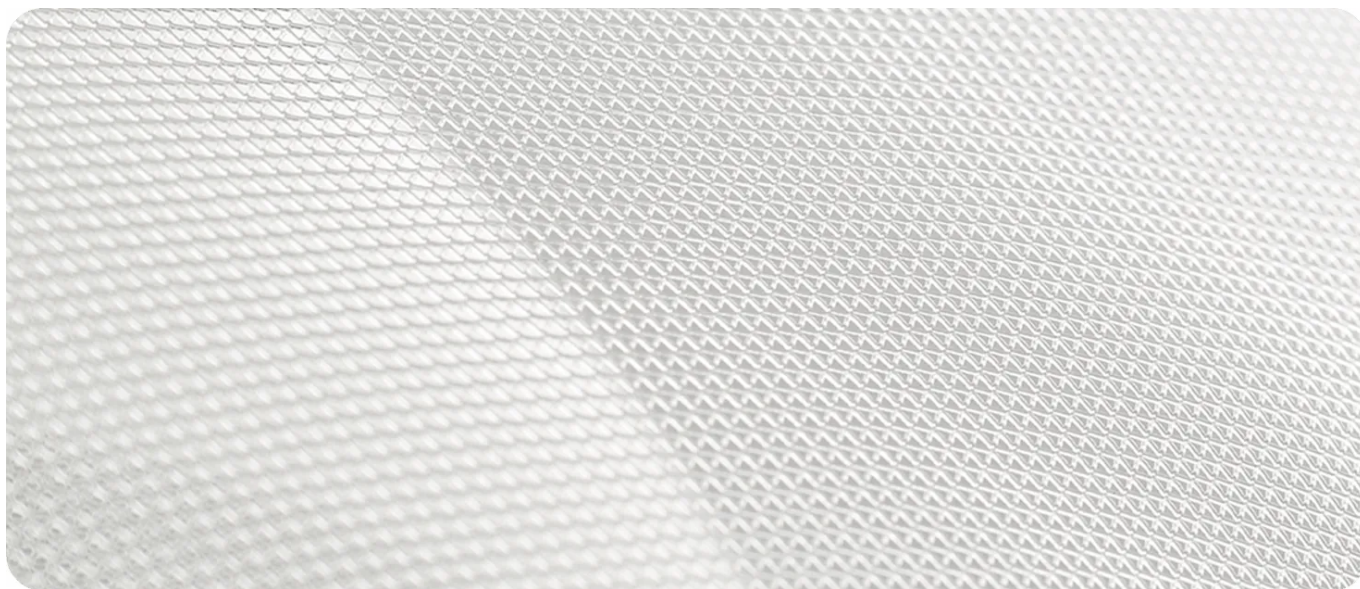

Therapeutic filtration: layer by layer

Smart Air Purifier 4 Pro Filter not only purifies the air, but also **takes care of your health**. With advanced filtration technology "**layer by layer**", the combination of **Xiaomi**'s high-performance filter and high-quality activated carbon provides comprehensive air purification in your home.

Main filter: Capture large particles in 360°

The **main filter** is the first line of defense, protecting your environment from large pollutants. With its **360°** particle capture, this filter effectively removes dust, hair, fine crumbs and other larger contaminants, providing fresh air inside your home. In addition, its resistance to crushing, oils, acids and alkalis ensures long-lasting filtration performance.

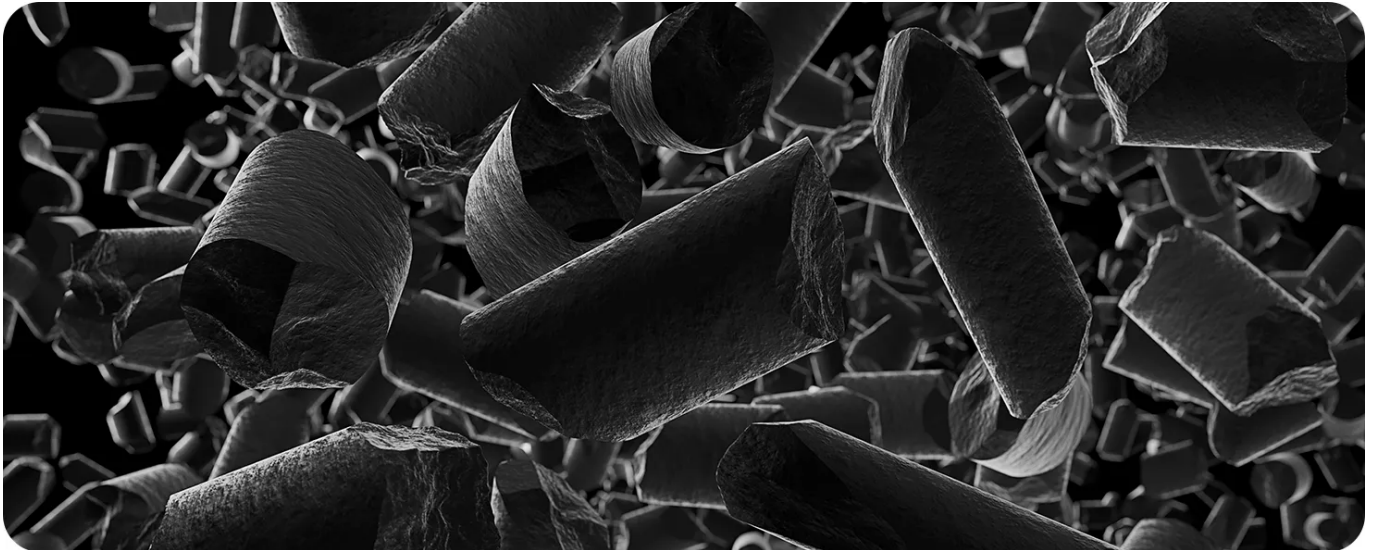

Xiaomi high-performance filter: 99.97% particle elimination

The **Xiaomi filter** is the heart of air purification in the manufacturer's air purifiers. With an innovative combination of electrostatic and mechanical filtration technology, this filter effectively removes even the finest particles down to 0.1 microns. PM2.5 particles, pollen, pet dander and other pollutants don't stand a chance against this advanced system. Its high filtration rate of **99.97%** for particles down to **0.3 microns** and as high as **99.99%** for particles down to **0.1 microns** ensures that the air you breathe is clean and healthy. This is an indispensable tool for people who care about the air quality in their environment.

High-quality activated carbon: Strong odor absorption

Activated carbon in **Xiaomi** brand air purifiers is an indispensable tool in the fight against unpleasant odors. With its advanced porous structure and evenly distributed carbon, this filter effectively **eliminates** harmful odors, leaving your home with a pleasant, fresh smell of clean air. It is not only effective filtration, but also an extra layer of protection for your comfort and good quality of life.

Long-lasting freshness

Smart Air Purifier 4 Pro Filter is not only effective air purification, but also long-lasting freshness. It is recommended to replace it **every 6 to 12 months**, allowing you to enjoy continuous protection and clean air for a long time. It's an investment in the health and comfort of your home.
