Price: **119.00 zł** gross / 96.75 zł net

Manufacturer: XIAOMI

Referention number: DNXGJONRIRMNIO

Information:

Xiaomi Smart Camera C100 is a home monitoring camera with 2K HD image quality of 2304 × 1296 and a wide 128° viewing angle, so it captures more detail in a flat, child's room or by the entrance. It offers full-colour imaging in low light, discreet 940 nm IR and AI for detecting people, a baby's crying and loud sounds, with real-time notifications. The physical lens cover and zone masking protect privacy, while two-way audio makes it easy to stay in touch with household members. Wi-Fi 6, Bluetooth, H.265 and support for microSD, NAS or the cloud provide convenience and stability.

Product features

Height	115 mm
Width	69 mm
Depth	68 mm
Connectivity technology	Wireless
Maximum resolution	2304 pixels
Field of view (FOV) angle	128 °
Mounting kit	Yes
Live view	Yes
Cables included	USB
Infra-red wavelength	940
Night mode	Yes
DC output voltage	5
DC output current	1 A
Number of cameras	1
Smartphone/tablet remote support	Yes
IFU / User manual	Yes

DC-in jack	Yes
Operating temperature (T-T)	-10 - 40 °C
LED type	IR
Maximum aperture number	1.6
Wide Dynamic Range (WDR)	Yes
PTZ control	Yes
Card reader integrated	Yes
Built-in microphone	Yes
Web-based management	Yes
Total megapixels	3 MP
Video formats supported	H.265
Maximum memory card size	256 GB
Video recording	Yes
Compatible memory cards	MicroSD (TransFlash)
Remote viewing	Yes
Day/night mode	Yes
Wi-Fi standards	802.11b
Wi-Fi	Yes
Bluetooth	Yes
Ethernet LAN	No
Built-in speaker(s)	Yes
Mobile operating systems supported	Android 4.4
Built-in HDD	No
Power source type	DC
Camera tilt control	Yes
Camera pan control	Yes
Product colour	Black
Mounting hardware type	Ceiling/Wall/Desk
Virtual assistant	Amazon Alexa & Google Assistant
Type	IP security camera
Designation	Indoor
Product weight	170 g

Full product description

Home monitoring 2K with AI

Xiaomi Smart Camera C100 is a home monitoring camera that combines a wide field of view, **2K HD** image quality and **AI** support. It is ideal for monitoring a flat, a child's room and the entrance to the home, as it captures details with greater clarity than classic Full HD cameras.

Key benefits

- **2304 x 1296 resolution** – you can see more detail in the image and more easily recognise what is happening in the recording.
- **Wide 128° field of view** – you cover a larger part of the room without having to rotate the camera often.
- **Full-colour 3 MP in low light** – you retain a clear image also in the evening and at night.
- **Active physical lens cover** – you can cover the camera whenever you want to stop recording immediately.
- **Detection of people, baby crying and loud sounds** – you can react faster to important events at home.
- **Wi-Fi 6 and Bluetooth** – you get a more stable connection and simpler device pairing.

**Pełny kolor 3 MP przy
słabym oświetleniu**

**Aktywna fizyczna
osłona obiektywu**

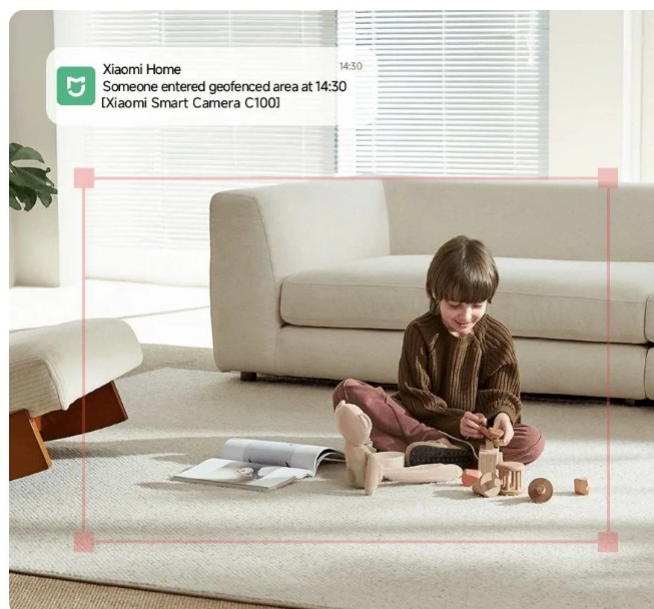

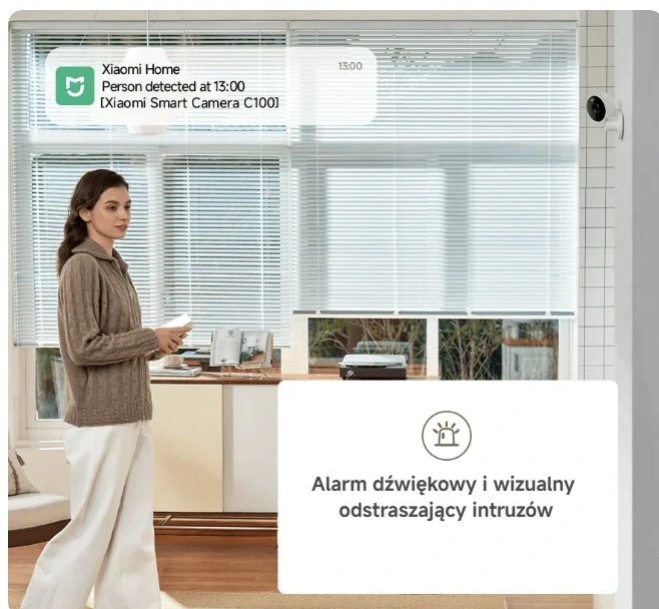

Image even after dark

The camera offers full-colour recording in very low light, so evening footage remains clear without switching the image to black and white. The built-in **940 nm** infrared illuminators work without a red glow, which reduces disturbance in the bedroom and in the child's room.

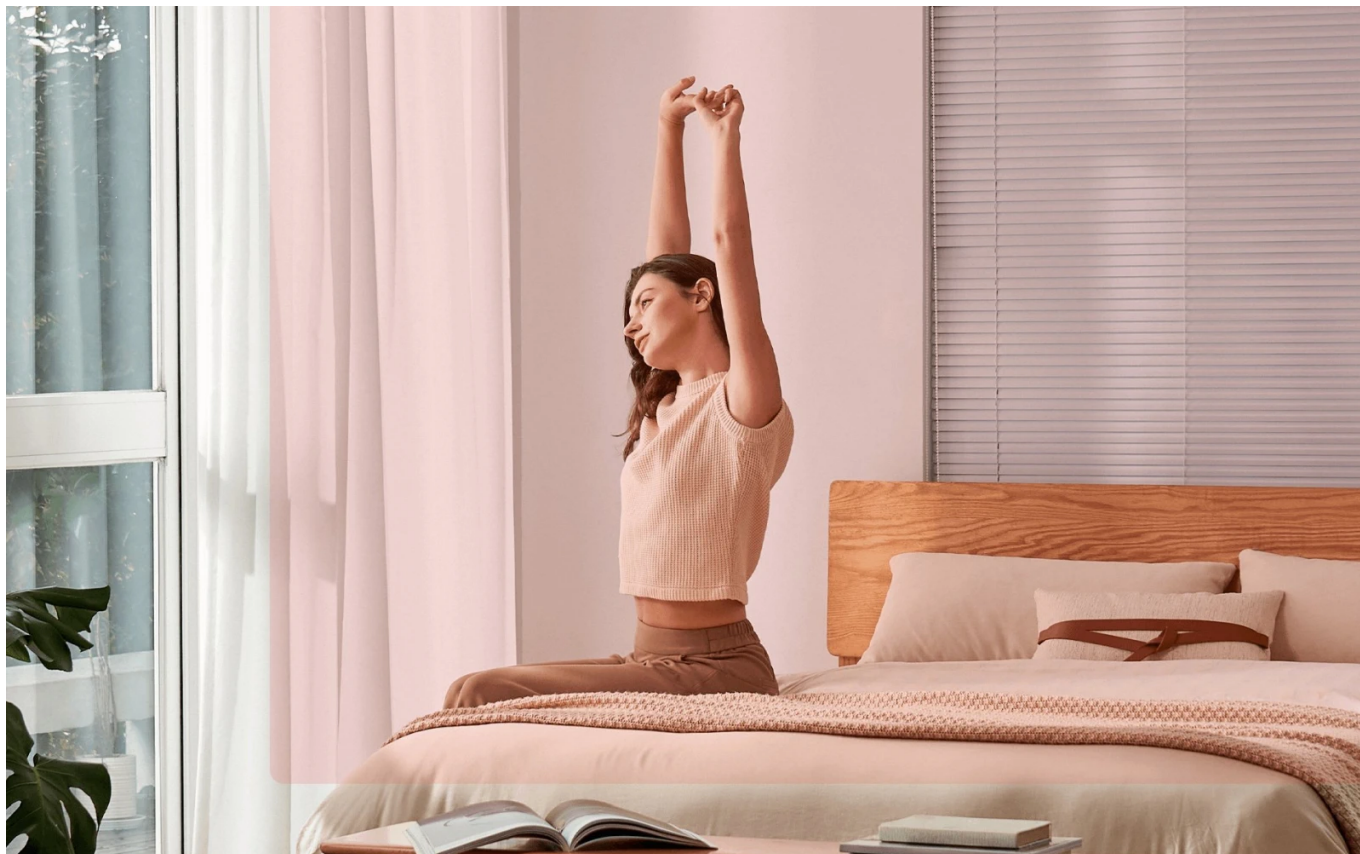

Detection of important events

The applied **AI** algorithms recognise people, loud sounds and a baby's crying, then send real-time notifications. This means you do not need to keep watching the screen, as the camera independently signals situations that require a response. It is a practical solution for families, carers and people monitoring the home while away.

Privacy protection

The manufacturer has used an **active physical lens cover** that blocks the camera and stops recording at source. In addition, you can set masking for selected areas to exclude from view places you do not want to monitor. This is important when the camera is used in a shared space or in a child's room.

Two-way conversation

Two-way voice communication makes it easy to stay in touch with household members without having to go to the device. From the Xiaomi Home app, you can speak to the person by the camera and hear their voice back the other way. Built-in sound-enhancing solutions reduce echo and noise, so the conversation sounds clearer.

Stable connection

Support for **Wi-Fi 6** increases resistance to interference and maintains smoother image transmission. In practice, this means fewer interruptions during live view and more efficient operation in a home where many network devices are in use. The camera also supports **Bluetooth pairing**, which simplifies setup.

Convenient recording and installation

The model supports **H.265** compression, so recordings take up less space and play back faster. For storage, you can use a **microSD card 8-256 GB**, NAS memory or the cloud. The camera supports upright, inverted and wall mounting, so you can easily adapt it to the room layout.

Technical data

- **Name:** Xiaomi Smart Camera C100
- **Input:** 5 V □ 1 A
- **Net weight:** Approx. 170 g
- **Product dimensions:** 69 × 68 × 115 mm
- **Resolution:** 2304 × 1296
- **Video codec:** H.265
- **Operating temperature:** From -10°C to 45°C
- **Wireless connectivity:** Wi-Fi IEEE 802.11 b/g/n/ax 2.4 GHz, Bluetooth 5.2
- **System compatibility:** Android™ 8.0 and iOS 12.0 or later
- **Storage:** microSD card (from 8 GB to 256 GB)
- **Package contents:**
 - Xiaomi Smart Camera C100
 - Charging cable
 - Wall-mounting kit
 - Mounting sticker
 - User manual
