Full product description

Extralink B4 courier foil packs - Safe and Professional Packaging of your Shipments

Extralink courier foil packs are reliable packages that will work in any situation - from shipping small items to larger parcels. Their high quality workmanship guarantees the safety of your shipment, and self-adhesive strips make packing fast and convenient. Choose **durable courier foil packs** to protect your products from moisture, damage and unauthorized access.

Durability and moisture protection

Our courier foil packs are made **of high-quality LDPE film**, which protects the parcel from moisture and mechanical damage. With a thickness of 55 microns, they are resistant to tearing, so you can be sure that your package will arrive intact. By choosing these foil packs, you provide your customers with maximum parcel security.

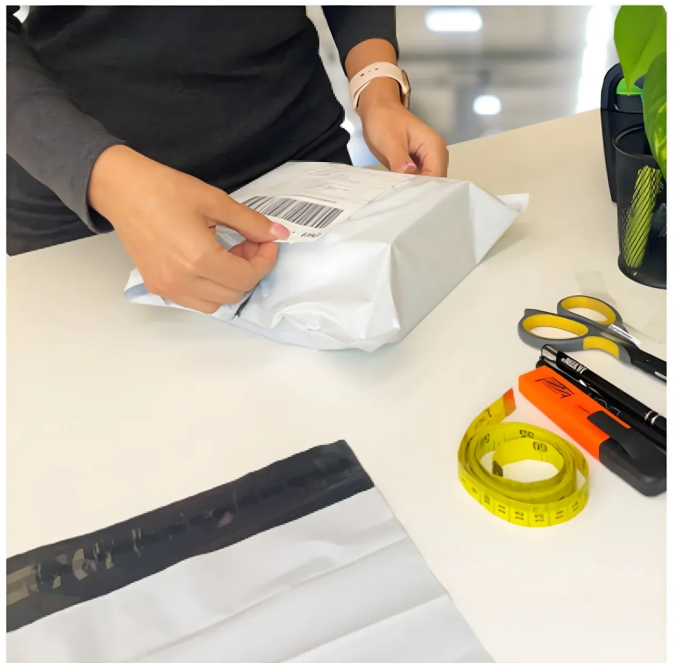

Quick and convenient packaging

Thanks to **the self-adhesive strips**, the packaging process is extremely simple and fast. All you have to do is pack the product, remove the cover from the strip and close the envelope. This solution saves time and increases the efficiency of your online store's shipments.

Professional look

The white color of Extralink courier foil packets gives them an elegant and professional look. This is especially important if you care about the first impression during delivery. It will make your packages look neat and aesthetically pleasing.

Versatility and eco-friendly solutions

Courier foil packs are available in **B4 size (260x350 mm)**, making them ideal for shipping documents as well as small products. Made from 50% recycled materials, they are environmentally friendly, further enhancing your brand's image as responsible and eco-friendly.
