### Information:

Xiaomi Smart Camera C701 EU is an indoor 4K IP camera with full 360° horizontal and 118° vertical rotation, allowing you to conveniently monitor your home, office or child's room from the Xiaomi Home app. It offers intelligent detection of motion, human silhouettes and a baby's cry, reducing false alarms and sending quick notifications to your phone. Stable Wi-Fi 6 and dual-band connectivity ensure smooth live viewing, while the night mode with infrared guarantees a clear image even after dark. High 4K quality, H.265 compression and broad compatibility with Android and iOS make it a reliable solution for round-the-clock indoor protection.

## Full product description

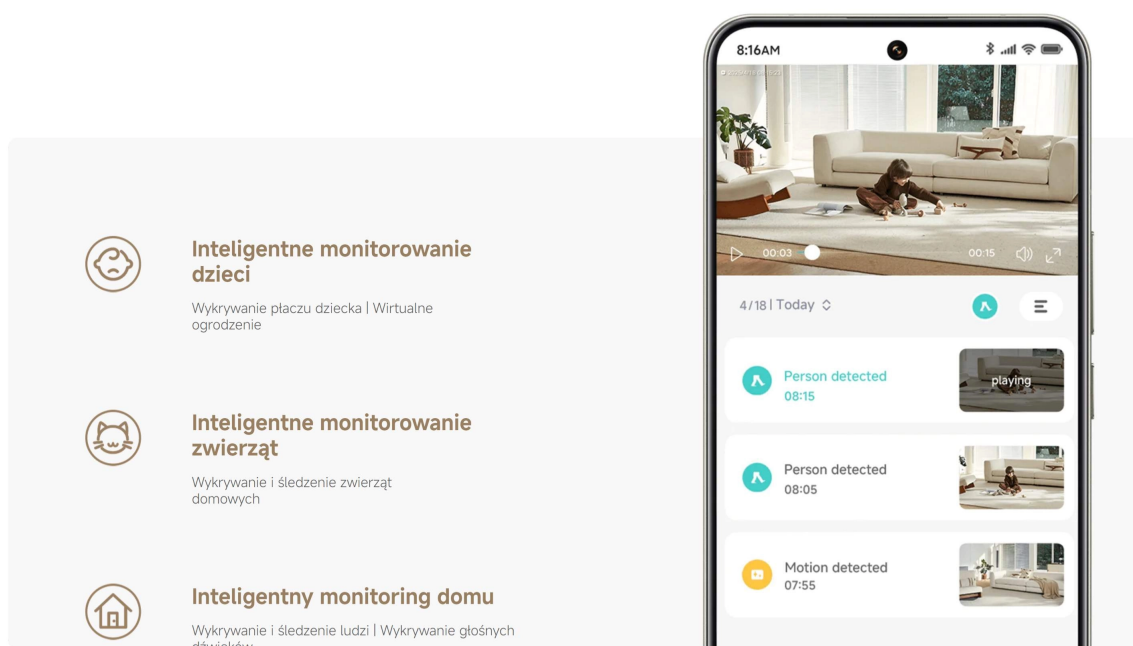

### The camera that watches over everything

Discover **Xiaomi Smart Camera C701 EU** – an indoor IP camera that lets you monitor every room with a full **360° field of view**. Thanks to **4K** resolution and **Wi-Fi 6** connectivity (Wireless Fidelity 6 – sixth-generation wireless network), you can see every detail with exceptional smoothness and connection stability. This is equipment that **lets you check what is happening in your home whenever you want** – all you need is a smartphone and the Xiaomi Home app.

### Intelligent monitoring

The Xiaomi Smart Camera C700 **automatically recognises movement**, the human silhouette, and can detect a baby's crying, responding instantly with a **notification on your mobile devices**. Thanks to an advanced image analysis algorithm, it records events precisely, avoiding false alarms. You can **monitor the space around the clock**, confident that the camera will capture only what really matters.

## 360° rotating mechanism

The **rotating drive of the Xiaomi Smart Camera C701** enables complete tracking of the surroundings without any “blind spots”. Horizontal rotation of 360° and vertical rotation of 118° allow you to check every part of the room, regardless of its layout. Field-of-view control is possible from the Xiaomi Home mobile app, so you can monitor your home, office or child’s room remotely.

## Exceptional 4K image quality

With a resolution of **3840 × 2160 pixels (4K)**, the Xiaomi Smart Camera C701 delivers **high image quality** and clarity in every detail. Even in lower light, details remain sharp thanks to the high-sensitivity sensor. The image encoded in **H.265** (High Efficiency Video Coding – high-efficiency video coding) remains smooth while saving space on the microSD card.

**Montaż pionowy**  
Stoły, blaty

**Odwrócony montaż**<sup>12</sup>  
Montaż odwrócony na suficie

**Pamięć masowa na karcie microSD**<sup>13</sup>  
Obsługuje karty microSD  
8 GB do 256 GB

**Kodowanie H.265**  
Płynniejsze odtwarzanie wideo przy zmniejszonej pamięci zajmowanej na dysku

**Przechowywanie w chmurze**  
Ogromna pojemność

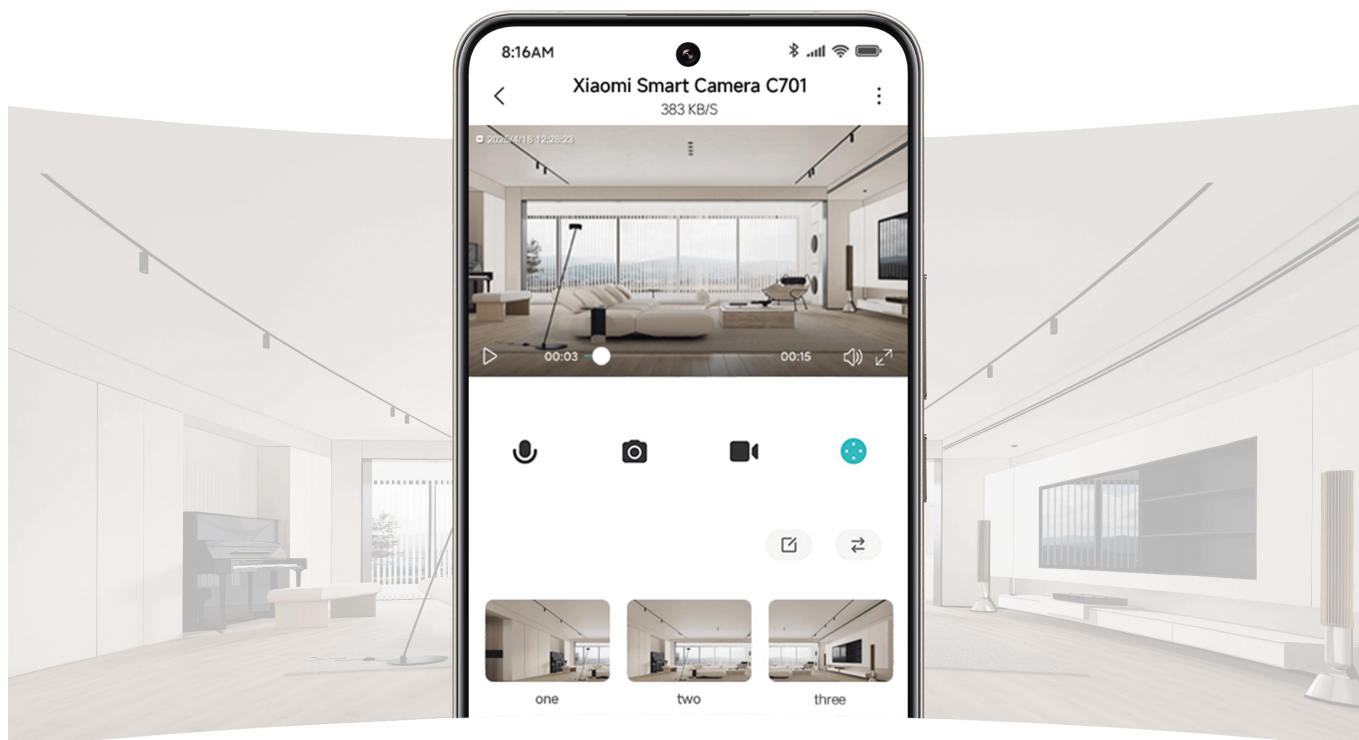

**Pamięć masowa podłączona do sieci**  
Użyj karty microSD do zapisania kopii zapasowej ostatnich filmów

<sup>12</sup>. W przypadku montażu odwróconego obróć ekran w aplikacji Xiaomi Home, aby uzyskać normalny obraz.

<sup>13</sup>. Obsługuje karty microSD (8–256 GB, klasa 10 lub wyższa, sformatowane w systemie FAT32). Karty microSD i sieciowe urządzenia pamięci masowej należy zakupić osobno. Przechowywanie w chmurze jest płatne i musi być aktywowane przed użyciem.

## Stable Wi-Fi 6 and broad compatibility

Thanks to **dual-band Wi-Fi** (2.4 GHz and 5 GHz), the camera provides a stable connection without delays and smooth image transmission. **Wi-Fi 6** technology increases bandwidth and reduces interference, which is especially important in networks with many devices. The Xiaomi Smart Camera C700 is compatible with **Android™ 8** and **iOS 12.0** or later, allowing easy pairing with your smartphone.

## Advanced night vision and night mode

Even in complete darkness, the indoor IP camera maintains high image quality thanks to next-generation **infrared** (IR – Infrared). Built-in IR LEDs automatically adjust the lighting strength depending on **lighting** conditions, ensuring a clear image at night. This means you can check what is happening in your home even after dark, without needing to switch on a lamp.

## Noktowizja w podczerwieni Imponująco wyraźny obraz nawet w nocy

Wbudowane podczerwone światło wypełniające o długości fali 940 nm poprawia widoczność w nocy, zapewniając wyraźny obraz nawet w całkowitej ciemności.
