Price: **5,299.00 zł** gross / 4,308.13 zł net

Manufacturer: XIAOMI

Referention number: DNXXGJQOMRMNHM

Product features

Height	344 mm
Number of cooking programs	35
Rotational speed (max)	12000 RPM
Rotational speed (min)	40 RPM
Width	413 mm
Depth	316 mm
Built-in scales	Yes
Whisk	Yes
Cooking programs	Fry
Engine power	500 W
Package weight	13800 g
Temperature sensor	Yes
Number of recipes	200
Bowl material	Stainless steel
Timer duration	Yes
Steaming basket	Yes
Heating element power	1200 W
Display diagonal	8 "
Maximum power	1700 W
Control type	Touch
AC input frequency	50 Hz
AC input voltage	220 V

Measuring scale	Yes
Cooking temperature (max)	180 °C
Product colour	Black
Built-in display	Yes
Product weight	10000 g

Full product description

Xiaomi Smart Cooking Robot

The **smart food processor** has 35 different uses, and is equipped with an induction heater that allows you to prepare food at 180 degrees. The stainless steel pot has a capacity of 2.2 liters and a wide speed range. In addition, the integrated display can show one of more than 200 recipes.

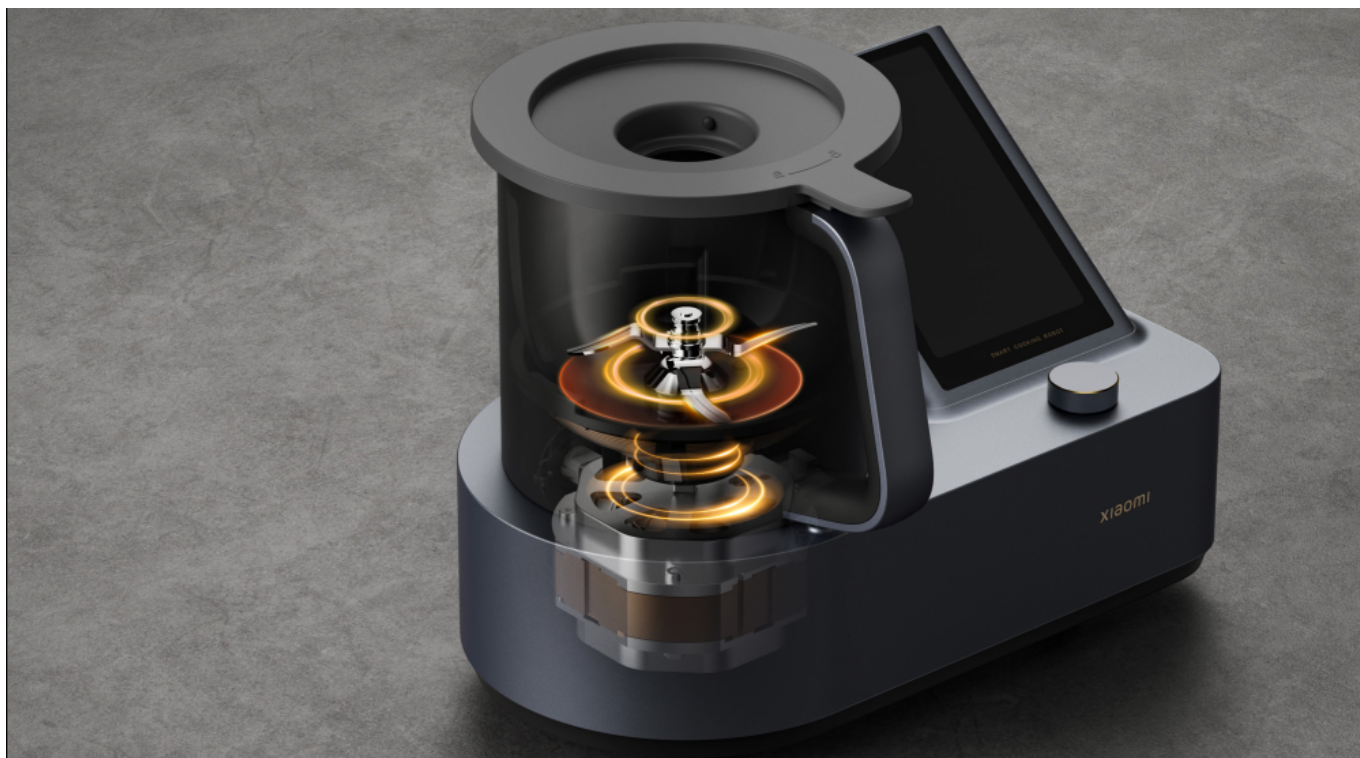

Intuitive touchscreen

Xiaomi Smart Cooking Robot has an 8-inch color touchscreen for a new cooking experience. Recipes and cooking steps are clearly displayed, making it easy to follow detailed instructions.

Intelligent motor and state-of-the-art blade

A multi-speed reluctance motor directly transmits power, and speeds range **from 40 to 12,000 rpm**. Low speeds allow for even mixing of ingredients, while high speeds allow for fine chopping. Ingredients are chopped as the blades rotate clockwise, mixed as the blades rotate counterclockwise. Dough is kneaded when the machine rotates in different directions at intervals.

One-click self-cleaning

The design allows you to wash fruits, vegetables, meat and other ingredients before eating, so your hands are free. The **Xiaomi Smart Cooking Robot** can also help you wash your pot after cooking, providing a one-stop solution for your cleaning needs.

CookingIoT

The **Xiaomi Smart Cooking Robot** intelligently calculates the cooking temperature, time and stirring speed for each dish, using artificial intelligence technology that can be constantly updated online.
