Product features

Height	335 mm
Width	190 mm
Depth	190 mm
Quantity	1
Humidification capacity	350 milliliter/hour
Power supply type	AC
Operating time	32 h
Control panel colour	White
Smartphone/tablet remote support	Yes
IFU / User manual	Yes
Noise level	38 decibel
Placement	Floor
Control type	Touch
AC input frequency	50 Hz
AC input voltage	220 V
Product colour	White
Power	28 W
Product weight	1570 g

Full product description

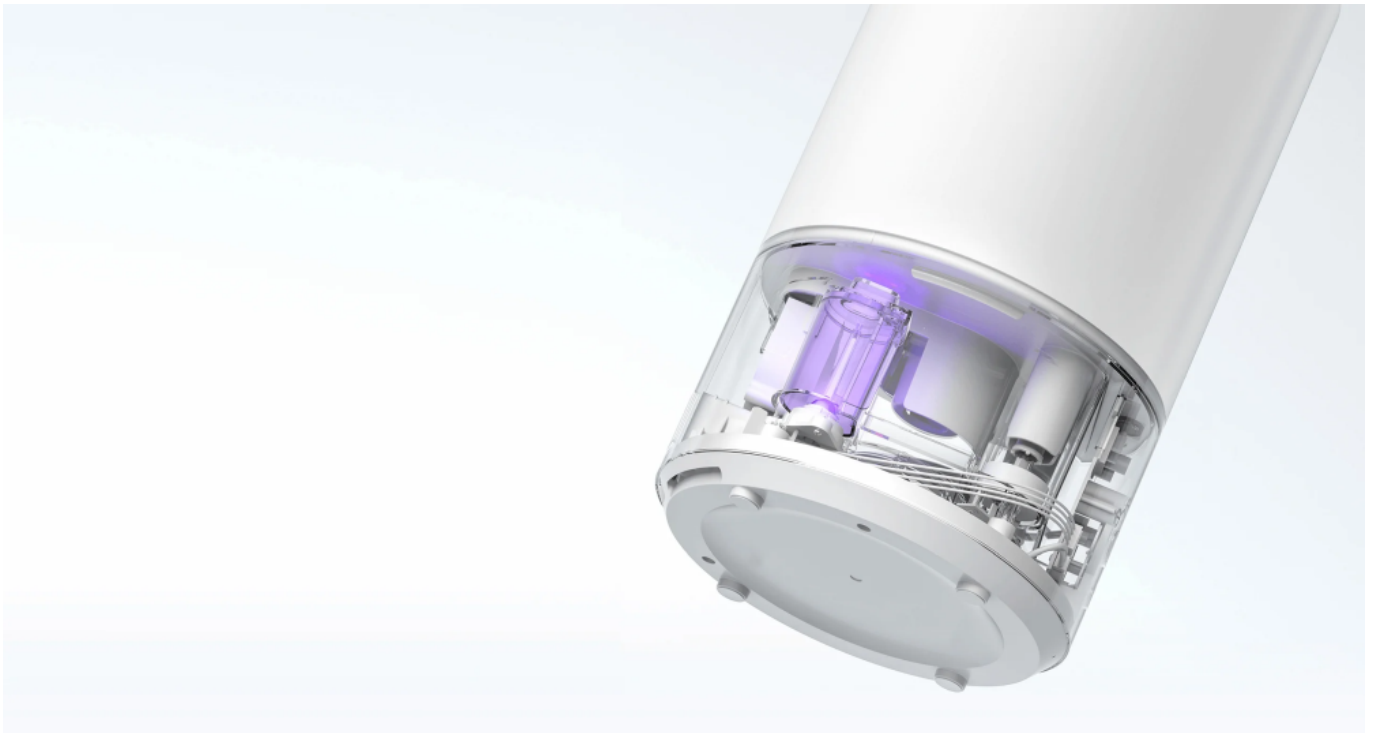

Enjoy the fresh mountain air in your own home

The humidifier uses **UV-C ultraviolet sterilization technology** to eliminate bacteria and then releases a purified mist to cleanse the environment. The unit is equipped with a state-of-the-art rotating mist dispenser that rotates 360° to ensure coverage of the entire room without the need for constant repositioning.

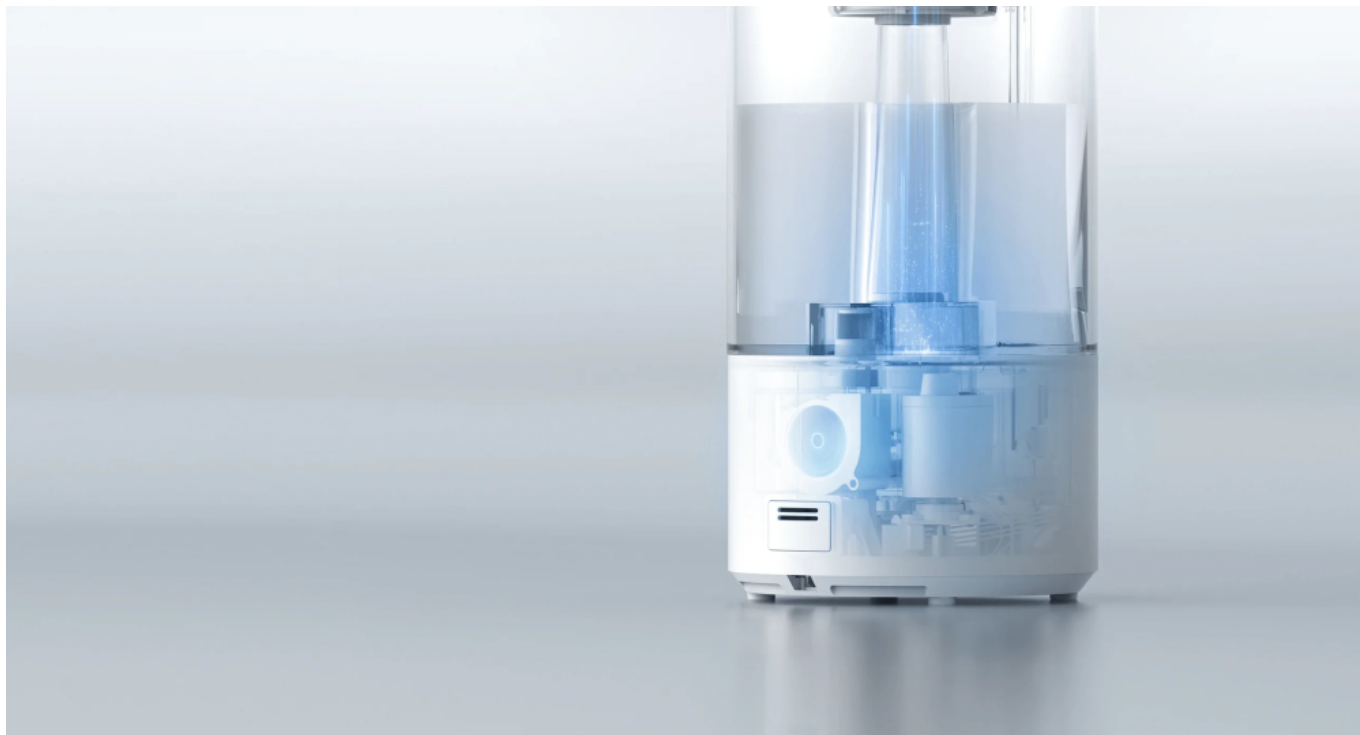

Powerful UV-C sterilization

UV-C ultraviolet sterilization technology eliminates up to 99.9% of bacteria before releasing water into the mist stream.

Water tank with a capacity of 4.5 l

The humidifier releases up to 350ml of ultra-fine water droplets per hour to prevent dry indoor environments. With a large 4.5L tank, the humidifier can run **continuously for up to 32 hours** without refilling.

Automatic mode to prevent excessive humidity

Mist output is automatically adjusted to keep humidity at optimal levels and prevent wet furniture. Humidity is automatically maintained at 60% for optimal comfort. Humidity settings can be adjusted in the Mi Home app.

Control the level of remaining water

The water tank is equipped with a transparent indicator, so you can check the water level without lifting the lid. The humidifier automatically shuts off when the tank is empty or removed from the base

Enjoy your sleep without distractions

The new floating board structure humidifies the air with minimal noise to give you a good night's sleep.

Create a soothing atmosphere

The new aromatherapy diffuser fills the air with essential oils to create a soothing atmosphere.
