Full product description

Automatic dosing with fixed time and dose

The **Xiaomi Smart Pet Food Feeder** is paired with the Mi Home/Xiaomi Home app, so you can control the dosing time and dose from anywhere, making travel more enjoyable and pet feeding more convenient.

Liquid dosing system

The food dispenser features a unique six-grid dispenser structure, a flexible soft silicone food agitator and dispensing paddles that have been tested for more than **10,000 dispensing cycles** to ensure smooth dispensing through a wide channel that effectively prevents blockages.

Intelligent monitoring of food levels

Two sets of sensors continuously monitor remaining food and dispensing status. Food shortages or errors are indicated by the feeder light and on the **Mi Home/Xiaomi Home** app. A saved feeding schedule and built-in backup power ensure regular dispensing even in the event of a power outage or power failure.

Triple sealed

The high-quality silicone sealing ring can effectively block air and slow down the oxidation of pet food. Independent, replaceable and moisture-resistant desiccant cartridges keep all pet food dry and fresh. Unique spherical seal design guarantees freshness; hidden dispensing mechanism avoids damage from pet bites.

Food grade 304 stainless steel

The food compartment, food stirrer, dispensing spatula and food bowl made of 304 stainless steel meet the requirements for food contact materials.

Large capacity for durable use

The **Xiaomi Smart Pet Food Feeder** is specially designed for cats and small to medium-sized dogs, and can store about 1.8 kilograms of dry pet food, enough for an adult cat or small dog for 15 to 20 days, while the owner is away on a daily or short trip.
