Product features

Product type	Mono portable speaker
Height	82 mm
Width	142 mm
Depth	70 mm
Connectivity technology	Wireless
Carrying handle(s)	No
Remotely operated	Yes
Product design	Rectangle
IFU / User manual	Yes
DC input voltage	12 V
DC-in jack	Yes
Remote control type	Wireless
Number of speakers	1
Card reader integrated	No
Built-in microphone	Yes
On/off switch	Yes
Power adapter included	Yes
Driver diameter	44.45 mm
Wi-Fi standards	802.11a
Wi-Fi	Yes
Bluetooth version	5.1
Bluetooth	Yes

Adjustable volume	Buttons
Mobile operating systems supported	Android
Bluetooth profiles	A2DP
Product colour	Black
Speaker type	Full range
AirPlay	Yes
Virtual assistant	Amazon Alexa
Built-in display	No
Recommended usage	Universal
Product weight	460 g

Full product description

Exquisite design

The **Xiaomi Smart Speaker Lite** features a compact and exquisite design with a soft matte finish in premium gray. Sophisticated sound and an immersive listening experience are provided by a **1.75-inch** high-quality **speaker** thanks to professional tuning by Xiaomi Acoustic. The U-shaped channel design effectively amplifies low frequencies for great bass. The **innovative** 350 cm³ **sound cavity design** fully maximizes speaker power and provides an exceptional listening experience.

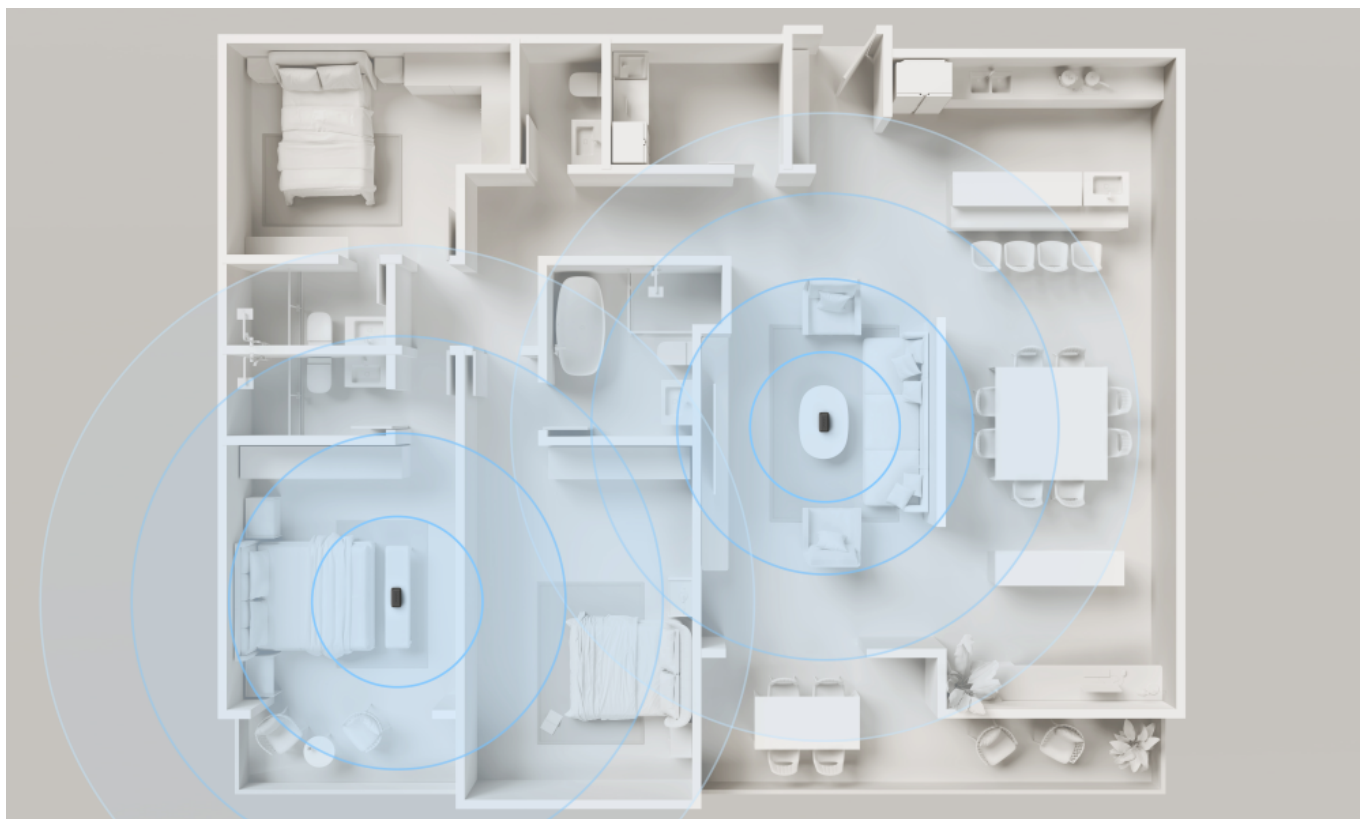

Smart living with Alexa

The smart speaker is equipped with **Alexa Voice** artificial intelligence. Alexa allows you to control the speaker with hands-free voice commands, such as play music, check the weather, or raise/lower the volume with your voice. After connecting the smart speaker and smart devices to the Mi Home/Xiaomi Home app, the speaker can be synced with Amazon Alexa. **Xiaomi Smart Speaker Lite** can be used to control various smart devices in the home via Alexa and help create a smart home.

Great sound throughout the house

With **Alexa Multi-Room** or **Airplay 2**, multiple speakers can be used in different rooms and simulate the same music, radio stations, podcasts and audio throughout the home. **AirPlay** is an Apple technology designed to control home audio systems and speakers in any room - with a single touch or by simply asking Siri - directly from an iPhone, iPad, HomePod or Apple TV.

Communicate with Alexa even in large rooms

A high-quality microphone and advanced artificial intelligence technology help reduce the effects of ambient noise. With **AI** deep learning technology, **Alexa** will be easier to use the more you communicate with her.
