Full product description

Xiaomi TV Box S (3rd Gen): Your Home Entertainment Center

Expand your TV's multimedia capabilities and features with the Xiaomi TV Box S (3rd Gen). Enjoy a detailed **4K UHD picture with Dolby Vision support**, cinematic sound quality with your soundbar thanks to **Dolby Atmos** and **DTS:X**, and smooth performance powered by a powerful processor. With **Google TV™** on board, all your favorite entertainment is always at hand, organized and easily accessible.

See the Difference in Image Quality

Imagine a picture so sharp that you'll notice every last detail of your favorite movie. With **4K UHD resolution**, the Xiaomi TV Box S (3rd Gen) displays a picture with exceptional clarity, so you'll see every detail. What's more, support for **Dolby Vision** and **HDR10** ensures even higher picture quality. These technologies, used in the movie industry, offer a wider dynamic range. This means you'll see more detail in both bright and dark scenes, and colors are more vivid and realistic. That's a truly **cinematic visual experience** in your living room that allows you to appreciate the artistry of filmmakers.

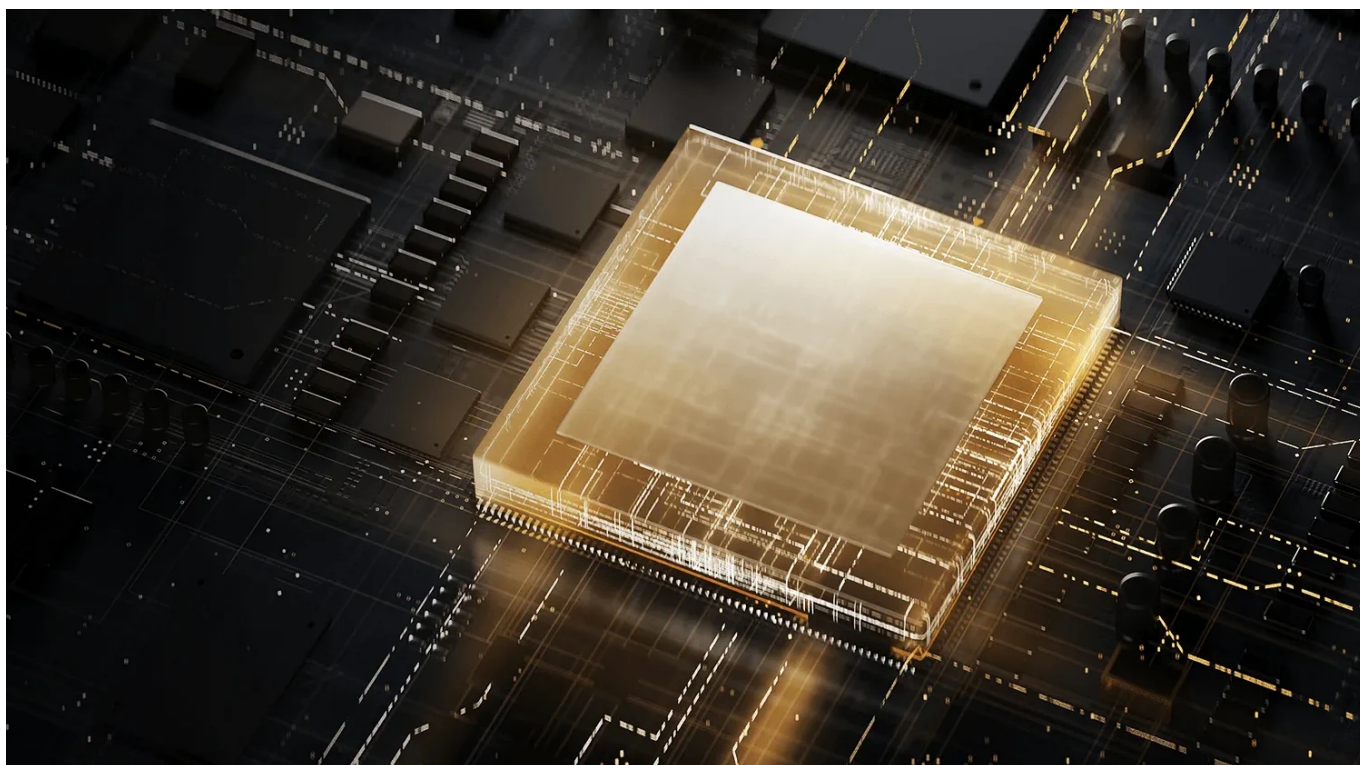

Sound That Surrounds You

Good picture needs equally good sound. When paired with your soundbar or home theater system, **the Xiaomi TV Box S (3rd Gen) media player** will take care of the perfect sound experience with **Dolby Atmos** and **DTS:X** technologies. It's not only the precise reproduction of sound details, but more importantly **the multidimensional sound** that surrounds you. Feel the sound move around you, creating a uniquely **immersive audio experience**, whether you're watching an action movie, concert or TV series. Get caught in the middle of the action with realistic and spacious sound.

Liquidity of Operations

At the heart of the Xiaomi TV Box S (3rd Gen) is a high-performance **6-nanometer processor**, backed by a quad-core A55 chip. Combined with **2GB of RAM** and **32GB of internal storage**, the device offers smooth performance and fast responses. Switching between apps, browsing content or playing simple games is done without unnecessary delays. Compared to the previous generation, the new model offers a significant performance boost - the processor is 25% faster and the graphics chip is up to 130% more efficient*, resulting in an even better user experience. (*Data is from Xiaomi's internal labs).

High Speed Wi-Fi 6

The Xiaomi TV Box S (3rd Gen) also features support for **Wi-Fi 6**, the next-generation wireless networking standard. This means **faster internet connection** and more efficient data transfer, which is crucial for comfortable streaming of online content, especially in high definition. Keep in mind that you need a compatible router to take full advantage of Wi-Fi 6's potential.

Smart Entertainment at Your Fingertips

Xiaomi TV Box S (3rd Gen) runs under the control of **Google TV™**. This system collects movies, shows and other content from your apps and subscriptions, organizing them specifically for you. Looking for something new? Get recommendations or search more than 10,000 apps and hundreds of free channels using Google search. With **personalized profiles**, each household member can enjoy tailored suggestions. Your TV becomes even more helpful with the built-in **Google Assistant**. Simply press a button on the remote control and ask it by voice to find a movie, launch an app, play music or control the TV. You can even get answers to questions and control compatible smart home devices. Plus, with **Chromecast**, you can easily stream videos, photos and other content directly from your phone or tablet to the big TV screen.

Convenient Controls and Easy Setup

Controlling the device is extremely convenient with the included **Bluetooth 360° remote control**. You don't have to aim directly at the receiver - the remote works from any direction within range. It also comes with a button for **voice control**, allowing you to quickly and easily search for your favorite content using voice commands. Getting started with the Xiaomi TV Box S (3rd Gen) is very simple and takes just a moment - **three steps** are enough: connect the box to the HDMI port on your TV, connect to the Internet and do the initial setup to start streaming!
