Product features

Height	1286 mm
Width	256 mm
Depth	214 mm
Maximum input power	400 W
Battery capacity	2.5 Ah
Battery voltage	25.2 V
Product weight	3400 g

Full product description

Xiaomi Vacuum Cleaner G9 Plus - a vacuum cleaner that provides deep and comprehensive cleaning!

Xiaomi Vacuum Cleaner G9 Plus is a modern and smart cordless vacuum **cleaner** that offers **three modes**: eco mode, standard mode and high power mode. With **three unique brushes**, the vacuum cleaner will work in almost any situation, adapting to your needs. It also has a **large 600 ml dust container** that is easy to empty. It has **high suction power**, a **multi-stage filtration system** and **long battery** life. It is an ideal choice for people who want to keep their homes clean and provide their loved ones with a healthier environment.

High suction power - 120 AW max.

The Xiaomi Vacuum Cleaner G9 Plus is equipped with a high-speed digital motor that provides a maximum power of 120 AW, allowing it to easily pull in fine dust, crumbs, hair and other debris from the floor and other surfaces. This vacuum cleaner also has three power adjustment modes that allow you to adjust the intensity of cleaning to suit different needs.

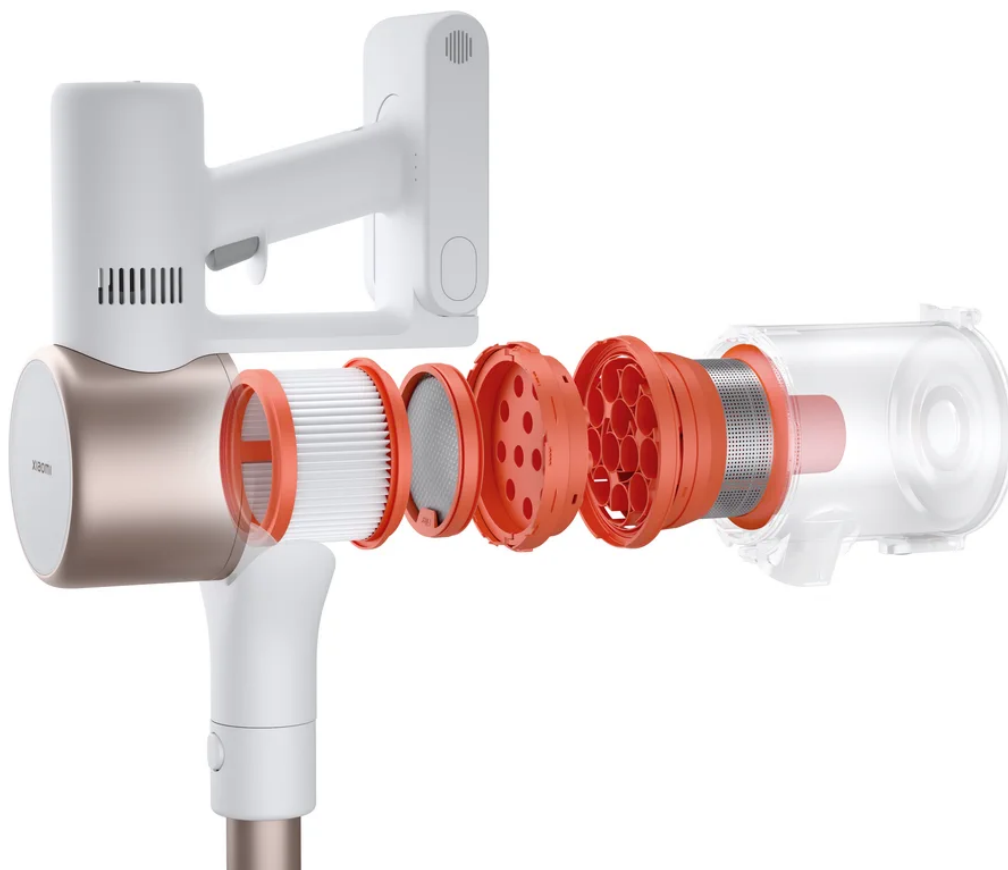

A brand new set of brushes

The **Xiaomi Vacuum Cleaner G9 Plus** has a brand new set of brushes that perform various cleaning functions. The high-torque **floor** brush is perfect for cleaning soft and hard floors, thanks to its built-in electric motor and V-shaped brush. This brush also has a special cleaning roller that prevents hair from getting caught in the brush. The **anti-mite brush** effectively removes dust mites and dead skin from bedding, sofas and other fabrics, providing a hygienic environment. The **2-in-1** brush allows you to clean narrow and hard-to-reach areas, such as corners, crevices and car interiors.

Multi-stage filtration system - captures up to 99.7% of fine dust

Xiaomi Vacuum Cleaner G9 Plus has a **multi-stage filtration system** that efficiently blocks particles as small as 0.3 μm , providing **efficient removal of up to 99.7% of dust particles**. This vacuum cleaner has a 12-cone cyclone separator that generates a powerful centrifugal force, separating dust from the air for a smooth flow. This vacuum cleaner also has five layers of filters, including a cartridge filter, a high-density sponge filter and a **HEPA** filter, which prevent backflow contamination and keep the exhausted air clean. **The filter module can be removed and washed** to maintain its full effectiveness.

Very long battery life - up to 60 minutes

The Xiaomi Vacuum Cleaner G9 Plus has a **capacious 2,500 mAh battery**, which allows you to use the vacuum cleaner for a long time without frequent charging. The battery discharge time when using the 2-in-1 squeegee in power-saving mode is up to 60 minutes, and up to 35 minutes when using the floor brush. This vacuum cleaner also has **the ability to change the battery at the touch of a button**, allowing you to extend the vacuum cleaner's run time.

Large and easy to empty dust container - 600 ml

The Xiaomi Vacuum Cleaner G9 Plus has **an extra-large dust container with a capacity of 600 ml**, which allows for long and comfortable cleaning without the need to empty the dirt frequently. Thanks to the **"one-click" release button**, removing the container and keeping it clean is extremely easy.
