Manufacturer: XIAOMI

Referention number: DNXXGJQQERMMLQ

Product features

Connectivity technology	Wireless
Wrist rest	No
Keyboard weight	500 g
Pointing device	No
Energy usage	50 mA
Material	Metal
Operating temperature (T-T)	0 - 40 °C
Mouse weight	60 g
Mouse dimensions (WxDxH)	113 mm
Windows operating systems supported	Windows 10
Power source type	Battery
Keyboard number of keys	104
Windows keys	Yes
Numeric keypad	Yes
Keyboard form factor	Full-size (100%)
Product colour	Black
Device interface	Wireless RF
Mouse included	Yes
Recommended usage	Universal

Full product description

Xiaomi Wireless Keyboard and Mouse

The kit features reliable 2.4GHz wireless transmission with a continuous and stable signal, reducing signal interference and frame drops. The compact wireless nano receiver replaces wired connections to create a tidy working environment.

Full-size 104 keys for full functionality

This classic, full-size 104-key, three-zone design includes all the functions of a standard keyboard, keypad and arrow keys. The overall key layout is compact and reasonable, making typing more comfortable.

12 Fn keys for efficient work

Equipped with Fn keys, the Fn F1-F12 keys support volume control, media playback, mute, track skipping and other common computer functions, making it easy to perform common computer tasks.

Cylindrical keycaps

The keyboard features lightweight and thin individual keycaps, with slightly curved cylindrical surfaces to conform to fingers and cushion impacts. The laser-engraved characters are clear and sharp, wear-resistant and durable.

Lightweight mouse for unrestricted movement

The lightweight mouse (without batteries) powered by a single AAA battery weighs only 60g, relieving the strain on fingers and wrist for prolonged use. The mouse features the original 1000DPI precision sensor, a proven technology ideal for work and study.

Solid grip for stable control

The Xiaomi mouse is medium in size, with a comfortable grip for a natural fit in the hand and fingers. The buttons are responsive and easy to press. The symmetrical design with a central scroll wheel allows both left- and right-handed users.

Plug-and-play

The wireless USB nano receiver is plug-and-play and requires no driver installation. The 2.4GHz signal receiver can be placed in the mouse's compartment, making it easy to carry and less likely to get lost.

Keypad indicator lights

Four separate function lights show the operating status of each function key. When the device's battery level is low, an orange light indicates that the battery needs to be replaced.

Low battery warning

Powered by a single AAA battery, the mouse has an independent power switch combined with an auto sleep mode to reduce standby power consumption and maximize power efficiency for long battery life.
