Full product description

Professional manicure at home

Experience the unparalleled ease and quality of a professional salon manicure without leaving your home with a state-of-the-art cordless nail cutter. Forget the hassle of tangled, short cords. The innovative cordless design provides maximum convenience when shaping, filing and polishing your nails, bringing them to perfection. Whether you're at home or on the go, now your manicure will always be within reach.

Extralink Cordless nail cutter.

Professional manicure in the privacy of your home.

Dual charging ports and convenient storage

The electric nail cutter is equipped with not just one, but two charging ports for unparalleled flexibility. You can choose a sleek solution and place it on a charging base, or plug it directly into a USB cable to charge it on the go. The carefully designed base also features 8 holes for bit storage, making it easy to change bits. This versatile design ensures that everything you need is always at hand.

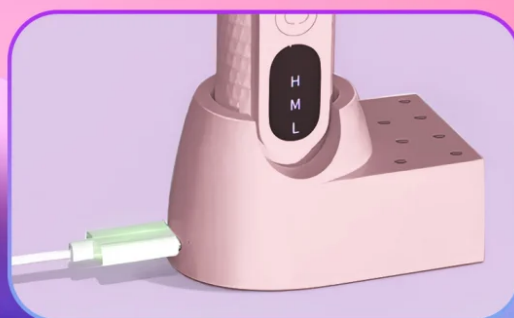

Dual charging ports and convenient storage

The electric nail cutter has been equipped with not just one, but two charging ports for unparalleled flexibility

You can connect directly to the USB cable to charge it on the go.

You can choose to place it elegantly on a charging base.

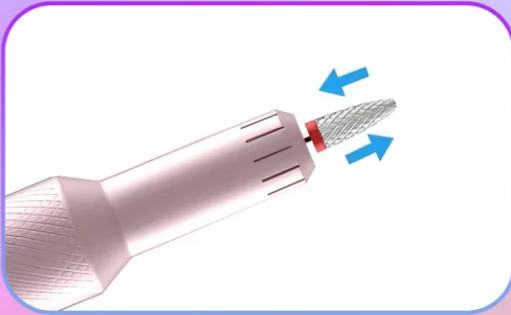

Intuitive LED display and adjustable settings

Tracking the remaining battery power and controlling the speed become easy as child's play thanks to the user-friendly LED display. This feature allows you to monitor the status of your nail cutter in real time for optimal performance. In addition, with three speed levels and a reversing function, you have the ability to customize your manicure and pedicure to suit your individual needs. Such customization makes the cutter ideal for use at different angles and with both hands.

Simple operation

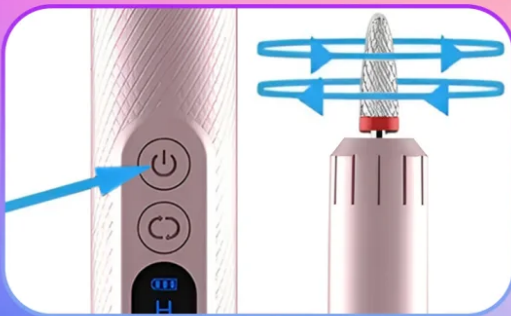

1.

3.

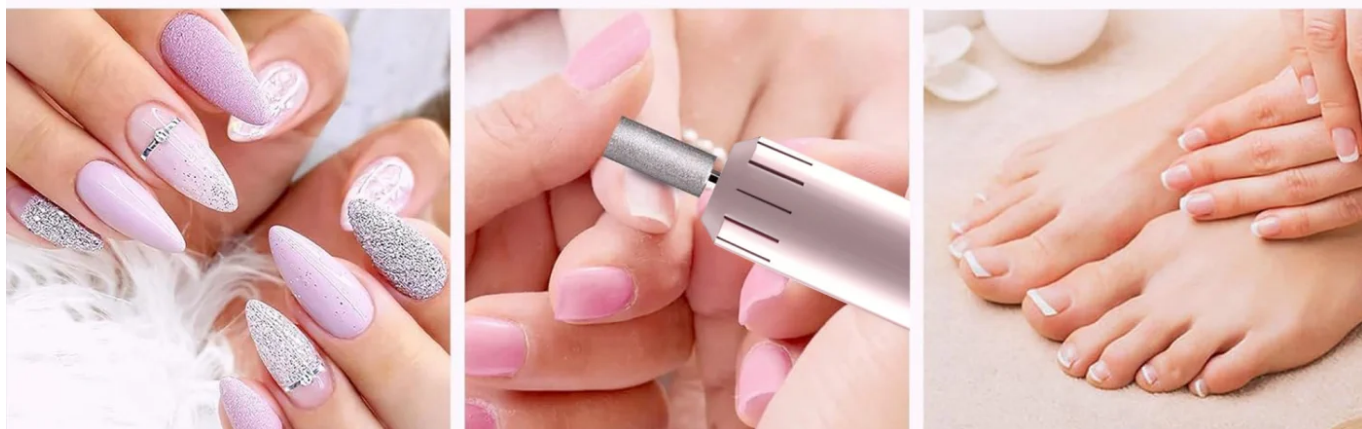

Compact, ergonomic design for convenient use

The electric nail cutter is not only small and easy to carry, but also designed with ergonomics in mind. As a result, it's extremely comfortable and easy to use while in use, providing precision and control. Its portability means you can enjoy professional nail care anywhere you go.

Versatile use of cordless milling machine

Quiet, powerful motor with safety features

Thanks to its robust but quiet motor, the electric nail cutter works reliably, providing low heat, quiet operation and minimal vibration. All this translates into pleasant and effective nail care. To preserve the long life of the device and ensure safety, we recommend leaving the milling machine idle after 30 minutes of continuous use. This feature guarantees not only the durability of the equipment, but also convenience during use.
