Full product description

Professional ear hygiene in your home

BeBird X1 is a device that combines convenience and precision to enable safe and effective ear hygiene. Thanks to its advanced technology and high quality manufacturing, the BeBird X1 allows a thorough view of the inside of the ear canal and eardrum, offering comfort and peace of mind to users. It is an affordable solution that is ideal for both daily care and basic health checks.

Najlepszy wybór do czyszczenia uszu

Why choose BeBird X1 ?

- **Professional image quality:** 3 MP camera provides clear and detailed images of the ear canal, enabling precise hygiene and basic examinations.
- **Safety and comfort:** Interchangeable soft tips guarantee comfortable and safe use, ideal for the whole family.
- **Mobile device connectivity:** Wireless image transfer to smartphones and tablets allows easy monitoring of ear conditions and documentation.
- **Compact and portable:** Lightweight design and long battery life (45 minutes on a single charge) make it perfect for both home and travel.
- **Versatile Use:** Works well for both home ear care and professional applications such as hearing aid fitting and audiological testing.
- **Affordable price:** BeBird X1 combines functionality and quality at an attractive price, making it accessible to a wide range of users.

High image quality with medical grade camera

The BeBird X1 is equipped with a 3 MP camera that provides detailed images in full color palette. This makes it easy to spot even minor abnormalities, such as blockages, infections or other problems within the ear. It's a tool that can prove invaluable for both daily care and monitoring ear health.
