Full product description

Secure Mounting for Your Smartphone on the Go

This car mount is a thoughtful solution for any driver who values comfort and safety while driving. Designed with attention to every detail, it ensures that your smartphone stays in place, even on rough roads. With a precise fit and stable mounting, this product makes sure your device is always at hand and in sight, while allowing you to focus on driving.

Stability and Durability You Can Rely On

The design of this car mount is based on **carefully selected materials**, which contributes to its exceptional stability. You don't have to worry about vibrations or sliding of your phone even during dynamic driving. **The secure grip** and **non-slip finish** of the holder's arms effectively protect your smartphone from slipping, which is crucial for your device's safety and peace of mind while traveling. Forget the distractions of having to adjust your phone's position.

Wide Compatibility and Ergonomics of Use

The mount is designed to accommodate a wide range of smartphones, supporting models with screen sizes from 4 to 7 inches. **The adjustable arms** easily adjust to the size of your device, keeping it secure and stable. The accessory's compact size means you can take it with you on any trip, whether you're moving in your own car or using a rental vehicle. It's a solution that works for your convenience.

Mounting on a Gel Suction Cup: Strength and Flexibility.

The use of a **super strong gel suction** cup ensures that the holder is securely and safely attached to the windshield. Even in the face of strong shocks or high temperatures, the suction cup stays in place, taking care of the stability of the whole set. At the same time, its removal is extremely easy and does not leave marks on the surface. It's a solution that combines the strength of attachment with ease of removal, which every user will appreciate.

Full Freedom of Setting with 360° Rotation

One of the key features of this mount is the **360° rotation function**. It allows the phone to be positioned at any angle, which is extremely useful for adjusting visibility according to lighting conditions, sunlight or individual driver preferences. **The long telescopic arm**, which is adjustable from 12 to 16.5 cm, allows you to bring the device closer to your sight, which significantly improves the comfort of using navigation or other applications. A simple swivel system makes changing the position quick and intuitive.

Thoughtful Design

The handle's **aesthetically pleasing design** and **sturdy plastic** make it not only serve its purpose, but also blend in well with the interior of any car. Weighing just 180g, it is lightweight, yet offers unmatched durability.

Key Advantages

- **It offers exceptional stability** thanks to its sturdy design and non-slip finish.
- **Contributes to the safety of** your smartphone by protecting it from falling.
- **Helps you freely adjust** the position of your phone to suit your needs thanks to its 360° rotation and telescoping arm.
- **Allows easy installation and removal** thanks to a gel suction cup that does not leave marks.
- **Takes care of wide compatibility**, fitting many smartphone models.
- **Offers thoughtful ergonomics** for use, making operation intuitive.
- **Makes travel more comfortable and safer** with your phone in sight.
