Full product description

Full control and security of your smartphone on the go

XTROBB 23010 Car Phone Holder is a thoughtful solution for drivers who focus on **stability and full functionality** of their mobile device while driving. This product makes **using navigation, making calls or listening to music more comfortable**. Regardless of the conditions on the road, the XTROBB 23010 holder makes sure that your phone remains securely in place, which contributes to greater concentration on driving. Made of sturdy materials, it stands out for its durability and ease of installation, making it a practical accessory for many car interiors.

Key Advantages

- Allows you to **securely fix** your phone, eliminating the risk of falling.
- The flexible arm makes it possible to precisely **adjust the position of your smartphone**.
- The 360-degree rotation feature offers **full control over the screen view**.
- Cord cutout allows you to **charge your phone while on the go**.
- Easy and quick installation and removal makes it **convenient for everyday use**.
- Made of durable materials contributes to a **long service life**.
- Compatibility with most smartphones makes it a **universal choice**.
- Additional support increases **the stability of the mount**.

Comfortable positioning thanks to the flexible arm

One of the key features of the XTROBB 23010 mount is its **long, flexible arm**. This element allows you to adjust the position of the smartphone to the driver's individual preferences. The arm can be freely bent in any plane, allowing the device to be optimally positioned. As a result, the screen is always in sight and in the palm of your hand, without having to take your attention away from the road.

Optimal viewing angle and 360-degree rotation

The XTROBB 23010 mount offers full freedom in the configuration of the tilt angle. This allows you to choose the most convenient position for your device. What's more, the mount allows you to **rotate your phone 360 degrees**, giving you full control over the screen view. This solution helps you comfortably use apps without distractions.

Ease of use and security for your phone

The simple mounting of the phone in the XTROBB 23010 mount is another advantage. Just use the button on the back to spread the arms, insert the smartphone, and then press down to securely immobilize the device. The bracket's reinforced components guarantee long-lasting use, while being mobile device-friendly to **prevent scratches or damage**.

Charging functionality and additional support

The XTROBB 23010 holder also offers a practical cutout for the charging cable. This makes it possible for you to charge your phone without having to remove it from the holder, which is especially useful on longer trips. In addition, the flexible holder comes with **a self-adhesive additional support**, which increases the stability of the whole set.

Mounting versatility and compatibility

This holder can be used both **on the windshield of the vehicle** (thanks to the built-in gel suction cup) and **on the cockpit**. It is important to note that the mount should not be used on leather surfaces. The XTROBB 23010 mount is compatible with most smartphones on the market, making it a universal solution for a wide range of drivers.
