Full product description

Excellent sound quality

Inside the stunning design lies a set of powerful technologies and professional components that enhance the **CP965** 's ability to deliver excellent sound quality. A 13-microphone array is carefully placed in each "foot" and in the center of the **CP965** to provide omnidirectional voice pickup and effective noise reduction. The advanced speaker also activates a maximum of **96db/0.5m** .

Intelligence algorithm

Yealink has developed a range of acoustic technologies, including **Smart Noise Filtering**, **Optimal HD audio** and **Noise Proof Technology**, to eliminate all distracting sounds. The next-generation technology, powered by robust processing performance, significantly improves audio quality during collaboration. Verbal message exchanges can be more productive than ever.

Scalability for greater flexibility and capability

- BYOD - simple connection of mobile devices via Bluetooth or Type-C or USB 2.0 port to realize Hybrid UC meeting
- Wireless microphones - The CPW65 wireless DECT extension microphone, can provide an additional 10-meter voice pickup range to extend the CP965's coverage area.
- PSTN Conference - With the Yealink CPN10, the CP965 also supports 3-way local conference.
