Full product description

Yealink SIP-T27G is a basic IP Phone with 6 lines and HD-voice

The **Yealink SIP-T27G** is a multifunctional SIP phone for business. Featuring excellent **Optima HD** audio quality, the SIP-T27G offers a full range of options for the user. The arrangement of programmable buttons on the device is laid out similarly to the older Yealink SIP-T29G model - four on each side of the display. In this case, one of the keys is used to turn OSD pages, which can set a total of **21 programmable values** that are displayed directly on the phone's screen, eliminating the user from the paper carrier on the body of the device. The presence of the **EXT port**, which allows the connection of up to **6 expansion modules** or the use of the Yealink EHS36 electronic micro-window for wireless headsets, makes the Yealink SIP-T27G an indispensable assistant in the work of the secretary, as well as in the work of the manager.

HD Audio and improved call management

"**Yealink HD Voice**" is a combination of software and hardware design, and the introduction of wideband technology to **maximize acoustic performance**. Combined with advanced audio clarity technology such as full duplex, ECHA elimination, adaptive jitter buffer, etc., SIP-T27G provides clearer and more **realistic voice communication**. SIP-T27G supports extensive productivity features such as XML browser, call parking, call capture, **BLF**, call forwarding, five-way conferencing, making it **an ideal** productivity **tool** for today's busy small and large offices.
