Full product description

Unlimited cable

An innovative Bluetooth handset, the **Yealink T58W** allows users to move freely and comfortably. Professional hardware and Yealink's state-of-the-art acoustic algorithm make the **T58W** series an expert at eliminating noise and keeping every call clear.

Android 9.0

With upgraded chipsets, the **T58W series** features enhanced system performance, fast response and increased processing capability. The adoption of the Android 9.0 operating system also improves data encryption, privilege management, responsiveness and integration capability to meet the requirements of modern business and future sustainability.

Data security

Taking data security as one of the most important concerns, the new set of phones adopts **Arm TrustZone** technology to secure various ARM-

based data and applications. With the support of **Yealink/Unify Square Device Management Platform**, the management, provisioning and upgrading of **the T58W series** can be implemented in a streamlined and simplified manner.
