Full product description

Yealink W52P VoIP DECT Phone

The **Yealink DECT Phone W52P** is a SIP cordless phone system designed specifically for small businesses and SOHO operations in the market for cost-effective, scalable SIP-based mobile communication systems. The **Yealink W52P** will not only meet all your cordless phone needs, but will make everyday calls extremely pleasant.

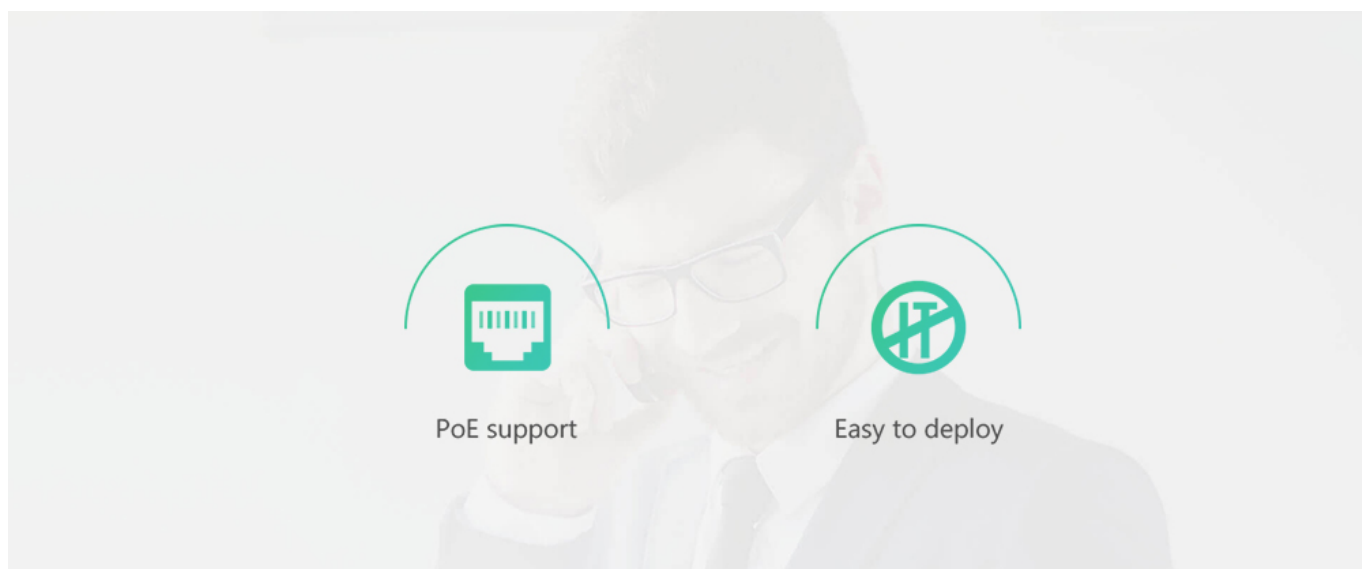

HD audio

The **DECT phone - W52P** is equipped with a full-duplex **speakerphone** in the G.722 band, meeting the highest professional HD sound standards and expected to impress with original and brilliant wideband voice.

PoE support

The **W52P** is integrated with PoE technology, pushing modern installation standards forward and allowing any size organization to enjoy more flexible and efficient network designs while protecting the environment.

Compatibility

The device has all the features and interoperability of its predecessor, the **SIP-T2X**, providing additional best-in-class capabilities without compromising existing infrastructure.
