Price: **1,058.53 zł** gross / 860.59 zł net

Yealink

Manufacturer: YEALINK

Referention number: DNXGGIQPFRMMLL

Product features

Input voltage	100 V
Number of handsets supported (max)	30
Number of VoIP accounts	100
Security algorithms	HTTPS
Automatic gain control	Yes
Call forwarding	Yes
Number of parallel conferences	3
Functions	Yes
Voice activity detection	Yes
Package weight	3130 g
Call waiting	Yes
Harmonized System (HS) code	85177900
Call divert	Yes
Ethernet LAN (RJ-45) ports	1
Comfort noise generation (CNG)	Yes
Package depth	180 mm
Anonymous call	Yes
Anonymous call rejection	Yes
Package height	63 mm
Package width	174 mm
Call hold	Yes
Supported network protocols	SNTP/NTP, VLAN, SIP v1, SIP v2, UDP/TCP/TLS, DHCP

Voice codecs	AJB
Conference call	Yes
Power over Ethernet (PoE)	Yes
Maximum coverage	300 m
Ethernet LAN	Yes
CAT-1q	2.0
Product colour	White
Product dimensions (WxDxH)	130 mm
Product weight	2560 g

Full product description

Yealink W80B base station

The **Yealink W80B system** provides seamless handover and roaming, stable connectivity and easy deployment, enabling multiple usage scenarios in warehouses, hotels, stores, offices and other applications.

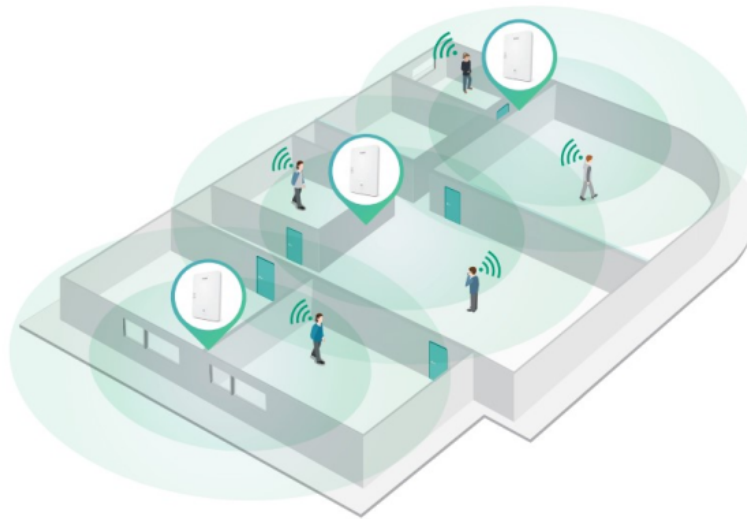

Easy to configure

The **Yealink W80B** provides easy configuration: even if your network infrastructure scheme does not assume automatic IP address acquisition (DHCP), the base station's IP address can be set directly from the DECT handset. With the **Yealink DECT IP Multi-Cell Deployment Toolkit**, you can quickly determine the correct location of any **W80B** base station in just a few measurement steps, making it easy to plan a large-scale microcell system.

Roaming and stability

The **Yealink W80B** allows users to move freely over a large area (indoors or outdoors), providing a seamless handover and roaming solution. The system supports up to 30 base stations and up to 100 handsets without compromising **HD audio quality** or connectivity.

"All-in-one" - Up to 100 simultaneous connections

The **Yealink W80B** can operate in several modes: base station, DECT manager or co-located mode. When building a small system consisting of up to 10 **Yealink W80B** devices, put one of them into co-located mode, in which the base station will also act as a DECT manager; the remaining **W80B** devices will continue to operate in base station mode, supporting up to 50 registered handsets and 50 concurrent calls. A medium-sized system can consist of 30 **Yealink W80B** devices, one of which acts as a DECT manager and the others as base stations. Such a system supports up to 100 registered handsets and 100 concurrent calls.

Easy access to phone books

The **Yealink W80B** provides easy access to multiple phone books, including local directory, remote phone book, LDAP and XML phone book. In addition, the system supports integration with IP PBX contacts, including the contact book of the 3CX communications platform.
