Full product description

Home training bike - Yesoul M1

Bring the gym right into your home with the **Yesoul M1** smart bike. The highlight of the smart personal training device is the **19-5 inch touchscreen** display space. The display space will allow you to view live professional coaching tips, and will also allow you to read your fitness as well as workout data in real time.

Robust construction

Yesoul M1 smart home exercise bike despite its large weight of 33kg, takes up very little space. Its dimensions are **1000 x 510 x 1250 mm**. In addition, the exercise bike is equipped with a solid frame, thanks to which the total load capacity is 100kg. Yesoul M1 bike not only helps to exercise leg muscles, but also helps to get rid of excess fat from thighs, significantly **contributing to a slim and athletic figure**.

A multitude of advanced features

The Yesoul M1 exercise bike is equipped with advanced features such as; **belt drive, magnetic resistance system and smooth belt transmission**. A plethora of advanced features ensure incredibly smooth and quiet operation, making this bike ideal for indoor workouts.

Intelligent control via app

The **Yesoul** app supports many smart features. Offering new exercises and effective calorie burning methods every day (up to 2000 exercises in total). Tips during workout are visually displayed on the display, allowing users to easily control the mode and change accordingly when needed.

Special Features:

- Quick and easy folding system.
- Fitness Orbiter can be used to train legs, hips, buttocks, arms and shoulders.
- Steel frame.
- Comfortable wide platform pedals.
- **Large, comfortable seat.**
- Maximum user weight up to 100 kg.
