Full product description

Quiet exercise bike Yesoul S3

The Yesoul S3 Exercise Bike from Xiaomi allows you to enjoy gentle, light workouts or exercises in the comfort of your own home. The **Xiaomi Yesoul X3 bike** is the perfect addition to your home gym and can provide users with a comfortable **cardio workout**.

A well-thought-out design

The Yesoul S3 bike is made of a sturdy frame that can support loads up to **120 kg**. In addition, the pedals are equipped with **anti-slip pads**. Slipping of the foot is therefore excluded even with heavy loads and when reaching the maximum speed. **The built-in adjustment system** allows you to select the required load depending on the recommendations of your training program and your capabilities.

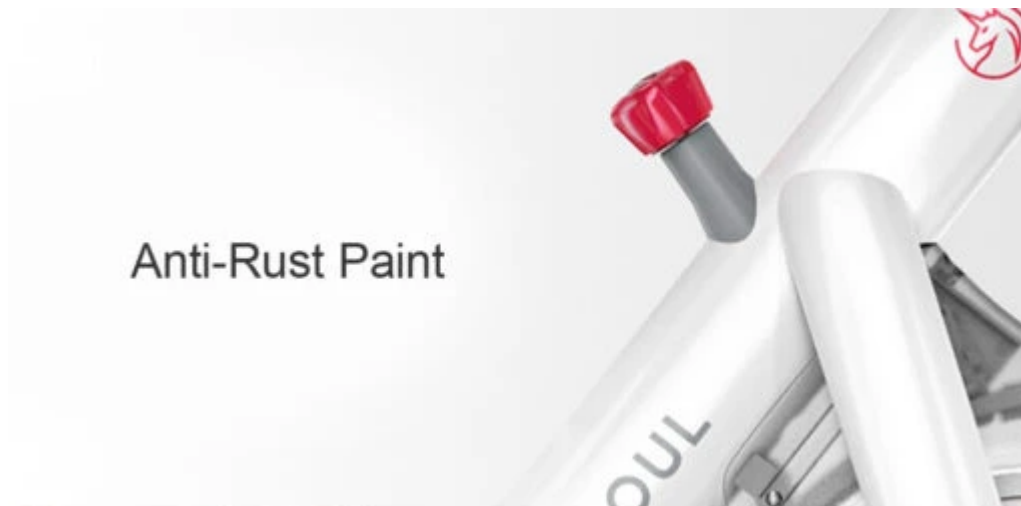

Quiet and smooth operation

Yesoul S3 bike is equipped with advanced **belt drive, reluctance system and smooth belt transmission**. All of this ensures exceptional quiet operation, without any unnecessary braking noise.

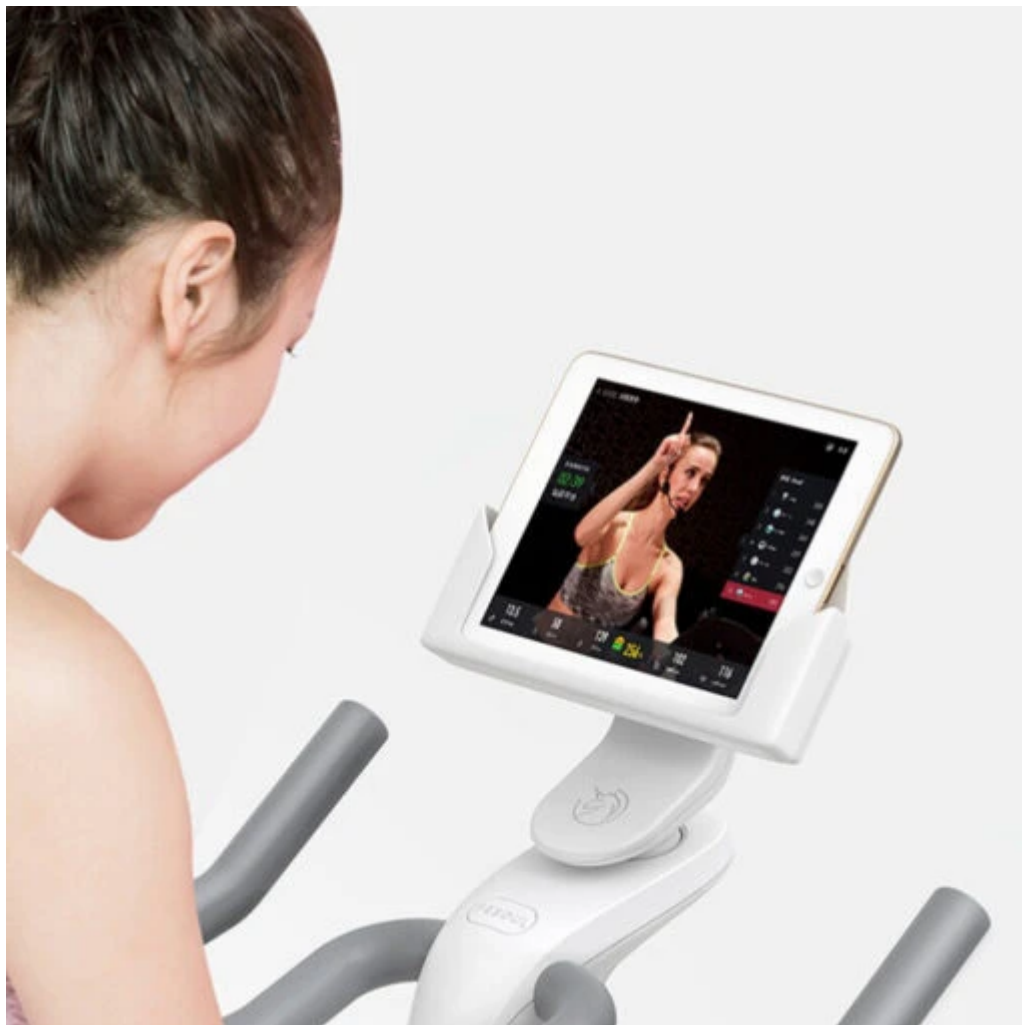

A multitude of advanced features

The soft seat is flexible enough not to put undue pressure on your buttocks and spine. The **Yesoul S3 bike** ensures a secure and comfortable fit. In addition, the built-in **magnetron** uses a patented braking system to ensure quiet operation. To drive the bike, rubber belts are used to ensure smooth power transmission.

Intelligent control via app

The **Yesoul** app supports a variety of smart features, offering new exercises and effective calorie burning methods every day (up to 2,000 exercises in total). **Workout progress are visually displayed on the screen**, allowing users to easily control the mode and change accordingly when needed.

Without power cord

Yesoul S3 bike is equipped with a generator that generates energy when pedaling, thus providing power. **With no wires and independence from an outlet, the Yesoul S3 bike can be placed in any room.**
