Full product description

ZTE F620 ONU V3 - high performance GPON gateway in FTTH solution

The **F620 ONU V3** terminal will meet the task of providing a broadband Internet network with very high speed and efficiency in the use of **FTTH**. It is perfect for voice (VoIP), video streaming (IPTV) and Internet browsing applications. Additionally **F620 V3** allows you to connect 2 phones via **RJ-11** connectors.

Two telephone connectors

Thanks to the use of two connectors type **RJ-11** it will be possible to connect two telephone devices at the same time, which will separate the private line from the company one.

Gigabit Ethernet standard

With **Gigabit Ethernet** capabilities, each of the devices connected to one of the 4 RJ-45 ports in **ZTE F620 V3** will be able to maintain a fast connection with a transfer rate reaching **1 Gb/s**.

GPON standard optical interface

The **GPON** interface will provide the possibility of using a fiber optic link with a maximum speed over a distance of up to 20 km.
