Full product description

ZTE F620 ONU V5 - high performance GPON gateway for FTTH solutions

The **F620 ONU V5** terminal provides a very fast and efficient broadband Internet network using **FTTH**. It is perfect for voice calls (VoIP), video streaming (IPTV) and Internet browsing. Additionally, the **F620 V5** allows you to connect two phones via **RJ-11** connectors.

High-speed Internet access

The **ZTE F620 V5** subscriber terminal provides access to a high-speed broadband network via a **GPON** connector, which allows stable and efficient operation of the aforementioned applications.

Support for two phones

Thanks to the two **RJ-11** connectors used, it is possible to connect two phones separately, for example, one for private and one for business purposes.

Ethernet connectors

Four built-in **Fast Ethernet** ports in **F620 V5** allow you to connect several devices without additional bridges and operate with **100 Mb/s** transfers.
