Full product description

ZTE F623 - GPON ONU terminal

The **F623** is a high quality network gateway. It supports many L3 functions to create a smart home network.

Stable connection

ZTE F623 provides a high quality broadband connection to the Internet through a **GPON** optical interface, while maintaining stable operation of services such as VoIP and IPTV.

Wireless network

The **ZTE F623** terminal has a **Wi-Fi** wireless network interface, which will allow you to share the connection more easily with other devices without using additional cables.

Connections

ZTE F623 is equipped with the following ports:

- 4 x **Ethernet** port, of which 1 with **Gigabit Ethernet** support, used to connect devices with cables, which provide a stable and efficient connection,
- 1 x **POTS** port allows you to connect a phone without the need for additional cable splitting,
- 1 x **USB** will allow you to connect devices such as storage media for file sharing on the network.
