Full product description

ZTE F673 ONU - high performance GPON gateway

The **F673 ONU** terminal delivers at very high speed and performance broadband Internet network in **FTTH** solutions. It is ideal for applications such as voice calls (VoIP), video streaming (IPTV), and Internet browsing. **ZTE F673** allows to connect one phone to a RJ-11 connector.

Connectors

ZTE F673 offers **one POTS** port, **four GE** ports with automatic adaptation, and **two USB** ports. The terminal is highly efficient, which ensures convenient use of services such as **VoIP**, **Internet** or **HD video streaming**.

Fast and stable network operation

In addition to **Wi-Fi**, the F673 provides four **Gigabit** Ethernet interfaces that allow you to connect your devices via cable and **guarantee a fast and stable connection to your network**.
