Full product description

ZTE F401 - EPON terminal

The **ZTE F401** terminal is a compact solution for **FTTH** networks. It is a high-end subscriber terminal that will provide excellent performance in any application.

Efficient network

The **ZTE F401** subscriber terminal has one **Gigabit Ethernet** connector which will allow to separate the Internet network to more devices and provide stable access to VoIP, IPTV and Internet applications at the same time.

Easy to set up

The batch configuration on the **EMS** side makes any additional configuration of the **ZTE F401** unnecessary.

EPC connector

Thanks to the **EPON** optical interface, the **F401** terminal will allow you to use the signal of a high-speed fiber optic network and achieve a data transfer rate of up to **1.25 Gb/s**.

Energy saving

The **F401** terminal has been designed in a compact style to take up as little space as possible and look good at the same time. **ZTE F401** will also help you save energy by detecting network traffic and will go into low power mode if the traffic is low.
