Full product description

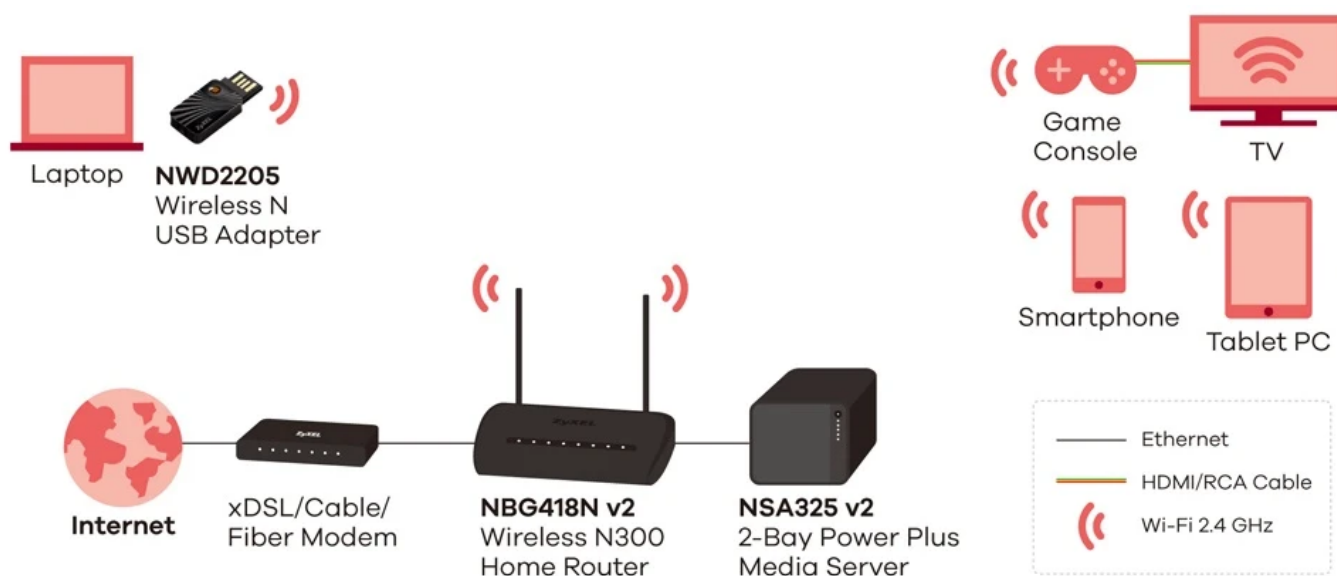

Zyxel NBG-418NV2 - home router N300

NBG-418N v2 router is a perfect home solution. Using **802.11n** technology, it provides data transfer speeds up to **300 Mb/s** and network traffic prioritization.

Long range

Two **5 dBi** antennas used in the **NBG-418N v2** router allow to operate the network in a larger space and for more devices that can connect quickly thanks to the **Wi-Fi Protected Setup (WPS)** button.

Router management

The **NBG-418N v2** router allows you to plan the time of wireless network shutdown, so you can save energy during periods when you do not use the network. The ability to adjust the output power of the wireless network will help to minimize interference with adjacent devices, in places with high density.
