Full product description

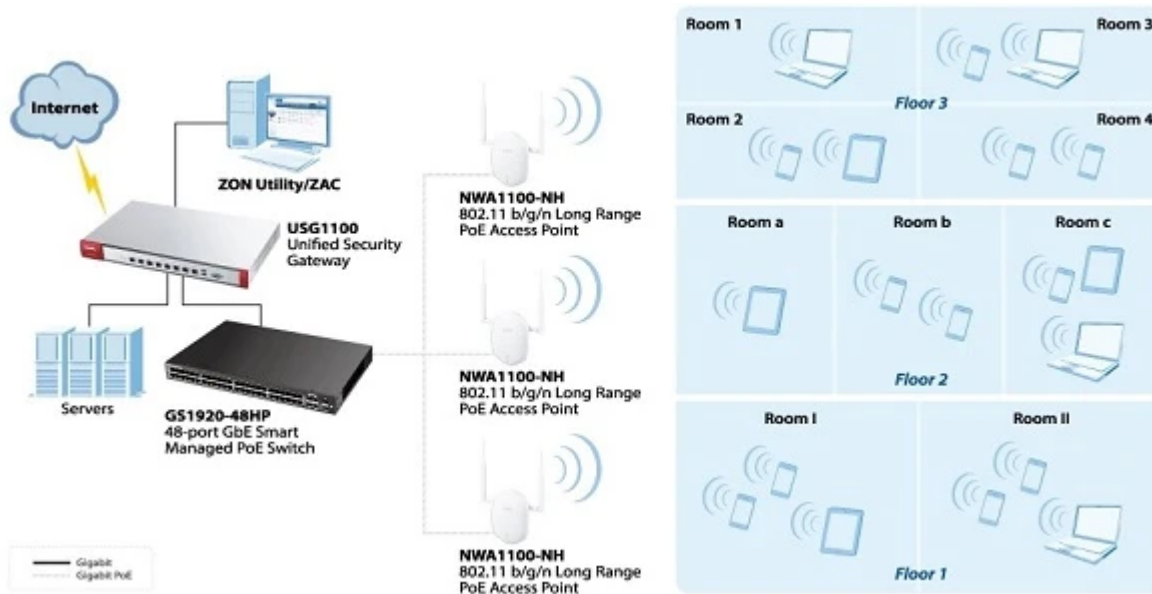

Zyxel NWA1100-NH 802.11n - long-range access point

NWA1100-NH is designed to meet modern trends. It is characterized by high power of transmitted signal and high gain of the antenna, thanks to which the quality of wireless connection with other devices is the highest. Advanced management functions allow to facilitate work on configuration of many such **access points**. This is a great solution for companies that want to improve **Wi-Fi** connections.

Many benefits

The increased output power **NWA1100-NH** provides increased throughput in an area where standard **access points** lose good connection properties. Compliance with **802.3af** is not only **energy savings**, but also no need to modify the existing **network infrastructure**. **Zyxel NWA1100-NH** offers many **authorization possibilities for wireless devices - to prevent access to network unknown devices**.

Zyxel ONE Network

Easy-to-use **Zyxel ONE Network** tools will streamline the work on configuration, management and troubleshooting, making it possible to focus on your own **business priorities**. **Zyxel Smart Connect** (supported in some models) will allow **Zyxel** devices to recognize themselves and pass on the tasks that the user expects to perform.

The most important features:

Long range - high power and energy gain of the antenna in **NWA1100-NH** will strengthen the signal coming even from devices with poor **wireless** parameters. **Power supply PoE** - **Zyxel NWA1100-NH** has been designed to fulfill its role in various deployment cases. It can work with **Switches PoE** 802.3af and 802.3at, which eliminates the inconvenience of incorrect power connectors. **Easy configuration** - **Zyxel ONE Network** and **Zyxel AP Configurator** tools will make the configuration of multiple devices easier, including the configuration of multiple **access points** simultaneously. **Network security** - **The wireless layer 2** insulation will effectively protect your private network from unwanted actions or spying. **WPA2 Enterprise WPA2 encryption** and extensive **EAP** support enables seamless integration with **RADIUS** servers. **Access list** will enable blocking unwanted devices based on **MAC addresses**.
