Information:

Extralink cooling unit is an efficient and reliable solution for a server cabinet that helps maintain the optimal temperature and protects devices from overheating. Two high-performance, quiet fans ensure effective air circulation, supporting a longer service life for the equipment. The metal housing guarantees durability and resistance to damage, while simple installation and intuitive operation make it easy to set up even for less experienced users. Universal compatibility means the device is suitable for a variety of applications.

Product features

Power source	AC
Input voltage	220 V
Built-in blower fan	Yes
AC input frequency	50 Hz
Product colour	Black
Watch case material	Metal
Type	Cooling fan

Full product description

Extralink cooling unit - the perfect solution for your server rack

This is a product that will meet your expectations! With two powerful fans and a power cable, it provides optimal temperature inside the cabinet, protecting your devices from overheating.

High efficiency fans

Extralink cooling unit is equipped with two fans that **provide effective air circulation**. As a result, the product effectively lowers the temperature inside the cabinet, resulting in longer equipment life. In addition, the fans operate quietly, making them ideal for office environments.

Easy installation and operation

The product is easy to install, saving time and effort. Intuitive operation ensures that even those without technical experience can use the device with ease.

Reliable design

The metal housing ensures durability and resistance to damage. Extralink cooling unit is designed to meet the requirements of even the most demanding users. The product is compatible with a variety of systems, making **it a versatile solution** for different applications.
