Product features

Product colour	Black
Watch case material	Steel
Type	Cooling fan

Full product description

Reliable Cooling with Extralink 4 Fans Roof Cooling Unit

EXTRALINK **4 FANS** ROOF COOLING UNIT WITH CABLE TO THERMOSTAT is a device designed to optimize temperature in racks, mounted on the wall or ceiling. With four powerful fans, the panel provides efficient air circulation between the units, significantly improving their performance.

Versatility of Assembly

The EXTRALINK cooling panel can be mounted both vertically and horizontally, making it ideal for almost any server room. Regardless of the layout of **your rack**, the **EXTRALINK 4 FANS ROOF COOLING UNIT** will fit perfectly into the space, providing optimal cooling.

Safe and Efficient Power Supply

The panel is powered by **AC 230**, which guarantees reliability and stable operation. In addition, the system is protected by a built-in fuse, which minimizes the risk of failure and ensures safe use. This ensures that your devices are protected from overloads and sudden voltage spikes.

Rack Temperature Optimization

With four **powerful fans**, the **EXTRALINK 4 FANS ROOF COOLING UNIT** ensures even airflow, eliminating hot spots and maintaining an optimal temperature inside the cabinet. This not only improves the performance of the equipment, but also extends its life by protecting it from overheating.
