Full product description

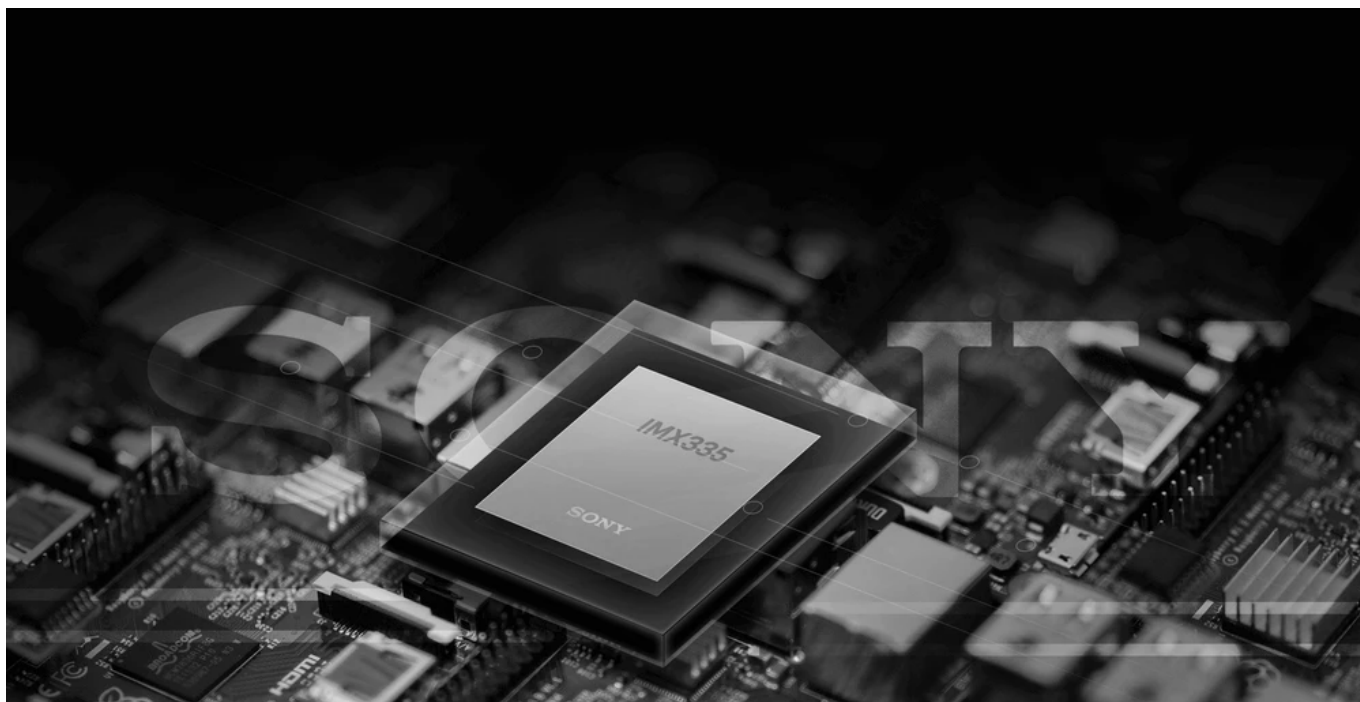

Car DVR - Xiaomi 70mai Dash Cam Pro Plus

70Mai Dash Cam Pro Plus is a reliable car camera with built-in LCD display and 5 MP camera. Excellent quality and detailed images are maintained even at night, and a special **DeFog** function allows you to get clear images in all weather conditions. The wide viewing angle of the 140° lens allows you to capture both lanes of the road. The **70Mai Dash Cam Pro Plus** optimally combines extensive functionality with reliability and easy installation.

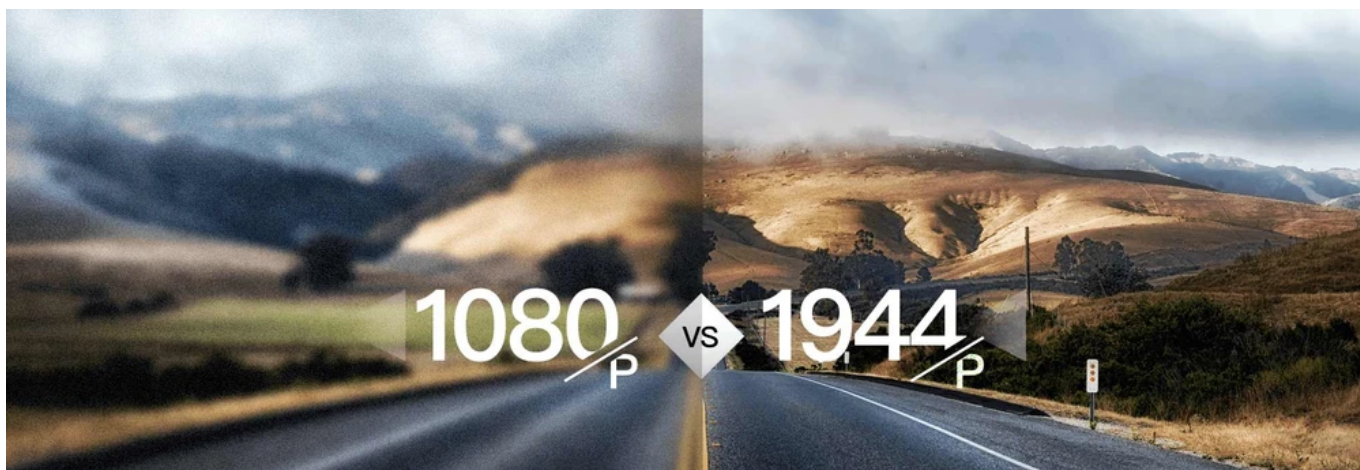

Quality without compromise

Xiaomi 70mai Dash Cam Pro Plus guarantees excellent detail due to its high sensitive Sony IMX355 sensor. Because of this camera captures video with a resolution of **2592x1944 pixels at 30 frames per second**. In addition, the 140° wide-angle lens fully captures the situation in the adjacent lanes, so no important detail is missed in the frame.

Ready for any situation

The car DVR is equipped with WDR function to ensure high image quality in uneven lighting. It automatically evens out the contrast of each frame so that the final video sequence is bright and saturated. In addition, **DeFog** technology greatly improves the quality of recorded video in case of fog or snow, and **Super Night Vision** minimizes noise in the dark.

More data

The 70MAI car DVR is equipped with a **GPS** module, so it continuously determines the coordinates and speed of your car, completing the video sequences with this information.

Shock sensor

70Mai Smart Dash Cam Pro Plus A500 focuses on the essentials. The car camera is equipped with a **shock sensor**, recognizing potential emergency situations - such as acceleration, braking and shock.

Safe driving

In addition to recording video of driving, the DVR **helps drivers** avoid mistakes and prevent accidents. The device has a collision warning system, which informs us if we are dangerously close to a vehicle in front of us, and also warns us if we leave our lane.

Convenient browsing

You can view the footage directly on the device using the 2-inch LCD display. Video viewing is also available through 70mai's proprietary mobile app. **The program provides extensive DVR configuration capabilities** and allows you to copy video recordings to share the footage with other participants in the event.
