Full product description

Akaso Brave 4 sports camera - your adventure companion in the highest quality

The Akaso Brave 4 sports camera is an excellent choice for anyone who appreciates clear images and stable recordings, regardless of the conditions. With this versatile device, you will easily capture exceptional videos in 4K resolution and preserve memories for years to come.

High quality recordings and photos

The Akaso Brave 4 sports camera captures **4K video at 30 frames per second** for crystal clear, detail-saturated images. With the ability to capture shots in a variety of resolutions, including 1080P120FPS and 720P240FPS, you can adjust the quality to suit your needs and get smoothness even with fast movements. In addition, the Brave 4 shoots 20MP class images, guaranteeing high quality shots even in the toughest conditions.

Image stability in any situation

With a built-in 3-axis gyroscope, the Akaso Brave 4 camcorder allows you to maintain a high degree of image stability in real time. Whether you're recording dynamic sports scenes or want to capture tranquil shots of nature, the image stabilization will make every **recording clear and smooth**. You can also use the 170° wide-angle lens setting to capture more detail in a single shot.

Waterproof design and functional accessories

The Akaso Brave 4 camera is distinguished by its rugged design and waterproof housing, so you can take the camera on a deep-sea diving session - as deep as 30 meters (with a protective ETUI)! In addition, the camera is equipped with features such as **5x zoom and timelapse mode** to create even more impressive shots.
