Full product description

Discover video in the highest quality

The **Akaso EK7000** Pro sports camera offers everything you need to record every moment of your adventure in 4K resolution. With it, you no longer have to choose between quality and durability - now you have both in one device.

Superior image quality in every detail

The Akaso EK7000 Pro sports camcorder offers 4K video quality, ensuring this sharp and clear footage even in the most demanding conditions. With a wide 170° viewing angle and **high-resolution 20M images**, every shot will be full of detail. In addition, the EK7000 Pro offers **3-stage video resolution adjustment** , allowing you to adjust the quality to suit your specific requirements and circumstances, making it an excellent choice for professionals and amateurs.

Thoughtful design for the active

Akaso EK7000 Pro sports camera is designed for the most demanding users. The waterproof ETUI provides full protection during a diving session - up **to 40 meters deep!** Thanks to its durable construction and the included case, you can take the camera on a session without worrying about damaging it, even in the harshest conditions. This is a device that will work wherever durability and reliability are important.

Wide range of available modes

With a variety of recording modes, the Akaso EK7000 Pro camera will meet all your needs. Do you want to record a timelapse of a picturesque landscape? Or maybe record the action on the ski slope? The camera offers recording modes such as **normal, loop, motion detection and car mode**, so you can match it to any situation. Plus, install the Akaso app to remotely control the camera and share your videos instantly.
