AKASO

Manufacturer: AKASO

Referention number: DNXXGNNKMRMMON

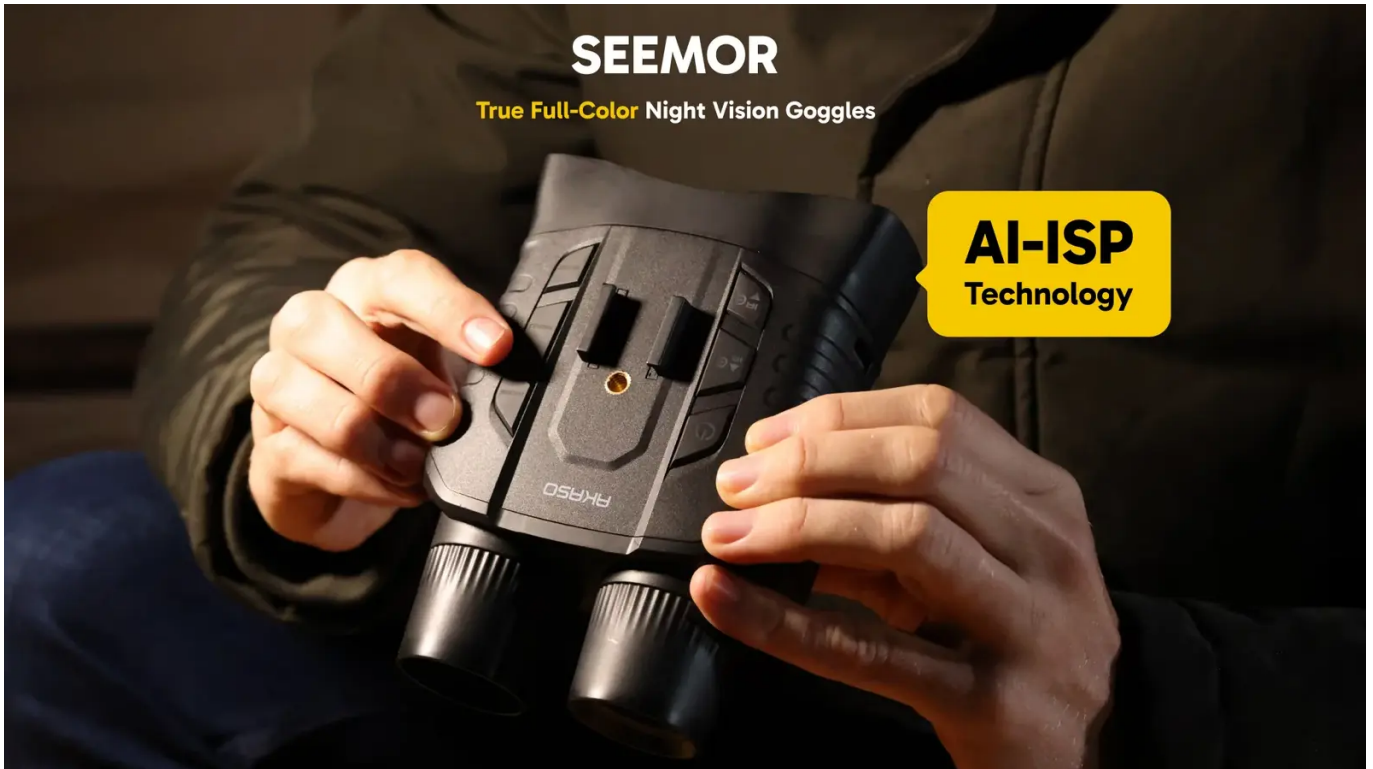

Information:

AKASO SEEMOR-200 are advanced night vision goggles that provide a clear image even in complete darkness. They offer 4K recording and viewing, and the 6-axis gyroscope stabilises the image during movement. Thanks to two 3250 mAh batteries, the device operates for up to 8 hours, performing well in temperatures from -20°C to 60°C. The wide-angle lens and 16x digital zoom make it easier to observe large areas, while IPX8 waterproofing increases reliability in difficult terrain and weather conditions.

Full product description

AKASO SEEMOR-200 - Advantage in any darkness

Night vision goggles **from Akaso** are an advanced device that will take your nighttime activities to a whole new level. Whether you're a survivalist or a security professional, these goggles will provide you with a clear image even in total darkness. Equipped with the latest technology, the SEEMOR-200 combines exceptional image quality with unmatched durability, offering a solution that will stand up to any challenge.

Exceptional image quality and 4K resolution

AKASO SEEMOR-200 night vision goggles offer amazing image quality thanks to their 4K resolution. With this high resolution, you can see every detail, which is crucial in situations where precision is essential. In addition, **the 6-axis gyroscope** guarantees image stability, making the SEEMOR-200 ideal for observation in difficult field conditions.

 Powered by AI-ISP Technology	 Ultra-low Light Full-color	 1640-3280ft Clear Vision	
 99% Color Reproduction	 Color / Infrared Modes Available	 2 Replaceable 3250mAh Batteries	 4K Image Quality

Long-lasting operation and powerful battery

Powered by two batteries with a capacity of 3250mAh each, the AKASO SEEMOR-200 night vision goggles **can operate continuously for 8 hours**, providing enough time to complete any task. Even in extreme conditions, with temperatures ranging from -20°C to 60°C, the device does not lose its performance, making it a reliable tool for work in all circumstances.

Ultra-low Light Full-color Night Vision

Versatility and functionality

The AKASO SEEMOR-200 night vision goggles feature a wide-angle **lens with viewing angles of D17.5°, H14°, V11°** to provide a full overview of the situation. With a digital zoom of up to 16x, users can easily adjust the zoom to suit their needs, which is extremely useful when monitoring large areas. In addition, the **IPX8-compliant** waterproof design allows the goggles to be used in the harshest weather conditions.
