Price: **169.99 zł** gross / 138.20 zł net

Manufacturer: AQARA

Referention number: DNXGHJIQGRMMIN

Information:

Aqara Camera G100 Select is a versatile 2K surveillance camera for indoor and outdoor use, with IP65 resistance. It delivers a clear image day and night thanks to the f/1.8 aperture and two night modes, while intelligent AI detection reduces false alarms by detecting motion and people. The camera works with Apple HomeKit, Google Home, Alexa, SmartThings and Home Assistant, and two-way audio makes communication easier. Recordings can be saved locally to microSD or to NAS, with additional cloud options and an emphasis on privacy and security thanks to Wi-Fi 6 and WPA3.

Product features

Height	58.16 mm
Width	58.16 mm
Depth	72.25 mm
Connectivity technology	Wireless
Maximum resolution	2304 pixels
Mounting kit	Yes
Night mode	Yes
Humidity measurement range	0 - 95%
Networking standards	IEEE 802.11ax
IFU / User manual	Yes
Operating temperature (T-T)	-10 - 40 °C
Package type	Box
Screws included	Yes
Card reader integrated	Yes
Video formats supported	H.264

Maximum memory card size	512 GB
Compatible memory cards	MicroSD (TransFlash)
Wi-Fi standards	802.11b
Wi-Fi	Yes
Bluetooth	Yes
Ethernet LAN	No
Product colour	White
Mounting hardware type	Ceiling/Wall
Type	IP security camera
Designation	Indoor & outdoor

Full product description

Home monitoring in 2K quality

Discover the **Aqara Camera G100 Select** surveillance camera, a versatile device for indoor and outdoor monitoring. It offers **2K resolution** and advanced night modes, allowing precise identification of events at any time. Intelligent **AI detection** and compatibility with ecosystems such as **Apple HomeKit** give you full control over your home security.

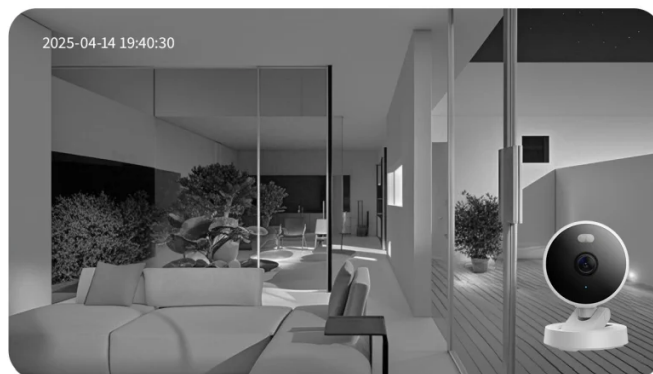

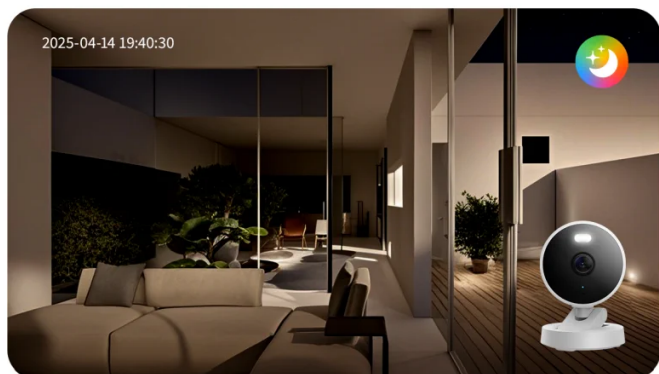

Key advantages of the Aqara G100 Select camera

- **Detailed 24/7 monitoring:** 2K resolution and two night modes help deliver a clear image at any time.
- **Versatile mounting:** Weather resistance (IP65) allows the camera to be installed anywhere.
- **Smart notifications:** AI detection distinguishes people from other moving objects, reducing false alarms.
- **Full integration:** Compatibility with major smart home platforms enables you to create a cohesive security system.
- **Privacy protection:** Local recording on a microSD card and NAS server gives you full control over your data.

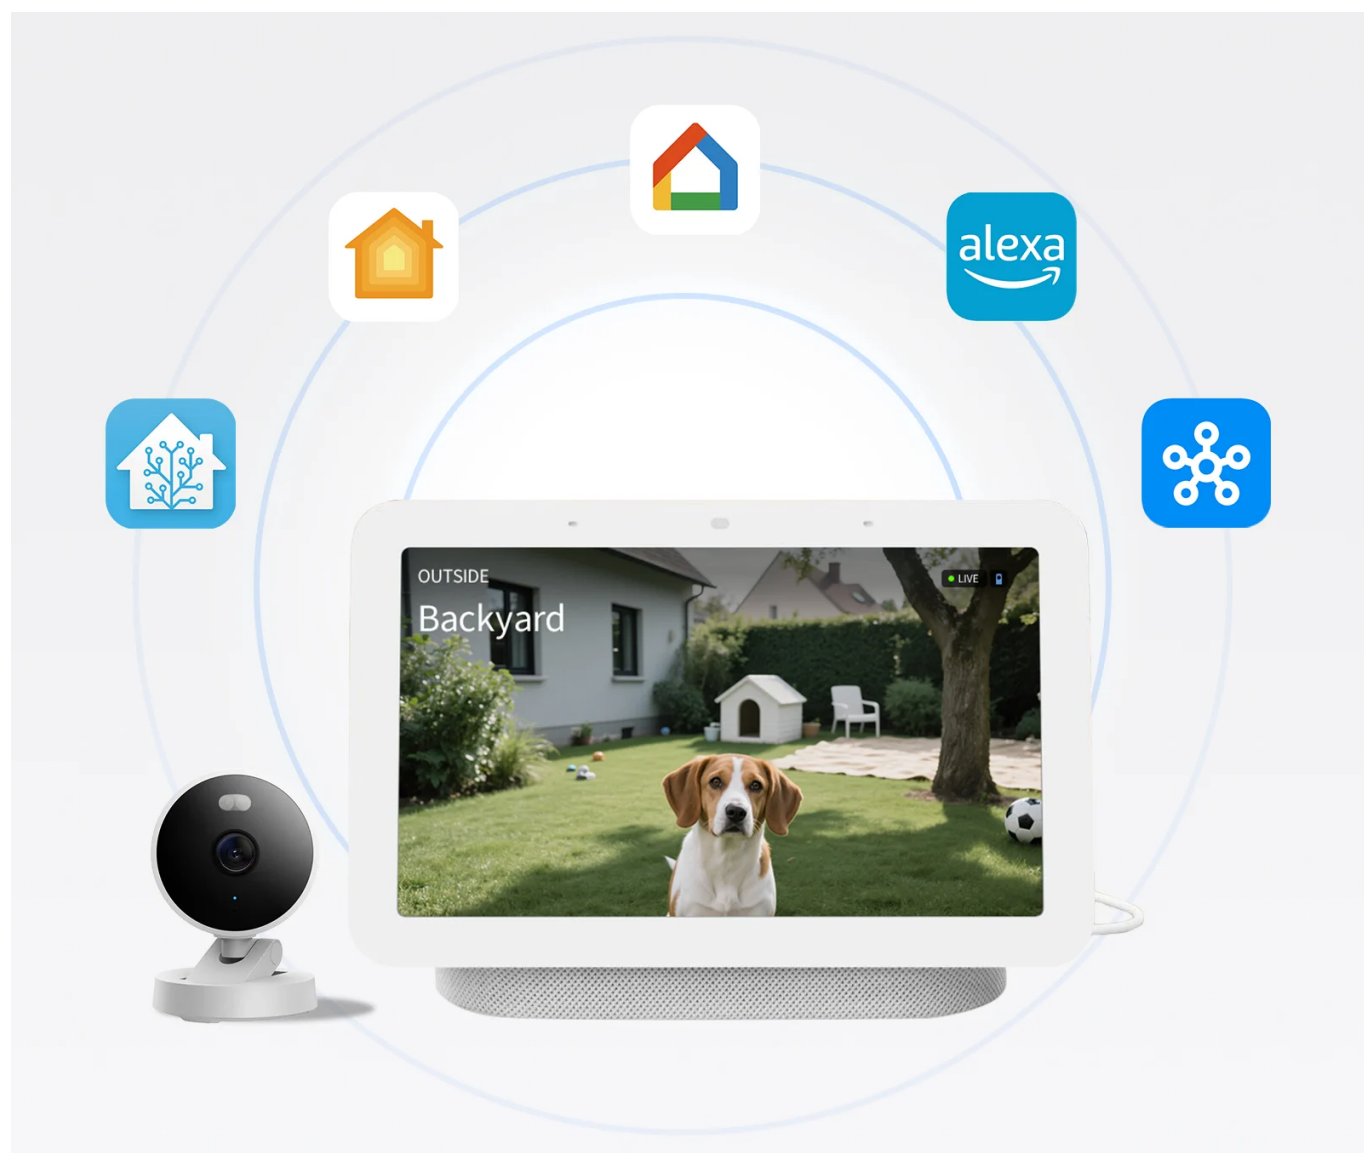

Clear image day and night

The G100 camera offers **2K resolution and an f/1.8 aperture**, enabling every detail to be captured in high quality. **Dual night mode**, combining colour image and discreet infrared, ensures that no detail escapes your attention, even in complete darkness. The image remains clear and full of detail around the clock, regardless of lighting conditions.

Wide compatibility

The device supports seamless Wi-Fi streaming to **Apple Home** (including HomeKit Secure Video), **Google Home**, **Alexa** and **SmartThings**. Integration with Home Assistant via RTSP stream opens the door to advanced automation. Built-in **two-way audio** enables real-time communication, making it easier to interact with guests or household members.

Use indoors and outdoors

The Aqara G100 camera with **IP65 water resistance** is designed to withstand a variety of weather conditions. This design allows it to be moved freely from indoors to outdoors, offering effective protection wherever you need it. You can monitor both the living room and the driveway in front of the house using one universal device.

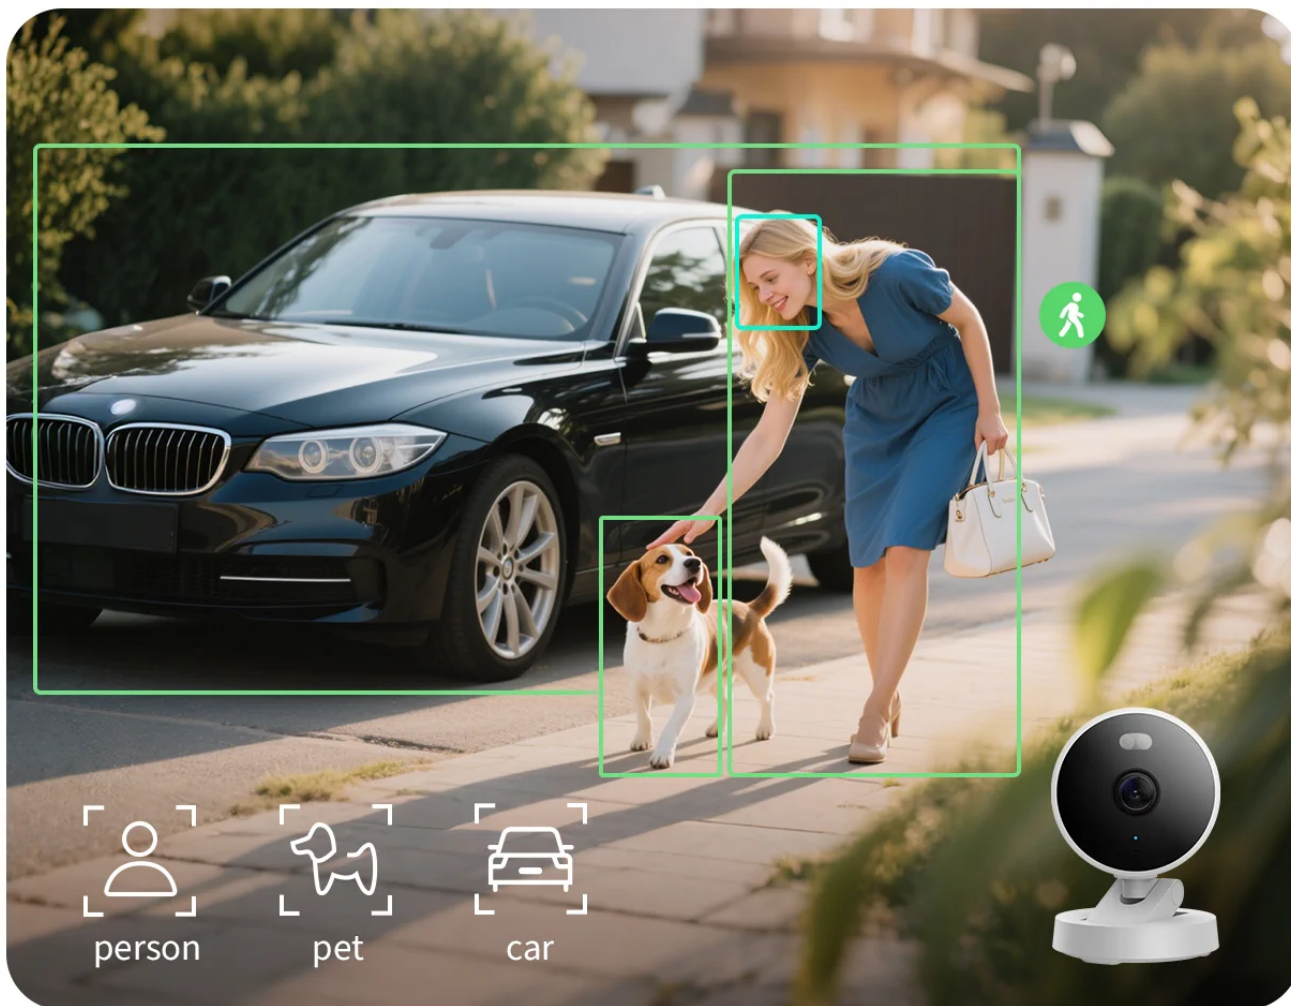

Flexible recording options

The Aqara G100 supports **24/7 local recording** on microSD cards (up to 512 GB, **sold separately**) and backups to NAS servers. The optional HomeGuardian cloud solution offers end-to-end encryption and automatic tagging of key events, helping you easily find important moments on the timeline while protecting your data. **In the Select version, users receive a free 3-month trial period**, which provides access to additional recording space and advanced AI features. It is a great opportunity to fully explore the capabilities of this advanced device.

Smart AI detection

The camera is equipped with basic **local AI detection**, which helps ensure you receive notifications only when a person is detected (**motion and person detection**). For more demanding users, **advanced cloud detection** is available, capable of recognising faces, vehicles, animals and parcels (requires a HomeGuardian plan subscription).

Stable and secure Wi-Fi

The camera supports **Wi-Fi 6 2.4 GHz**, which translates into wide coverage, better compatibility and resistance to interference. Support for the **WPA3** standard provides stronger protection for your network, minimising the risk of unauthorised access and safeguarding the privacy of your recordings.

The Aqara G100 surveillance camera is the ideal solution for:

- Home and flat owners who want to monitor their property.
- Users of smart home ecosystems such as Apple HomeKit or Google Home.
- People who need a flexible solution for indoor and outdoor use.
- Parents and pet carers who want insight into what is happening at home.
- Anyone who values privacy thanks to local data storage options.
